HASKELL IMPLEMENT & SEED CO.

Formerly THE GEO. B. HASKELL CO.

194-200 Main Street,

LEWISTON, MAINE

IMPORTANT.

Price and Terms. All prices stated in this catalogue are based on the present market and are subject to change without notice. We have purposely omitted prices on Grains and Grass Seeds because of the market fluctuations, as we believe it to be to the advantage of the purchaser, and we will gladly submit samples and lowest quotations on application.

Our Terms of payment are net cash.

Remittances. All moneys should be sent either by **P. O. Money Order, Bank Draft, Registered Letter or Express Money Order.**

We Deliver all Vegetable and Flower Seeds when bought at the packet, ounce, $\frac{1}{4}$ -pound, $\frac{1}{2}$ -pound and 1-pound prices, but when seeds ordered are listed in pints and quarts, postage should be added at the rate of 8 cents per pint and 15 cents per quart. In all other cases goods will be **SHIPPED F.O.B. LEWISTON**, with no charge for packing.

Bags will be charged as follows: — 2-bushel bags 22 cents, $\frac{1}{2}$ -bushel bags 10 cents, peck bags 8 cents.

Non-Warranty. While we do not give any warranty, either expressed or implied, as to the productiveness of our seeds, we buy only the best and purest, and we carefully test all seeds before putting them on the market. If goods are not accepted on these terms they must be returned at once with all charges paid.

PARCEL POST INFORMATION ON PAGE 175

NOTE. We would deem it a great favor if our customers, or those wishing to remain on our mailing list, thereby receiving our catalog, would inform us of change in address.

GENERAL LIST

Postage Prepaid on all Flower Seeds in Packets at Prices Quoted

SPECIAL INDUCEMENTS

When the money accompanies the order, purchasers of Seeds in packets at catalogue prices may select 25 cents' worth extra packets for each \$1.00 sent. Thus anyone enclosing \$1.00 may order seeds in packets amounting to \$1.25. Two dollars sent to us with the order will pay for seeds in packets amounting to \$2.50, and so on. This offer does not include seeds in collections, by weight or measure, bulbs, plants or anything excepting seeds in packets.

Plants are generally known and described as Annuals, Biennials, and Perennials. The term annual is applied to plants which flower and ripen their seeds the same season. Hardy annuals are those which may be sown in the open ground. Half hardy annuals are those which should be started in the house and transplanted to the garden. The term biennial is applied to plants which flower the second season after planting and then perish. The term perennial is applied to plants which flower the second season after planting, and continue to flower year after year.

ACROCLINIUM. (Everlasting) hhA Pretty Everlasting Flower, fine for winter bouquets. The flowers should be gathered when young.
Double White Pkt., .05
Double Pink Pkt., .05

ADONIS. Showy, popular border flowers, remaining a long time in bloom.

Aestivalis. "Flos Adonis." Flowers scarlet. Hardy annual. 1 ft. Pkt., .05

AGERATUM. (Floss-Flower.) hA. Blossom continuously throughout the summer. Highly prized for bedding out, and valuable for winter blooming indoors.

Imperial Dwarf. Dark blue. 9 in; good for edging. Pkt., .05

ALYSSUM. Very hardy, free blooming dwarf plants, all the varieties growing freely in common soil. The pretty, fragrant flowers are much prized for bouquets; excellent for the summer garden.

Saxatile Compactum. Yellow flowers; fine for borders. Perennial. Pkt., .05

Little Gem. White. They grow but three or four inches in height, very compact, of spreading growth, each plant often forming a circle a foot in diameter. Pkt., .05

Alyssum.

CHOICE FLOWER SEEDS—Continued

AMARANTHUS. Ornamental foliage. Very striking and effective decorative plants. Sow early and set out young plants early in June. Annual.

Tricolor. Mixed.—Carmine scarlet, splendid variety. 4 to 5 ft. Pkt., .05

ANTIRRHINUM. (Snapdragon.) Beautiful, hardy, free blooming plants for summer and fall. Flowers the first year from seed as annuals and should be treated as such. Average height, 1½ feet.

CHOICE FLOWER SEEDS—Continued

BALSAM. Beautiful plants for the summer garden. Of fine pyramidal form, thickly studded with large flowers of rich shades. They should be started early in heat and transplanted. We offer the finest strains in cultivation. Annuals.
Double Dwarf Mixed Pkt., .05

BELLIS *Perennis flore pleno*... Double Daisy. A favorite spring flowering perennial, producing charming effects when planted with Pansies, Forget-Me-Nots or Silene. They are easily raised from seed, flowering in autumn if sown in spring, although it is better to sow in July or August in cold frames and plant them out the following April.

Longfellow—Dark Rose Pkt., .05
Snowball—White Pkt., .05
Mixed Pkt., .05
California Daisy Pkt., .05

BROWALLIA. Elegant, free flowering, half-hardy annuals for house or garden; growing about eighteen inches in height, with Verbena-like flowers; excellent for cutting. Seeds started in July will give fine plants for winter blooming in the greenhouse for which they are valuable. For summer blooming they may be sown under glass in March, or in the open ground in May.

Finest Mixed Pkt., .05

CALENDULA. Vigorous, hardy, free-flowing annuals, with large, flat, double, flowers; valuable for growing in light soils, or dry situations. They are useful as cut flowers, and are frequently grown under glass during winter for cutting. 1 ft.

Meteor. Double orange yellow striped with primrose. Pkt., .05
Prince of Orange Pkt., .05
Double Mixed Pkt., .05

CALLIOPSIS or *Coreopsis*, Perennial Varieties. These frequently bloom the first year from seed sown in the spring; it is most satisfactory, however, to sow in July or August, protecting the plants with coarse straw or pine boughs during winter. They will flower profusely the following summer. Height, 2 ft. Mixed. Pkt., .05

CANDYTUFT. Showy hardy annuals, growing about a foot in height. Excellent for bouquets.

Carmine Pkt., .05
Lilac Pkt., .05
Empress White Pkt., .05
Mixed Pkt., .05

CANNA. Indian Shot. The luxuriant foliage and superb flower of the Cannas, especially of the new French and Italian races, easily places them foremost among our sub-tropical bedding plants.

Crozy's Newest Mixture Pkt., .05
Nigricans—Dark red foliage Pkt., .05

Candytuft

CARNATIONS—Marguerite—The earliest of all Carnations, blooming in July or August if sown in spring and continuing till frost. Being half-hardy perennials, a slight protection of coarse straw or pine boughs will preserve them during winter and they will flower profusely the next summer, or they may be potted to bloom during winter in the house. The flowers are large, about eighty per cent. usually coming double; beautifully fringed, and clove scented.

Carnations Marguerite

Giant White	Pkt., .10
Giant Rose	Pkt., .10
Giant Red	Pkt., .10
Giant Yellow	Pkt., .10
Giant Mixed	Pkt., .10

CELOSIA, or *Coxcomb*. Showy annuals of easy cultivation; producing large, brilliant, comb-like flower heads. They prefer a light soil, and should not be allowed to become crowded if a dwarf habit is desired.

Tall Mixed Pkt., .05

Centaurea Cyanus

CHOICE FLOWER SEEDS—Continued

CENTAUREA. Flowering Annuals. Imperialis—Giant Corn Flower. The flowers are of enormous size; fragrant, and of the most charming colors, including white, pink, lilac, rose and purple. They are among our best summer flowers for cutting.

Marguerite—White Pkt., .05
Cyanus—Bachelor's Button, mixed Pkt., .05

CHRYSANTHEMUM (Annual Varieties.)

Showy, hardy annuals of easiest cultivation and blooming early in summer. They are most desirable for seashore and mountain gardens. Height, 2 ft.

Double Yellow Pkt., .05
Double White Pkt., .05
Double Mixed Pkt., .05

COBOEA SCANDENS. A fine, rapid growing climber with handsome foliage and large, bell-shaped flowers, green at first, but rapidly changing to a beautiful, deep violet-blue. A well established plant will run about thirty feet in a season, covering a large veranda with handsome foliage and beautiful flowers. Tender perennial. Pkt., .05

COLEUS. Splendid bedding plants, with beautifully colored and handsomely marked foliage. They are easily raised from seed if kept in a warm temperature. Tender perennials.

Hybrida Mixed Pkt., .25

CONVOLVULUS MAJOR—Tall Morning Glory.

Finest Mixed Pkt., .05

CONVOLVULUS MINOR—Dwarf Morning Glory.

Finest Mixed Pkt., .05

Japanese Morning Glory Pkt., .05

COSMOS. This is one of our most useful and beautiful autumn flowers. To get it in bloom early, the seed should be sown in May in the open ground where the plants are desired to bloom, and the seedlings allowed to grow and flower without being transplanted.

Finest Mixed Pkt., .05

Cosmos

CYPRESS VINE. *Ipomoea Quamoclit.* Very graceful twining annuals with feathery dark green foliage and star like flowers. Twenty feet.

Scarlet Pkt., .05

DAHLIA. This popular flower can be easily raised from seed and flowered the same season. The roots should be placed in dry sand and kept in a cellar where there is no frost during the winter.

Hybrida Pleno Fine Double Mixed Pkt., .10
Single Mixed Pkt., .05

Chinese Pinks

DIANTHUS. *Chinensis* fl. pl. hP. Double Chinese Pinks. Finest Mixed. Pkt., .05

Heddewigii. (Japan Pinks.) hB. Single. First-class, selected. Mixed Pkt., .05

DOLICHOS LABLAB. (Hyacinth Bean.) Purple. 10 feet. Pkt., .05

ESCHSCHOLTZIA. California Poppy. The bright colors, long duration and dwarf habit of these free-blooming hardy annuals, admirably adapt them for massing and border planting. Height, 1 ft.

California—Yellow, orange center Pkt., .05

California Alba—White Pkt., .05

Mixed Pkt., .05

GOURDS. Luxuriant, climbing annuals, useful in covering arbors, fences or slopes, and bearing gourds which are of interesting forms and colors, 10 to 15 ft.

Mixed Pkt., .05

GYPHOPHILA. Infant's Breath. Free flowering, hardy plants; extremely light and graceful, easy of cultivation, and most useful for bouquet and cut-flower work. Height 18 inches.

Mixed Pkt., .05

CHOICE FLOWER SEEDS—Continued

HELIANTHUS. Sunflower. The large varieties are useful in forming backgrounds of large beds or borders and for distant effects, while the smaller sorts may be planted with scarlet *Salvia*, *Cannas* and other tall bedding plants, besides being excellent for cutting. Hardy annuals.

Diadem (New). Flowers beautiful light lemon with black center; of the greatest value for cut flowers. Pkt., .05
Double Mixed Pkt., .05

Helianthus

HELICHRYSUM. Everlasting Flower. Showy annuals for beds or borders; useful as dried flowers for winter bouquets, for which use the blooms should be cut before they are fully open, and hung up to dry with the flowers downward if stiff stems are desired. Height 2 ft.
Double Mixed Pkt., .05

Heliotrope

HELIOTROPE. Delightfully fragrant greenhouse perennial; excellent for bedding or indoor cultivation and particularly useful for cutting.

Giant. Newest large flowering varieties mixed. Pkt., .10

HOLLYHOCK. This ever popular hardy favorite of our gardens has few rivals in majestic grandeur. Hollyhocks succeed best in rich, well-drained soil. They should be lightly protected during winter with pine boughs, coarse straw or other mulch not liable to rot.

Seeds sown in July produce fine plants for blooming the following summer. Hardy biennials; 6 to 8 ft.

Chaters Strain. Double finest mixed. Pkt., .10

HUMULUS JAPONICA. Japanese Hop. Splendid annual climber of fast growth and very ornamental. 12 ft. Pkt., .05

KOCHIA TRICHOPHILA. (Standing or Summer Cypress.) Splendid ornamental annual of unusual quick growth, forming regular pyramids of about 3 ft. in height. The slender-leaved plants are of a cypress-like appearance during summer, changing their light-green foliage to carmine and blood-red colorings towards autumn; flowers small, scarlet. The plant also called "Burning Bush," is of great value when planted singly or in groups, as well as for pot culture. 3 ft. Pkt., .05

LARKSPUR. Splendid hardy annuals with showy flowers borne on long spikes; white, lilac, and all shades of blue; excellent for cutting. Height, 18 inches.

Double Tall. Branching or stock flower mixed. Pkt., .05

LAVENDER. Ornamental hardy perennial, bearing long spikes of very fragrant blue flowers. 18 inches. Pkt., .05

LOBELIA. The *Erinus* varieties are most valuable for edgings, hanging baskets and vases, blooming profusely from June till frost. **Lobelia Cardinalis** and its varieties are among our most brilliant autumn flowering perennials.

Crystal Palace Compacta. The darkest blue. Pkt., .05

Finest Mixed Pkt., .05

MARIGOLD. Tagetes. These handsome half-hardy annuals when well grown cannot be surpassed either in mixed borders or when grouped together. They succeed best in moderately rich soil and in open situations, and are strongly recommended where a gorgeous display in the autumn is an essential feature.
African—Double tall yellow . . Pkt., .05
African—Double tall mixed . . Pkt., .05
French—Double tall mixed . . . Pkt., .05

Mignonette

CHOICE FLOWER SEEDS—Continued

Forget-me-not.

MYOSOTIS—Forget-Me-Not. Dwarf, half-hardy perennials, bearing a profusion of little, star-shaped flowers. They thrive best in rather moist, shady situations. Most of them will bloom the first year from seed if sown early. If sown in July or August in shaded frames, fine plants will be obtained for spring blooming. They are very beautiful when planted in combination with late spring bulbs, Daisies Arabis or Golden Alyssum.

Palustris—True Forget-Me-Not. Dark blue, very beautiful; profuse flowering. Pkt., .05

MIGNONETTE. Reseda Odorata. The most fragrant annual, prized as much for forcing in winter as for the summer garden. The seed should be sown early and the plants as they grow, thinned sufficiently to allow them to branch. The beds should be liberally watered during dry weather.

Parson's White Pkt., .05
Machet, Red Pkt., .05
Bird's, Mammoth Mixed Pkt., .05

NICOTIANA Affinis—Annual.

Colossea—Magnificent foliage plant, the young leaves at first tinted with red. It soon attains a height of five or six feet, with leaves often two feet in length, and a foot in width. Excellent for foliage beds. Pkt., .10

Sylvestris. A splendid new variety with glaucous leaves and large pendants, pure white, tube-shaped flowers; a very stately plant. Pkt., .05

PAPAVEE, or Poppy. Annual varieties, showy hardy annual of easiest cultivation and embracing many rich and beautiful colors. The seed should be sown early in spring where intended to bloom.

Shirley—Finest mixed. A most charming race of single Poppies with shining flowers of silky texture, varying in color from pure white and delicate pink to rosy carmine and deep crimson; many of them being beautifully striped and edged with white. The blooms

if cut when young will keep in water for two or three days. Height, 2 ft. Pkt., .05
Double Carnation Mixed Pkt., .05
Oriental Deep Crimson Pkt., .05
White Swan Pkt., .05

NASTURTIIUMS—Dwarf varieties.

Tom Thumb, or Dwarf. These hardy annuals are of easiest cultivation; succeeding best in rather light soil, withstanding heat and drought and flowering profusely from June or July until cut down by severe frost usually well into November. The dark leaved varieties are particularly adapted for ribbon beds and borders, the brilliant flowers contrasting admirably with the bronzy red foliage. Height, 1 ft.

Finest Mixed. Our special mixture of the finest sorts, in great variety of color.

Pkg., .05; oz., .10; ¼ lb. .30

NASTURTIIUMS—Tall or Climbing.

Pkg., .05; oz., .10; ¼ lb. .30

Nasturtium

PHLOX DRUMMONDI. This is one of the finest annuals, being hardy, easy of cultivation and making as a summer bedding plant, an effective and brilliant display. The flowers are of long duration and of most gorgeous and varied colors. Height, 1 ft.

Finest Mixed—Splendid colors Pkt., .05

Grandiflora Finest Mixed. The flowers are of large size, finely rounded form, and with well defined eyes. The colors are superb.

Pkt., .10

CHOICE FLOWER SEEDS—Continued

Petunia

PETUNIA. The Petunia is popular because it is of easiest cultivation, blooms from early summer continuously until frost and is one of the most showy and free-growing annuals. Height, 12 to 15 inches.

Single Flowering Petunias

Hybrida—Finest Mixed Pkt., .10

Fimbriata—Fringed. Single Mixed Pkt., .15

Double Flowering Petunias

Double Fringed—Extra Large Pkt., .20

PORTULACA. Charming dwarf annuals for sunny situations or light soils, producing flowers of most brilliant colors in great profusion. Height 6 inches.

Grandiflora Plenissima—Double Mixed

Pkt., .05

Grandiflora—Fine Single Mixed

Pkt., .05

RHODANTHE. Half-hardy annuals with "Everlasting" flowers. They are beautiful for the open garden, or grown in pots for the conservatory. If required for winter use, as dried flowers, they should be cut before they are fully expanded. Height, 1 ft.

White Pkt., .05

Mixed Pkt., .05

RICINUS. Castor Oil Plant. Tender annuals of rapid and gigantic growth, producing enormous dark green or bronze-colored palmate leaves; excellent for sub-tropical beds, or for massive foliage effects on lawns or backgrounds.

Zanzibariensis. Mixed. A new and distinct race from East Africa, producing leaves of enormous size, varying in color from light green to purplish red. Height, 15 ft.

Pkt., .05

PANSIES

PANSY, or Heartsease. Too much importance cannot be attached to the culture of these beautiful plants, flowering as they do in great abundance for several months. When sown in the early spring a good display in most cases can be had in the following fall, but the best results are not obtained by so doing. To obtain fine blooms it is better to sow during summer and transplant the seedlings into cold frames in September, protecting during the winter with mats or shutters. Pansies delight in a cool, moist, well-drained soil, enriched with decomposed barnyard manure. They should never be allowed to suffer for want of water.

Blue and Purple

Captain of the Blues. Standard light maroon; wings light purple.

Navy Blue. Deep violet blue.

Variegated

Aurora. Flaked orange salmon; largest striped.

America. The brightest blood red striped.

Daybreak. Crimson scarlet on white ground.

Gray Friar. Beautiful watered purple on white ground.

Helen Pierce. Blue mottled on pure white.

Mrs. Joseph Chamberlain. Rose and white striped.

Princess of Wales. Striped mauve on white ground.

Lavender and Mauve

Countess of Radnor. Pale mauve standards, wings pale lilac, very fine.

Dorothy Tennant. Deep rosy mauve; beautiful.

Emily Eckford. Standard reddish mauve, wings blue.

White

Blanch Burpee. Pure white of superior substance, flowers large and finely formed.

Emily Henderson. A new pure white, largest of all and an excellent sort.

Sadie Burpee. White seed. Very large. Pure white.

Dorothy Eckford. Pure White.

Light Yellow

Mrs. Eckford. Delicate shade of primrose yellow.

Primrose. Color pale primrose approaching yellow.

Shades of Pink

Lovely. Large pink standard, delicate rose wings.

Hon. F. Bouverie. Standard flesh-pink, wings rosy buff.

Sybil Eckford. Pink and buff.

Prima Donna. Lovely pale pink. One of the finest.

Katherine Tracy. Soft but brilliant pink.

Gladys Unwin. Large, light pink.

Blanche Ferry. The popular pink and white.

Her Majesty. Beautiful rose color.

Painted Lady. Old popular pink and white, fiery shade.

Shades of Red

Red Riding Hood. Rosy pink, very fragrant.

Brilliant. Bright scarlet, fine form.

Firefly. Deep brilliant scarlet; truly a fiery shade.

White and Blue

Maid of Honor. White edged with blue.

Lottie Eckford. White, suffused with lavender.

Claret and Maroon

Boreatton. Very dark maroon self-colored.

Captivation. Beautiful claret color.

Waverly. Standards rosy claret, wings shaded blue.

CHOICE FLOWER SEEDS—Continued

SALPIGLOSSIS. Half-hardy annuals; elegant late summer flowering plants of great diversity in color; beautifully penciled in rich tints of yellow, purple, and brownish red. Of easy culture.

Grandiflora—Finest mixed . . . Pkt., .05

SALVIA. Flowering Sage. Very ornamental; flowers borne in spikes of fiery red, crimson or blue, and continue in bloom in open ground until after severe frosts. Start in heat and transplant into light soil one to two feet apart. Tender perennials, but bloom the first season. Height 2 ft. to 3 ft.

Splendens—Brilliant scarlet . . . Pkt., .10

Cocinea—Mixed . . . Pkt., .05

STOCK—Gilliflower. The charming colors, delightful fragrance and free-blooming character of the Stocks have made them favorite plants for both summer and winter cultivation. They are very effective for beds and borders, and their handsome spikes are invaluable for bouquets and floral decorations.

Large-Flowering Double Ten-Week Varieties. Highest grade, pot-grown seed. The best variety for early summer blooming, producing massive, pyramidal flower spikes of brilliant colors and delightful fragrance. Height 1 ft.

Lavender . . . Pkt., .10

Pink . . . Pkt., .10

White . . . Pkt., .10

Finest Mixed . . . Pkt., .10

SWEET WILLIAM. *Dianthus Barbatus.* Showy hardy biennials of easiest culture; admirable for clumps among shrubs or borders. Height, 18 inches.

Hunt's Perfection Mixed . . . Pkt., .05

VIRGINIA CREEPER. (or American Woodbine). Though a common native climb-

er this is one of the best plants for covering unsightly objects, or it may be easily trained into festoons of exceeding grace and beauty.

Pkt., .05

VERBENA. The Verbena is one of the most decorative and easily grown bedding plants. If started in heat in March the seedlings begin to bloom in June and continue until frost. Plants raised from seeds are stronger and flower more freely than those grown from cuttings. Half-hardy perennials. Height, 1 ft.

SUPERIOR VEGETABLE SEEDS

ASPARAGUS

German,—Gpargel.

French,—Asperge.

Spanish,—Esparragos.

One ounce for 60 feet of drill.

A convenient bed is about six feet wide, with a path two feet wide on each side. This will require six rows one foot apart, and a bed of that width 50 feet long will be ample for an ordinary family, requiring about one pound of seed. It will require about three years from the time of sowing until the bed is in full bearing, but once established, it is good for twenty years. It should be sown in drills one foot apart, and when the plants

are four or five inches high they should be thinned out so that the plants will be nine inches apart from each other in all the rows. Great care must be taken for the first year to keep down all weeds as soon as they appear, else they will choke up and destroy the young seedling Asparagus. The deeper the soil and the more manure used, the greater will be the crop.

Conover's Colossal. The best known, and one of the most desirable sorts. Pkt., .05; oz., .10; ¼ lb., .20; lb., .50.

Palmetto. Shoots are very large and light green, also tender and very desirable for the market and home garden. Very quick in growth, with close, round-topped shoots.

Pkt., .05; oz., .10; ¼ lb., .25; lb., .75

ASPARAGUS ROOTS

A saving of one to two years is effected by planting roots. Those offered below are strong, two-year-old roots, and the proper size for testing. These roots are not carried in stock but will be shipped direct from the growers. Prices on the following varieties will be quoted on application:

Columbia, Mammoth White, Conover's Colossal, Barr's Mammoth and Palmetto.

When in the city make our store your headquarters. Always glad to have strangers and others call and examine our Farm Implements. We carry the largest and most complete stock of any concern in New England.

We give no warranty, expressed or implied, but we buy our Seeds from reputable Seedsmen and we carefully test them before putting on the market. Goods not accepted on these terms must be returned at once, prepaid.

BEANS

Dwarf or Bush

German,—Bohnen. French,—Haricot.
Spanish,—Frijole nano.

One quart to 100 feet in drills or 150 hills;
two bushels to the acre, in drills.

A succession of sowing can be made from the first week in May until August. Plant in drills about two inches deep, and from eighteen inches to two feet apart, according to the richness of the soil; the poorer the soil the closer they can be planted. The seeds should be dropped about two inches apart.

Add .03 per pkg.; .08 per pt.; .16 per qt., if to be sent by mail.

Packets of all varieties, 5c each.

Wax Pod or Butter Varieties

Davis White Kidney Wax. Pods remarkably long, straight, and handsome, waxy white color; enormously productive; seed white.

Pt., .20; qt., .35; pk., \$1.75

Black German Wax. (Black Seed.) Very early; round, yellow pods; a well-known standard sort. Pt., .20; qt., .35; pk., \$1.75

Currie's Rust-proof Wax. Pods long, flat and straight, very productive and rust-proof; black seed. Pt., .20; qt., .35; pk., \$1.75

Wardwell's Dwarf Kidney Wax Bean. Hardy and productive, pods long, broad, flat and of a delicate waxy yellow, brittle and entirely stringless. The yield considerably exceeds that of the Common Golden Wax and is equally early. Pt., .20; qt., .35; pk., \$1.75.

Improved Golden Wax. Rust proof. An improvement on the old Golden Wax. The pod is somewhat round, meaty and entirely rust proof. Pt., .20; qt., .35; pk., \$1.75

Refugee Wax. A perfect Refugee with long, round, yellow, wax pods. Suitable for early or late planting, and an immense yield. Pt., .20; qt., .35; pk., \$1.75

Green Pod Varieties

Stringless Green Pod. The pods are green, not quite so round as Valentine and less curved. The pods are stringless—absolutely—this quality at once placing the variety at the top of the list among table beans.

Pt., .20; qt., .35; pk., \$1.75.

Long Yellow Six Weeks. Pods are long, flat, straight, green.

Pt., .20; qt., .35; pk., \$1.75

Early Bountiful. Of thrifty growth and very hardy. The stringless and tender flat green pods are produced very early in the season and the bush continues in bearing for a long time. It is practically a stringless

Early Yellow Six Weeks.

Pt., .15; qt., .25; pk., \$1.50

BEANS—Continued

Low's Champion. Very productive, with stringless, large green flat pods. Excellent either as a string or shell bean. Pt., .20; qt., .35; pk., \$2.25.

Dwarf Horticultural. The best shell bean for fine quality. Pt., .20; qt., .35; pk., \$1.75

Old-fashioned Yellow-eye Bean. An excellent field bean and much preferred to the Improved Yellow Eye as a baking bean. Pt., .15; qt., .25; pk., \$1.50.

Improved Yellow-eye Bean. An excellent field bean and very productive. Pt., .15; qt., .25; pk., \$1.50.

Red Kidney Bean. An easily raised bean and very productive. Also greatly prized by many for baking. Pt., .10; qt., .20; pk., \$1.25

LIMA

Burpee's Bush Lima. The only Bush form of the true large Lima. Bushes grow to eighteen inches in height and always erect. Pt., .20; qt., .35; pk., \$2.00.

Pole or Running

German,—Stangen Bohnen,
Spanish,—Judias.
French,—Haricot a Rames.

One quart to 150 hills; 10 to 12 quarts to the acre in drills.

These are more tender and require rather more care in culture than the Bush Beans, and should be sown two weeks later. They succeed best in sand loam, which should be liberally enriched with short manure in the hills, which are formed, according to the variety, from three to four feet apart. From five to six seeds are planted in each hill, about two inches deep. As the matured bean is used mostly, the season is too short for succession of crops in the North, though it is advantageous to plant succession crops in the Southern states, where the season of growth is often from March to November. Rough cedar or similar poles about seven or eight feet long should be used for Lima Beans to climb on. They should be set in the ground at least eighteen inches, so as to prevent being blown over.

Add .08 per pt.; .16 per qt., if to be sent by mail.

German Black Wax, or Indian Chief. A superb snap bean; pods yellow and stringless. Pt., .20; qt., .35; pk., \$2.00.

We supply all of our BEANS IN PACKETS at 5c each. Postage 3c extra.

Our Implements are worth looking over. We extend a cordial invitation to call and examine them. Be sure and ask to see the New Columbia Garden Seeder.

Horticultural or Cranberry. Showy and excellent, either as a snap or shell bean, or for cooking when dry. Pt., .20; qt., .35; pk., \$1.50.

King Horticultural. Pods bright carmine color; both beans and pods are much larger than the common kind. Pt., .20; qt., .35; pk., \$1.75.

Kentucky Wonder. An excellent green podded variety; enormously productive, the long pods hanging in great clusters along the entire vine. Seed dark brown; entirely stringless. Pt., .20; qt., .35; pk., \$1.75

Lazy Wife. One of the best of the later green-podded pole beans for snaps. The pods, borne in large clusters, are five to seven inches long, broad, thick, fleshy and entirely stringless. When young they have a rich, buttery flavor, which is retained until they are nearly ripe. The dry beans are excellent for winter use. Seed white. Pt., .20; qt., .35; pk., \$1.75

Red Cranberry Pole. A popular string or snap bean; very productive with large and tender pod. Pt., .20; qt., .35; pk., \$2.00

Lima, Early Jersey. One of the earliest. Pt., .20; qt., .35; pk., \$2.25.

BEET

German,—Runtel Rube.

French,—Betterave.

Spanish,—Beteraga.

A rather light soil, well enriched, is best suited to the cultivation of the various beets. The mangels and sugar beets in particular require very liberal manuring. For an early crop of table beets, sow the seed as early as the ground is in condition to work; light frosts will not injure the young plants. For a main crop sow the first of May; and for winter beets, the last of June. Sow in drills, 12 to 15 inches apart, and about one inch deep, pressing the earth firmly upon the seed,—a very important matter. Use about six pounds of seed per acre. Thin out when the plants are large enough. The varieties for table use should be left three or four inches apart.

Crosby's Egyptian. This variety is as early as the original Egyptian, but by careful selection has been made thicker and of better quality. Pkt., .05; oz., .10; $\frac{1}{4}$ lb., .25; lb., .90.

Detroit Dark Red Turnip. An excellent beet for bunching for market; tops exceptionally small and upright; roots turnip shaped with small tap root. Color of skin dark blood red; flesh bright red. Quality is of the best; sweet and tender. One of the best varieties for the market gardener and the home garden. Pkt., .05; oz., .10; $\frac{1}{4}$ lb., .25; lb., .85.

Dewing's Early. Of deep red color, smooth and of fine form. One of the leading varieties both for market and for family use. Pkt., .05; oz., .10; $\frac{1}{4}$ lb., .25; lb., .85.

Early Eclipse. Very early; dark-red color, small top, and free from fibrous roots.

Pkt., .05; oz., .10; $\frac{1}{4}$ lb., .25; lb., .85.

Edmand's. This variety is thoroughly fixed and uniform in type. The flesh is deep blood red in color, and exceedingly sweet and tender. It is round, smooth, of good market size, and does not grow over-large.

Pkt., .05; oz., .10; $\frac{1}{4}$ lb., .25; lb., .85.

Long Smooth Blood. A prolific variety; very dark in color; stands drought better than the turnip varieties. Pkt., .05; oz., .10; $\frac{1}{4}$ lb., .25; lb., .85.

Dirigo Extra Early. A rich, blood-red beet of fine grain and flavor and is earlier than either the Egyptian or the Eclipse.

Pkt., .05; oz., .10; $\frac{1}{4}$ lb., .25; lb., .85.

Haskell's Special Blood Turnip. We have a very fine strain of Blood Turnip Beet, of the Edmand's type. Very deep red fleshed so much in demand in all markets.

Pkt., .05; oz., .10; $\frac{1}{4}$ lb., .25; lb., .85.

Swiss Chard, or Silver Sea Kale. Used as greens, and the ribs of leaves cooked and served as asparagus. Pkt., .05; oz., .10; $\frac{1}{4}$ lb., .25; lb., .85.

MANGEL-WURZEL AND SUGAR BEETS

Sow in April or May, using eight to twelve pounds to the acre.

Price of all varieties except the Sludstrup and Eckendorf: Oz., .10; $\frac{1}{4}$ lb., .15; lb., .40.

Mangel Danish Sludstrup

Mangel Danish Sludstrup. Long Reddish Yellow. Grows well above the ground and easy to pull. More percentage of dry matter than in any known Mangel. Very heavy cropper. Considered by the Danish people the best Mangel in the world.

Price, Ounce, .10; Quarter lb., .20; Pound, .60.

Red Giant Eckendorf. Of cylindrical form and grows mostly above the surface. Has been known to yield as high as 58 tons to the acre.

Price, Ounce, .10; quarter pound, .20; pound, .50.

Lane's White Sugar. One of the best for feeding stock. Very sweet.

Vilmorin's Improved White Sugar. Very sweet, and keeps well. Much relished by stock.

Mangel-Wurzel, Norbiton Giant. A mammoth long-red variety, enormously productive, and keeps well; good for deep soils.

Mangel-Wurzel, Yellow Globe. Does better on shallow soils than the long varieties. An excellent keeper.

BEETS—Continued

Mangel-Wurzel, Golden Tankard. Flesh a deep, rich yellow; very sweet and nutritious. Half long in shape. A very heavy cropper.

Improved Mammoth Long Red. An improvement on the old variety. The roots are very large, uniformly straight and well formed; proportionately thicker, and are deeper colored than the common sort, and with smaller tops.

BRUSSELS SPROUTS

(Species of Cabbage; cultivation the same)

German,—Rofen-Kohl.

French,—Chou de Bruxelles.

Spanish,—Berza de Brusels.

One ounce will sow a bed of forty square feet, and produce about 3,000 plants.

This is a delicious vegetable, superior to either borecole or spinach. The small, cabbage-like heads which grow upon the stem are much improved by a moderate frost. Sow in hotbeds in March or April, and in the open ground in May; cultivate same as broccoli.

Dwarf Improved. Produces excellent, compact sprouts; very sure cropper. Pkt., .05; oz., .20; $\frac{1}{4}$ lb., .60.

CABBAGE

German,—Kopf-Kohl. French,—Chou Pomme. Spanish,—Berza.

One ounce of seed produces about 3,000 plants

Early varieties are grown from seed sown in hotbeds in February or March, only moderate bottom heat being required. Transplant into other frames without much, if any, bottom heat, as soon as the plants show the fourth leaf. In April, or as soon as the ground can be easily worked, set out in rows three feet apart, and about eighteen inches between the plants. The ground should be thoroughly stirred with cultivator and hoed every week till the plants cover the ground. For a fall crop, sow in the open ground in May, in hills the proper distance apart, using a liberal quantity of manure in the hill, beside that which is plowed in; thin out to one good plant in each hill. In the same way crops may be sown to lay in for the winter use, planting seed as late as July 1. Seeds can also be sown in shallow drills and, when the plants are large enough, can be transplanted, setting the plants in rows three feet apart and two feet apart in the row. If the young plants are troubled with the cabbage fly, sprinkle them with tobacco dust, air-slaked lime, slugshot or wood ashes, while the dew is on them. To keep off the cabbage worm, sprinkle with Dalmatian insect powder or slugshot.

Danish Ball Head

The wide and unfailing popularity of the Danish Ball Head cabbage is simply wonderful. It seems to adapt itself to all soils and conditions.

The leading characteristics of Danish Ball Head cabbage are: First, that it is a sure header; second, that it is of unapproachable solidity and weight; third, that it is an extra good keeper; and fourth, that it is a good seller.

It is a medium to late cabbage, but is generally grown as a late crop. It is sure to head, the heads being round, hard and extremely heavy, though not extra large. It can be grown in close quarters, on account of its compact habit. Pkt., .05; oz., .25; $\frac{1}{4}$ lb., .75; lb., \$2.50.

All Seasons. An early Drumhead, sure heading, solid variety. Desirable for early or fall use. Pkt., .05; oz., .20; $\frac{1}{4}$ lb., .60; lb., \$2.00.

Charleston Wakefield. Grows to a much larger size than the Jersey Wakefield. Very productive and a good shipping variety.

Pkt., .05; oz., .25; $\frac{1}{4}$ lb., .75; lb., \$2.50.

Mammoth Rock Red. The largest heading of any of the red sorts, of deep rich color, and excellent quality. Pkt., .05; oz., .25; $\frac{1}{4}$ lb., .75; lb., \$2.50.

Sure Head. A fine variety for main crop. A good shipper and sure header. Pkt., .05; oz., .20; $\frac{1}{4}$ lb., .60; lb., \$2.00.

Marblehead Mammoth. The largest heading cabbage of them all. Pkt., .05; oz., .20; $\frac{1}{4}$ lb., .60; lb., \$2.00.

Danish Summer Ball Head

Danish Summer Ball Head, extra. The heads of this cabbage are of a splendid shape and ready early in the season. It is very early, very large, very firm and heavy.

Pkt., .05; oz., .30; $\frac{1}{4}$ lb., .90; 1 lb., \$3.00.

Danish Roundhead Short-stemmed. This cabbage is recommended as the best ever offered. It embodies all the good qualities which growers ever worked up in cabbage, is large, hardy and splendid keeper.

Pkt., .05; oz., .25; $\frac{1}{4}$ lb., .75; 1 lb., \$2.50.

Warren's Stone Mason. An improvement on the Stone Mason Drumhead; heads rounder, firmer and earlier; is an extra good keeper. Pkt., .05; oz., .25; $\frac{1}{4}$ lb., .75; 1 lb., \$2.50.

Savoy Improved American. The finest flavored of all the cabbage family, large and solid. Pkt., .05; oz., .20; $\frac{1}{4}$ lb., .60; 1 lb., \$2.00.

Early Winningstadt. An early variety of excellent quality, not as early as the Wakefield. Pkt., .05; oz., .20; $\frac{1}{4}$ lb., .60; 1 lb., \$2.00.

Henderson's Early Summer. A standard summer variety. We have the true stock. Pkt., .05; oz., .20; $\frac{1}{4}$ lb., .60; 1 lb., \$2.00.

Fottler's Early Brunswick. An early fall variety well known and popular. Pkt., .05; oz., .20; $\frac{1}{4}$ lb., .60; 1 lb., \$2.00.

Early Jersey Wakefield. A standard early variety for home use or market. Pkt., .05; oz., .25; $\frac{1}{4}$ lb., .75; 1 lb., \$2.50.

Red Dutch. For pickling or for salads. Pkt., .05; oz., .25; $\frac{1}{4}$ lb., .75; 1 lb., \$2.50.

Succession. A sure-headed, long-keeping

variety, very similar to All Seasons but maturing a little later. Heads deep and very firm. Pkt., .05; oz., .20; $\frac{1}{4}$ lb., .60.

Enkhuizen Glory. A new Holland cabbage which originated at a large seed farm at Enkhuizen, Holland. It is an early cabbage, but still of large size; solid and of the best quality. It is one of the largest early cabbages we have seen, and may be set out as late as the last of July or first of August in this latitude, and will make large, fine heads for late fall or winter use. The great merit of this cabbage lies in the perfect uniformity of its growth. The plants are compact, and have few outside leaves, and can be planted close together, and will produce very large crops.

Pkt., .05; oz., .25; $\frac{1}{4}$ lb., .90.

CARROT

German,—Rohre.

French,—Carotte.

Spanish,—Zanahoria.

One ounce will sow 100 feet of drill; 3 pounds required for an acre.

Carrots require a very finely pulverized soil to grow them to perfection. A good, light and well-enriched sandy loam is the best for this crop. For field culture, sow in drills $2\frac{1}{2}$ feet apart, so as to cultivate by horse. Market gardeners sow in drills about 15 inches apart, and cultivate by hand. For early crops cover $\frac{1}{2}$ inch deep, and thin to 6 inches apart in the rows; for late, cover $\frac{3}{4}$ inch deep, and thin to 4 inches.

Oxheart Carrot

Danvers Half-Long. One of the heaviest croppers; roots dark orange color 8 to 10 inches in length, thick, and ending in a somewhat abrupt point; first class for all soils.

Pkt., .05; oz., .10; $\frac{1}{4}$ lb., .30.

Oxheart, or Guerande. Roots short and very thick, and intermediate between Scarlet Horn and Chantenay; color deep orange; fine grained. Pkt., .05; oz., .10; $\frac{1}{4}$ lb., .30.

Large White Belgian. Roots very large and smooth; grown exclusively for stock feeding. Grained.

Pkt., .05; oz., .10; $\frac{1}{4}$ lb., .25.

Improved Long Orange. The best known and most largely cultivated of any Carrot; excellent for stock or table use; roots deep orange, 12 to 15 inches long.

Pkt., .05; oz., .10; $\frac{1}{4}$ lb., .25.

CAULIFLOWER

German,—Blumenkohl. Spanish,—Coliflor.
French,—Chou-fleur.

One ounce of seed will produce 1,500 to 2,000 plants if sown in open ground, or about 3,000 in frames.

To raise good Cauliflower there is nothing so essential to success as good seed. The best Cauliflower seed is very expensive, but it is worth to the grower ten times as much as cheap and carelessly grown seeds. The best results are obtained from using Snowball for main late crop, as well as for early use.

Early Cauliflowers are difficult to raise and are not of the best quality but when the plants are set out in July and the heads form in October there is no difficulty in getting fine, large heads of first-class quality. The seed should be sown in open ground or cold frames about the middle of May or first of June, on good soil. When plants are large enough, transplant to rich, moist soil. These remarks refer to Snowball or other early kinds. The late kinds must be sown and transplanted earlier.

Henderson's Early Snowball. This is undoubtedly the finest ever introduced; it is the earliest, and produces beautiful snow-white heads of the most delicious flavor. The seed we offer is pure and genuine, and sure to prove satisfactory. Pkt., .20; oz., \$2.50.

Extra Selected Dwarf Early Erfurt. The finest strain of the Erfurt Cauliflower; almost as early as the Snowball; grows about 15 inches high producing very solid, pure white heads of the very finest quality; seldom fails to form a good-sized head. Pkt., .15; oz., \$2.00.

Danish Giant (Dry Weather). This superior strain originated in Denmark. It is about two weeks later than our Snowball; makes a larger head and is very resisting against unfavorable season and dry weather. We would suggest to our customers who have had trouble in raising other kinds of Cauliflower to give this variety a trial, as to our minds the chances of success with this Cauliflower is increased many fold over any other strain.

Pkt., .20; oz., \$2.50.

All kinds of Insecticides, Spray Pumps, Power Sprayers, etc., always on hand. Call and examine or write for catalogue and prices.

CELERY

German,—Sellerie French,—Celeri.
Spanish,—Apio.

One ounce of seed produces about 3,000 plants.

Sow seed the first of second week in April in hotbed or cold frame. As soon as the plants have attained a height of three inches, transplant, setting them four inches apart. In order to secure "stocky" plants cut off the tops once or twice before again transplanting into richly manured soil, in rows four or five feet apart, with plants eight inches apart. As fall approaches draw earth up to the plants, keeping the stalks well together. When well blanched it is ready for use. Some of the varieties, such as Golden Self-Blanching and White Plume, may be blanched by simply placing a board 12 to 15 inches wide on edge on each side of the row.

Boston Market. The best and most popular sort in cultivation.

Pkt., .05; oz., .30; ¼ lb., .75.

Giant Pascal. A strong grower and wonderful keeper, quality very fine.

Pkt., .05; oz., .20; ¼ lb., .50.

Golden Self-Blanching. A self-blanching early golden-colored variety that is very popular. Crop failed.

White Plume. A variety that can be more easily grown than any other as it does not require high banking to blanch the stalks. Simply earthing up enough to keep the stalks together or by passing a string around each plant is sufficient.

Pkt., .05; oz., .25; ¼ lb., .75.

Celeriac, or Turnip-rooted. The turnip-shaped roots of this variety are cooked and sliced and used with vinegar, making a most excellent salad.

Pkt., .05; oz., .15; ¼ lb., .50.

CHICORY

One ounce is sufficient for a bed of four square yards.

Large-Rooted or Coffee. Leaves when blanched make an excellent salad.

Pkt., .05; oz., .10; ¼ lb., .30.

CORN—Sugar

German,—Welfehkorn. French,—Mais.
Spanish,—Maiz.

One quart will plant 200 hills; 1 pk. will plant 1 acre in hills.

Corn requires a good soil and a warm situation. Commence for first early by planting the early varieties about May 1, and if a continuous supply is wanted all summer, make plantings about two weeks apart from May 1 until the last of July, first planting early varieties then later ones. Plant in rows 3 feet apart, and make the hills about the same distance apart in the rows. Five kernels in the hills are plenty. Cover about 1 inch deep for early and a little deeper for late. Thin to 3 plants in a hill. Add 5c per pt.; 10c per qt., if to be sent by mail.

CORN—Continued

Early Red Cory. This variety is the favorite for first early.

Pkt., .05; pt., .15; qt., .25; pk., \$1.50

White Cob Cory. This is an improvement over the Early Cory as the cob is white which gives it a finer appearance. It is as early as the Early Cory, and of excellent quality.

Pkt., .05; pt., .15; qt., .25; pk., \$1.50.

Crosby's Early. An early corn of large size and choice quality. It has long been a standard variety.

Pkt., .05; pt., .15; qt., .25; pk., \$1.75.

Stowell's Evergreen. The best late corn for all purposes. It has been a leader for many years as a main crop variety and is unexcelled as a market corn.

Pkt., .05; pt., .15; qt., .25; pk., \$1.75.

Country Gentleman. This is the finest of the medium late varieties. The rows are zig-zag with long slender kernel of delicious flavor.

Pkt., .05; pt., .15; qt., .25; pk., \$1.75.

Black Mexican. This corn when in condition for the table cooks remarkably white; but the ripe grain is black or bluish-black. It is surpassed by none in tenderness.

Pkt., .05; pt., .15; qt., .25; pk., \$1.75.

Golden Bantam. The fact that the grains of this variety are yellow is an indication of hardness and its value for early planting and early maturity. It is a rapid grower, and produces ears measuring about 5 inches, but the smallness of ears is fully made up by the deliciously sweet flavor and tender quality of

the corn when cooked. It is a fine variety for the home garden.

Pkt., .05; pt., .15; qt., .25; pk., \$1.75.

FIELD AND FODDER CORN

Prices will be quoted on application on the following corns. Please give the amount desired as well as the kind in all cases.

Southern White. A white variety that no silo owner or dairy farmer should overlook. It grows 12 to 16 feet high; has broad foliage and tender stocks. There is no better fodder to keep up the flow of milk during hot weather when the grass is burned up. Heavy cropper.

Leaming. An early very heavy long-eared corn. Grows to medium height with large amount of foliage. One of the best ensilage corns, very much relished by stock. Cob red; grain yellow.

Red Cob. A very large-growing white dent corn, with red cob. Fodder sweet, juicy and tender. Very popular in northern dairy districts.

Sanford. A well-known variety, adapted to the whole of New England. Kernels silvery white flint color; large and broad. An excellent fodder and ensilage corn.

Early Canada. An eight-rowed, yellow flint variety with small cob and deep grain. This is one of the earliest and best and seldom fails to produce a crop. The Early Canada seed we have to offer was grown in this State by the same party who has grown it for us for several years. From the fact that this corn matured in good shape last season it is sufficient evidence that it is Early and well adapted to this climate. The yield is also of the best, having a record of 103 bus. shelled corn to the acre.

Longfellow. An eight-rowed, yellow flint sort; ears average 10 to 15 inches. Large kernels and small cob. Particularly adapted to New England.

Stowell's Evergreen

Haskell's Prizetaker Corn

CORN—Continued

HASKELL'S PRIZETAKER CORN

This corn has fully maintained its past record as being the very best flint corn grown.

This corn showed a test of 12.2 per cent. protein, 5.51 fat, and 78.56 carbo-hydrates, which makes it the highest test corn from a food value of any of the known flints or dents. The germinating test of this will show fully 100 per cent.

On a recent test of this corn 70 pounds of ears made 63 pounds of shelled corn.

This also makes an exceptionally fine corn for an ensilage corn as it grows when planted for ensilage very rank, being 10 to 12 feet tall, and the stalks are very fine grain, making a much more profitable corn for ensilage than any of the dent varieties.

CHERVIL

One ounce will sow about 300 feet of drill. Cultivated like parsley. Sow thickly in May, in drills half an inch deep, one foot apart. Use while the leaves are young and tender.

Curled Chervil. The young leaves are used for garnishing, and flavoring soups.

Pkt., .05; oz., .10; ¼ lb., .25.

CORN SALAD OR FETTICUS

German,—Uckerfalat. French,—Mache.
Spanish,—Macha Valerianilla.

One ounce will sow 150 feet of drill.

Sow in September, in drills eight inches apart, covering the seeds lightly, and protect from frost by a light covering of hay or litter. The seed may also be sown in spring.

Large Green Cabbaging. A small, hardy salad; used also as a substitute for lettuce; can be sown in September, and wintered over same as spinach.

Pkt., .05; oz., .10; ¼ lb., .30.

CRESS OR PEPPERGRASS

German,—Areffe. French,—Cresson.
Spanish,—Masuerzo.

One ounce will sow 16 square feet, or 150 feet of drill.

A popular salad, which should be sown early in the spring—very thickly in shallow drills—and at short intervals, for success, as it soon runs to seed.

Extra Curled. A small plant, having a fine, pungent flavor, and used as a salad; may be cut two or three times.

Pkt., .05; oz., .10; ¼ lb., .20; lb., .50.

True Water Cress. Grows along the banks of ponds and streams, and is easily introduced; wholly unlike Extra Curled; leaves are quite large and thick; a fine salad, sold in immense quantities in the large markets in spring.

Pkt., .05; oz., .40; ¼ lb., \$1.25.

CUCUMBER

German,—Gurfe. French,—Concombre.
Spanish,—Pepino.

One ounce will plant 50 hills; 2 pounds will plant an acre.

Culture—For earliest use, sow the seed in the hotbed or greenhouse in February or March, in warm loam, where the temperature is about 90 degrees; cover half an inch deep, and when the plants are of fair size, transplant into hills (made in the greenhouse), four plants in a hill, so that when the weather permits the whole hill can be moved to the open ground by means of tins made for that purpose. Plant for general use in the open ground about June 1, in hills 6 feet apart each way, and thin to three plants in a hill. Fine old manure (about six cords per acre) is sufficient; or, better still, plant on land from which a crop has been taken, and which was heavily manured for that crop.

CUCUMBER—Continued

Davis Perfect. As now selected, this popular new variety is well worthy of praise. The long, even fruits are of fine form, with an intensely dark rich green skin. With very few seeds the solid white flesh is of superb quality for slicing. So handsome and regular are the fruits that they bring an extra price on market,—often being taken for “hot-house grown.” The vines are of strong growth and quite prolific.

Pkt., .05; oz., .10; $\frac{1}{4}$ lb., .50.

Extra Early Russian. Earliest variety known, hardy and productive, fruit very small and quality fine for pickling or slicing.

Pkt., .05; oz., .10; $\frac{1}{4}$ lb., .35.

Early Cluster. Fruit borne in pairs; light green, a great bearer.

Pkt., .05; oz., .10; $\frac{1}{4}$ lb., .35.

Early Frame or Short Green. An excellent sort, both for table use and for pickling. Plants very vigorous and productive. Fruit straight, a little smaller at the ends, bright green, lighter at the blossom end. Comes into use a little later than the Early Cluster and keeps green a long time. Our stock is very superior.

Pkt., .05; oz., .10; $\frac{1}{4}$ lb., .35.

Boston Pickling. Fruit short, smooth and pointed at each end, bright green and a great yielder, one of the best pickling.

Pkt., .05; oz., .10; $\frac{1}{4}$ lb., .35.

White Spine Improved. The most popular strain of White Spine, and for general outdoor culture the best.

Pkt., .05; oz., .10; $\frac{1}{4}$ lb., .35.

Long Green Improved. Fine for pickling when small, good for table use when about half grown.

Pkt., .05; oz., .10; $\frac{1}{4}$ lb., .35.

Japanese Climbing. Vines are extra strong and foliage much more vigorous than other kinds, and being a climbing sort, can be grown on trellises, etc., saving much valuable space in small gardens. It is very prolific, from forty to fifty cucumbers having been counted on single plants. Fruit cylindrical, about ten inches long, thick and of fine flavor.

Pkt., .05; oz., .15; $\frac{1}{4}$ lb., .50

DANDELION

German,—Lowenzahn. French,—Pissenlit.

Spanish,—Amargon.

One ounce will sow 100 feet of drill.

The Dandelion resembles endive, and affords one of the earliest as well as one of the most healthful of spring greens. Sow as early as the weather will permit, in good, well-enriched soil, in rows 12 inches apart, covering seed $\frac{1}{4}$ of an inch deep, and firming the soil well over them. Thin to two or three inches apart in the rows; by so doing the roots will be larger and a great amount of time will be saved the

White Spine Cucumber

DANDELION—Continued

next spring in trimming or gathering the crop. One pound per acre is sufficient.

Improved Thick-Leaved. Cultivated for spring greens; an immense improvement on the common Dandelion, both in size and thickness of its leaves and fine flavor, being far less bitter.

Pkt., .05; oz., .50; $\frac{1}{4}$ lb., \$1.75.

EGGPLANT

German,—Gierpanze. French,—Aubergine.
Spanish,—Berengena.

The Eggplant will thrive well in any good garden soil, but will repay good treatment. The seeds should be sown in hotbed or warm greenhouse in March or April, and when about an inch high potted in two-inch pots. Plant out about June 1, two and one-half feet apart.

New York Improved Purple. The leading market variety, and undoubtedly the best for size, quality and productiveness.

Pkt., .05; oz., .50; $\frac{1}{4}$ lb., \$1.50.

ENDIVE

German,—Gendive. French,—Chicoree.
Spanish,—Endivia.

One of the most refreshing and attractive of all autumn and winter salads. Sow seed from the middle of June until the end of August.

Green Curled. Beautifully curled, tender, and crisp.

Pkt., .05; oz., .15; $\frac{1}{4}$ lb., .50.

Moss Curled.—More finely curled, and a heavier and more dense plant than Green Curled.

Pkt., .05; oz., .15; $\frac{1}{4}$ lb., .50.

Broad-leaved Batavian (Escarolle). This variety is chiefly used in soups and stews; requires to be tied up in blanching.

Pkt., .05; oz., .15; $\frac{1}{4}$ lb., .50.

Kale

KALE OR BORECOLE

German,—Blatter-Kohl. French,—Chou Vert.
Spanish,—Breton.

One ounce will produce 3,000 plants.

Sow from the middle of April to the beginning of May in prepared beds; transplant in June, and treat in the same manner as for cabbage. Of all the cabbage tribe this is the most tender and delicate. The varieties are all extremely hardy, and are best when touched by frost.

Dwarf German Purple, or Brown Curled. Esteemed by Germans; very hardy and of fine quality; so handsome that it is frequently grown for ornament.

Pkt., .05; oz., .10; $\frac{1}{4}$ lb., .30.

Dwarf Green Curled Scotch. Rarely exceeding 18 inches in height, but spreading out under good cultivation to 3 feet in diameter; leaves beautifully curled and bright green.

Pkt., .05; oz., .10; $\frac{1}{4}$ lb., .30.

Tall Green Curled Scotch. Grows about two feet high; leaves dark green, curled and wrinkled; very hardy, and is improved by a light frost.

Pkt., .05; oz., .10; $\frac{1}{4}$ lb., .30.

KOHL RABI

German,—Rohl-Rab. French,—Chou-Rave.
Spanish,—Col de nabo.

One ounce will sow 200 feet of drill.

This vegetable, the popularity of which is rapidly increasing, combines the virtues of the turnip and cabbage, but excels both in nutritive, hardy and productive qualities. The seed may be sown in June in rows 18 inches apart, and the plants thinned out to eight or ten inches in the rows.

KOHL RABI—Continued

Early White Vienna. Best for general table use; flesh tender and white.

Pkt., .05; oz., .25; ¼ lb., .60.

Purple Vienna. A little later than the White; color bluish purple.

Pkt., .05; oz., .25; ¼ lb., .60.

Large Green or White.—Good for table and also for feeding stock.

Pkt., .05; oz., .25; ¼ lb., .60.

LEEK

German,—Lanch. French,—Poireau. Spanish,—Puerro.

One ounce will plant 200 feet of drill.

The leek is very hardy and easily cultivated; it succeeds best in a light but well-enriched soil. Sow as early in the spring as practicable in drills one inch deep and one foot apart. When six or eight inches high they may be transplanted in rows ten inches apart each way, as deep as possible, that the neck, being covered, may be blanched.

London Flag. Very popular with market gardeners.

Pkt., .05; oz., .15; ¼ lb., .50.

Broad American Flag. Large and superior to London Flag; popular with gardeners.

Pkt., .05; oz., .10; ¼ lb., .50.

LETTUCE

German,—Lattich. French,—Laitue. Spanish,—Lechuga.

One ounce will sow 100 square feet, or 120 feet of drill.

Requires a rich, moist soil, and to be crisp and tender needs to be grown in cool weather. For winter use, sow in hotbeds every two weeks, at the rate of one ounce of seed to four sashes (a sash is three feet long by six feet wide); cover very lightly, and transplant, first to three inches apart each way, afterward to eight inches. For garden or field, sow in rows, and cover, one-fourth of an inch deep, and thin out to twelve inches apart in the rows. For New England the White Seeded Tennisball for cultivation under glass, and the Black Seeded Tennisball for outdoor use, are the standard variety.

May King. Probably the finest all-seasons lettuce yet introduced. It is very early and

hardy, and will stand cold, damp weather better than many varieties. Planted out of doors or under glass it will produce fine solid heads much sooner than any other variety. Outer leaves are yellowish green, tinged with brown, while the inside is a rich yellow.

Pkt., .05; oz., .25; ¼ lb., .75; lb., \$2.00.

Big Boston. A most desirable variety, either for forcing in cold frames or open-ground planting; always produces large, solid, saleable eads. Pkt., .05; oz., .20; ¼ lb., .60.

Boston Curled. Of ordinary quality but great beauty; highly ornamental in growth, with its frilled leaves.

Pkt., .05; oz., .20; ¼ lb., .50.

Prize-Head Early. Leaves green and red, very thin, crisp and tender; one of the best for private use.

Pkt., .05; oz., .20; ¼ lb., .50.

Tennisball, Black-Seeded. A very popular sort for open-ground culture; forms a handsome head, and is crisp and tender.

Pkt., .05; oz., .20; ¼ lb., .50.

Tennisball, White Seeded. Extensively grown for forcing and heading under glass; heads firm and good size, very white and crisp.

Pkt., .05; oz., .15; ¼ lb., .40.

Simpson Black-Seeded. Nearly double the size of the Early Curled Simpson; leaves delicate golden yellow; superior variety for forcing or sowing out of doors.

Pkt., .05; oz., .15; ¼ lb., .30.

Simpson Early Curled (White Seed.) A leading early sort for forcing or open ground.

Pkt., .05; oz., .15; ¼ lb., .30.

Tomhannock. A variety with upright leaves, beautifully wrinkled; edges of outer leaves have reddish tinge; one of the best.

Pkt., .05; oz., .15; ¼ lb., .30.

Boston Market. One of the best for forcing under glass, as well as for outside use; forms fair-sized heads, edge of leaves slightly tinged with red.

Pkt., .05; oz., .20; ¼ lb., .50.

May King

There is a breezy farm paper named the "Furrow" which we want in your home. Send your name for our mailing list and four times a year it will be sent you FREE.

LETTUCE—Continued

Grand Rapids. An excellent forcing variety with loose heads and of good size and form. Pkt., .05; oz., .15; lb., .40.

Brown Dutch. Leaves large, thick, green, tinged with brown; forms large, solid heads; exceedingly hardy. Pkt., .05; oz., .15; ¼ lb., .50.

Hanscn. Large, solid heads; tender, crisp, and of fine flavor. Pkt., .05; oz., .15; ¼ lb., .40.

White Paris Cos. Has long, narrow, upright leaves; does not head, but when tied up blanches very nicely. Pkt., .05; oz., .15; ¼ lb., .40.

MELON, MUSK

German,—Melone. French,—Melon.

Spanish,—Melon.

One ounce will plant about 50 hills; 2 to 3 lbs. in hills per acre.

Melons thrive best in a light, rich soil. Plant early in May, when the ground has become warm and dry, in hills six feet apart each way for Muskmelons, eight feet for Watermelons. Previous to sowing the seed, mix a few shovelfuls of well-rotted manure in each hill, and plant in each twelve to fifteen seeds; after all danger of bugs is over, thin out to three plants per hill. When about one foot long, pinch off the tips to make them branch, as it strengthens the growth of the vines and makes the fruit mature earlier. Give plenty of water, and feed liquid manure occasionally. A few hills for early use may be had by sowing on pieces of sod in a hot-bed, and when warm enough transplant to open ground.

Emerald Gem Melon. The Emerald Gem is entirely unlike any other muskmelon yet introduced. The melons are about the size of the Netted Gem, but unlike that variety, the skin, while ribbed, is perfectly smooth, and of a very deep emerald green color. The flesh, which is thicker than any other native melon of the same size, is of a suffused salmon color, and ripens thoroughly to the thin green rind, which is distinctly defined. The flesh is peculiarly crystalline in appearance, and so very juicy, sweet and rich that it almost drops to pieces. It matures very early, and is quite productive.

Pkt., .05; oz., .10; ¼ lb., .50; lb., \$1.50.

Rocky Ford. This new Muskmelon is similar to the oval strain of Netted Gem. The strain here offered originated with the melon growers in the vicinity of Rocky Ford, Col., who have shipped this melon from that distant Western point to Eastern markets. The melons grown by them are so fine in quality as to outsell all others, and the demand for such melons has been far beyond the supply.

Pkt., .05; oz., .10; ¼ lb., .40; lb., \$1.25.

Long Yellow Musk. A long, large melon of peculiar musky flavor; a rich, yellow color both inside and out.

Pkt., .05; oz., .10; ¼ lb., .40; lb., \$1.25.

Early Hackensack. An improvement over the old Hackensack, producing melons of as good quality and ten days earlier. Large fruit, with thick, green flesh of the finest flavor.

Pkt., .05; oz., .10; ¼ lb., .40; lb., \$1.25.

MELON, WATER

German,—Waffermelone. French,—Melon d'Eau. Spanish,—Zandia.

One ounce will plant 50 hills.

Prices on all varieties of Watermelons as follows: .05 per pkt.; .10 per oz.; ¼ lb., .25; lb., .75.

Citron for Preserves. The old and well known Preserving Citron; seeds red.

New Florida Favorite. An improvement on the old Florida Favorite, growing to double the size and more prolific. Its perfect shape, bright red crisp flesh, and delicious flavor, make it one of the best melons grown.

MELONS Continued

Phinney's Early. This is another very early melon, earlier than the preceding; it is hardy and a sure cropper and extensively cultivated in the North.

Peerless or Ice Cream. Very early, flesh firm and sugary.

Cuban Queen. Very productive; flesh bright red, very solid, crispy and sugary.

MUSTARD

German,—Senf. French,—Moutarde.
Spanish,—Mostaza.

One ounce will sow 75 feet of drill.

As an ingredient, the green Mustard imparts a delightfully pungent flavor to the various forms of prepared salads. For early crops the seed may be sown in a hotbed in March, and for general crop at frequent intervals through the spring, in drills from eight to twelve inches apart.

White London. Considered the best for salads and spinach; leaves light green. It is best when about four inches high.

Pkt., .05; oz., .10; $\frac{1}{4}$ lb., .15.

Brown or Black. Pkt., .05; oz., .10; $\frac{1}{4}$ lb., .15.

OKRA OR GUMBO

German,—Ocher. French,—Gombo.
Spanish,—Cebolla.

One ounce will plant 100 hills.

This is an annual from the West Indies, cultivated from its green seed-pods, which are used in soups or stewed and served like asparagus. It is highly esteemed in the South for making gumbo soup. The pods when young and tender should be sliced in sections, strung on a thread and hung up in the shade to cure like dried apples; can be used for soup at any time.

Culture. Sow the seed thinly in dry, warm soil, in shallow drills two feet apart. After the plants are up, thin them out to nine inches apart; hoe frequently and draw a little earth to the stems as they grow. Gather the pods when quite green and about one and one-half inches long.

Long Green. Pods long, green and ribbed, and a heavy bearer. Pkt., .05; oz., .10; $\frac{1}{4}$ lb., .25.

White Velvet. Great improvement over the older varieties; pods larger, white, smooth, and a more abundant bearer; of superior quality.
Pkt., .05; oz., .10; $\frac{1}{4}$ lb., .30.

Weeders, Seeders and Garden Tools for the Market Gardeners are Specialties with us.
Call and examine same.

ONION

Select the clean, richest land on the farm for the Onion crop. If Onions were grown on the land the previous year, so much the better, but any good corn or potato land will do. Broadcast fifteen to twenty cords of fine well-rotted manure to the acre and plow not deeper than six inches; harrow thoroughly, cross plow, and harrow again, after which, hand rake with wood rake and remove stones and rubbish. Sow four to five pounds of seed per acre in drills twelve to fourteen inches apart and about one-half inch deep. See that the Seed Drill is equipped with a good roller, that will press the earth firmly upon the seed. Sow as early in the spring as the ground can be properly worked. There is seldom necessity for thinning Onions if the land has been properly manured and seeded. After the Onions are three to four inches high, an application of about five hundred pounds to the acre of fertilizer, rich in available nitrogen, strewn between the rows, will be very beneficial. Keep the Onions growing by never allowing the weeds to get ahead and the acre should produce, in a good average season, five hundred to seven hundred bushels. When the tops are down, the Onions may be pulled and left on the ground, and should be frequently turned with a wooden rake, until tops are dried.

Yellow Globe Danvers. Undoubtedly the best known and most popular of all onions; the earliest yellow variety; is entirely free from stiff necks. Globular in shape; has a small top. It is the most productive, producing as high as one thousand bushels per acre, and will average on good soil with proper

We buy our **ONION SETS** from the largest grower in the country and know that we have as fine a lot as can be obtained.

ONION—Continued

culture five to seven hundred bushels.

Pkt., .05; oz., .20; ¼ lb., .60; lb., \$2.00.

Yellow Globe Danvers, our **Finest Strain**. This is the product of years of careful selection, and is the most perfect type of the Yellow Globe Danvers Onion which intelligent, painstaking care can produce. It is immeasurably superior to the average seed offered, not only in shape and color, but in productiveness. Pkt., .05; oz., .25; ¼ lb., .75; lb., \$2.50.

Large Red Wethersfield. We have a very fine and select strain of this sort. Color is deep purplish red, flesh white, moderately grained and very firm. Yields enormously and is one of the best winter keeping onions.

Pkt., .05; oz., .25; ¼ lb., .75; lb., \$2.50.

White Portugal, or **Silverskin**. A large flat, white onion of mild and pleasant flavor; hard and fine-grained, and a good keeper. Extensively sown for sets, and is also largely grown for pickling. Pkt., .05; oz., .25; ¼ lb., .75; lb., \$2.50.

Southport Red Globe. The onions from Southport, Conn., generally command an extra price in New York markets, because of their beautiful shape and color, due partly to the variety grown and partly to the favorable soil and the extra care taken in handling the crop. Pkt., .05; oz., .25; ¼ lb., .75; lb., \$2.50.

Prize-Taker. A globe-shaped variety of delicate straw color, growing to a very large size. It ripens up hard and firm, the flesh being pure white, fine grained and of mild, delicate flavor. Pkt., .05; oz., .25; ¼ lb., .75; lb., \$2.50.

ONION SETS

Potato Onion Sets . . .	qt. .20; pk. \$1.25
Red Bottom Sets . . .	qt. .25; pk. \$1.25
White Bottom Sets . . .	qt. .25; pk. \$1.25
Yellow Bottom Sets . . .	qt. .25; pk. \$1.25
Top Sets	qt. .20; pk. \$1.00

Onion Sets should be planted as early in the spring as convenient to obtain early green onions, but they may be set at any time up to June 1. Set in rows a foot apart, and three to four inches between them in the row. Any good soil will suit them. When grown in quantity, high cultivation is given in order to forward the crop for an early market. They are ready for use as soon as the bulbs begin to be of fair size. Those not used in green condition will ripen early in July and make nice onions. Potato and Top Onions are grown from bulbs only.

PARSLEY

German,—Peterfile. French,—Persil.
Spanish,—Perejil.

One ounce for 150 feet of drills.

Parsley succeeds best in rich, mellow soil. As the seed germinates very slowly, it should be sown early in spring, previously soaking the seed for a few hours in tepid water. Sow thickly in rows a foot apart and half an inch deep.

Champion Moss Curled. The standard variety. Pkt., .05; oz., .10; ¼ lb., .25; lb., .75.

Extra Curled Dwarf. Leaves finely cut, very early and bright green; desirable for either the home or market garden. Pkt., .05; oz., .10; ¼ lb., .25; lb., .75.

PARSNIP

German,—Pastinake. French,—Panaïs.
Spanish,—Pastinaca.

One quart for 75 feet of drill; one to two bushels in drills for an acre.

Sow as early in spring as the weather will admit, drills fifteen inches apart, covering half an inch deep. When well up thin out to five or six inches apart in the rows. Unlike carrots, they are improved by frost, and it is usual to take up in fall a certain quantity for winter use, leaving the rest in the ground till spring, to be dug as required.

Prices on all varieties of parsnips as follows:
Pkt., .05; oz., .10; ¼ lb., .20; prices in quantity on application.

Abbott's Improved. Hollow Crown. Smooth and quite large; fine sort.

Guernsey. Roots not quite so long as Hollow Crown, but of greater diameter and more easily gathered.

PEAS

German,—Erbren. French,—Pois.
Spanish,—Guizante.

One quart for 75 feet of drill; one to two bushels in drills for an acre.

Peas come earliest to maturity in light, rich soil. For general crop, a deep loam or a soil strongly inclining to clay is best. For early crops decomposed leaves or leaf-mold should be used; or, if the soil is very poor, strong manure may be used. For general crops a good dressing should be applied, and for the dwarf-growing kinds the soil can hardly be too rich. When grown as a market crop, peas are never staked; for private use, they are generally sown in double rows, and the tall varieties staked up by brush. For an early crop sow as soon as the ground can be worked, and make repeated sowings every two weeks for succession. After the first of June sowing should be discontinued until the middle of August, when a good crop may sometimes be secured by sowing an extra-early sort for fall use.

If sent by mail add .08 per pt.; .16 per qt. extra.

All marked thus (*) indicate wrinkled varieties.

Extra Early Dwarf Varieties

***Bliss American Wonder.** An old variety, but still highly prized for its flavor and quality. Of dwarf, robust habit, growing twelve to fifteen inches in height, and bearing an abundance of good-sized, well-filled pods.

Pt., .15; qt., .30; pk., \$2.00.

***Sutton's Excelsior.** Ripens early on vines fourteen to sixteen inches high, covered with a great abundance of long, straight, broad pods of a pale-green color. Price: Pt., .15; qt., .30; pk., \$2.25.

***Premium Gem.** A fine-flavored dwarf, wrinkled variety; height, eighteen inches.

Pt., .15; qt., .25; pk., \$1.75.

***Nott's Excelsior.** This is the earliest dwarf wrinkled pea. The plant is dwarf and needs no support. The pods are of good size and well filled with large peas of the finest quality. It is as early as the American Wonder, while the vines are much more productive and the pods of larger size. There is no better early dwarf pea. Fifteen inches.

Pt., .15; qt., .30; pk., \$2.00.

Every person planting peas should have one of our Garden Seeders. Send for description circular and prices, or if possible call at our store and examine them.

Sutton's Excelsior

Extra Early Varieties Not Dwarf

Alaska. An extra early round pea bearing pods of a dark green color; two feet.

Pt., .15; qt., .25; pk., \$1.75.

***Gradus, or Prosperity.** No new variety of peas has ever met with the favor and sale as the "Gradus" has since its introduction in America several years ago. It combines the finest quality with extreme earliness, and is also productive, bearing pods fully as large as Telephone. The color of the shelled peas is a beautiful light green, which color they retain after being cooked; the quality and flavor are delicious, and the peas remain tender and sweet for a long time.

Pt., .15; qt., .30; pk., \$2.25.

***Thomas Laxton.** One of the very best of the tall growing large pod early peas. The plant is a very hardy and strong grower, producing extra large size pods in abundance. The quality is delicious, and cannot be surpassed by any other variety. The "Thomas Laxton" will mature nearly as early as any of the extra early smooth peas, and being a wrinkled sort is much sweeter.

Pt., .15; qt., .30; pk., \$2.25.

Thomas Laxton

PEAS—Continued

Second Early Varieties

***Heroine.** One of the very best late kinds. Very long pods well filled with deliciously sweet dark green peas. Two feet.

Pt., .15; qt., .25; pk., \$1.75.

***Telephone.** A pea of the finest quality, sweet and delicious. Medium late, growing four feet tall with pods of the largest size.

Pt., .15; qt., .30; pk., \$1.75.

***Yorkshire Hero.** Bears large, well filled pods on stocky, vigorous vines. A first-class late pea. Two feet.

Pt., .15; qt., .25; pk., \$1.60.

***Bliss Everbearing.** Medium late and very productive two feet tall.

Pt., .15; qt., .25; pk., \$1.60.

***Haskell's Dark Green Pod Pea.** Immense pods of the style of the Telephone. A very superior wrinkled pea of quick and robust habit of growth. Pods are very deep green, averaging five to six inches in length and are borne in great abundance. The peas have a peculiarly pleasing flavor sure to satisfy all lovers of this most delicious vegetable. Haskell's Dark Green Pod is a medium late variety growing from three and one-half to four feet in height.

Pt., .15; qt., .30; pk., \$1.75.

***Duke of Albany or American Champion.** Very fine, large pods and peas of finest quality. Medium late three feet.

Pt., .15; qt., .30; pk., \$2.00.

***Dwarf Champion.** Possesses all the merits of the reliable Champion of England. A hardy robust grower producing dark green pods of good size and in great abundance. Quality excellent.

Pt., .15; qt., .25; pk., \$1.65.

***Dwarf Telephone. (Carter's Daisy).** Similar to the Tall Telephone except in the height of the vine, which is only about two feet.

Pt., .15; qt., .30; pk., \$1.75.

***Admiral Dewey.** An enormous cropper; peas very large and sweet.

Pt., .15; qt., .30; pk., \$2.00.

Late Varieties for General Crop

***Champion of England.** The standard for quality. Grows four feet tall, very prolific, and still one of the best late peas.

Pt., .15; qt., .25; pk., \$1.60.

***Improved Stratagem.** A very large, fine pea growing about twenty inches tall, strong and stocky. Late.

Pt., .15; qt., .30; pk., \$2.00.

Mammoth Melting Sugar. (Edible pods.) Large broad pods, very brittle and entirely stringless. Height four feet.

Pt., .25; qt., .50.

White Marrowfat. A good late sort. Cultivated very extensively for the summer crop.

Pt., .10; qt., .15; pk., \$1.15.

Black-Eyed Marrowfat. An old and standard late variety for garden or field use.

Pt., .10; qt., .15; pk., \$1.15.

Canada Field. Seeds small, white; for field culture only; largely used for sowing among oats.

Bu., \$2.50.

PEPPER

German,—Pfeffer.

French,—Piment.

Spanish,—Pimiento.

One ounce will produce 2,000 plants.

Grown largely for pickles. Sow in hotbeds early in April, and transplant to the open ground when the weather is favorable. They should be planted in warm mellow soil in rows 18 inches apart. They may also be sown in the open ground when danger of frost is past.

Large Bell, or Bull Nose. A favorite and well-known pickling sort; is early, large, mild and thick-skinned.

Pkt., .05; oz., .25.

Long Red Cayenne. A small, long, bright red sort, very productive; extremely strong and pungent.

Pkt., .05; oz., .35.

We will have a fine assortment of

SEED POTATOES

in many of the common sorts and all are from selected stock. Ask for quotations.

POTATOES

While there are many varieties of potatoes which claim the public favor, we have included in our stock only a few and these we know to be the best in cultivation. All our potatoes are grown from selected stock in Maine and being of a uniform size are calculated to give the best results when used in a planter. Write for prices and descriptions on

Green Mountain,	Norcross,
Irish Cobbler,	Early Rose and
Gold Coin,	Early Six Weeks,
Early Harvest,	New Queen.

PUMPKIN

German,—Kurbis.	French,—Poitron.
Spanish,—Calabaza.	

One ounce will plant 20 hills.

Pumpkins are grown chiefly as food for stock. The usual method of planting is to scatter a few seeds at intervals in the hills when planting Indian corn; in this way good

crops of Pumpkins are secured with slight labor and expense, and make a valuable addition to the season's crops.

Connecticut Field. The common yellow pumpkin, grown chiefly for feeding stock.

Oz., .05; $\frac{1}{4}$ lb., .15; lb., .40.

Large Cheese or Kentucky Field. A most popular variety. Fruit flattened, the diameter being two or three times more than the length.

Oz., .05; $\frac{1}{4}$ lb., .10; lb., .40.

Sweet, or Sugar. A small variety, fine-grained and sweet; the best for table use.

Oz., .05; $\frac{1}{4}$ lb., .20; lb., .60.

RADISH

German,—Rettig, Rabies.

Spanish,—Rabano.

French,—Radis, Rave, Petite Rave.

One ounce will sow 100 feet of drill.

Culture. The soil for Radishes should be very rich, light and mellow, well broken by digging as their tender and mild qualities depend much upon their rapid growth. For very early use sow in hotbeds in February and March and in the open air as soon as the ground can be worked, at intervals of ten or twelve days for a succession as long as they may be wanted. The winter varieties should be sown in August, lifted before severe frost, and stored in the cellar.

Vick's Scarlet Globe Radish. A leader among bright round Red Radishes. Quick maturing, extremely attractive, short tops, solid and fine flavor.

Pkt., .05; oz., .10; $\frac{1}{4}$ lb., .25; lb., .75.

Early Scarlet Turnip, White Tipped. One of the handsomest of the turnip radishes and a great favorite in many large markets for early planting outdoors. It is but little later than the White Tipped Forcing, and will give entire satisfaction where extreme earliness is not the primary object. Roots slightly flattened on the under side; color, very deep scarlet with a white tip; flesh white and of the best quality.

Pkt., .05; oz., .10; $\frac{1}{4}$ lb., .25; lb., .75.

Long Scarlet. Short top. The standard variety of the long sorts, used either for forcing or open culture; six or seven inches long.

Pkt., .05; oz., .10; $\frac{1}{4}$ lb., .20; lb., .50.

Chartier. Decidedly distinct in appearance from any radish in cultivation. The color at the top being crimson, running into pink about the middle, and from thence downward it is a pure waxy white. It will attain a very large size before it becomes unfit for the table.

Pkt., .05; oz., .10; $\frac{1}{4}$ lb., .25; lb., .75.

RADISH—Continued

French Breakfast. Olive-shaped scarlet, with white tip; crisp and tender. Very early. A general favorite.

Pkt., .05; oz., .10; $\frac{1}{4}$ lb., .25; lb., .75.

Early Scarlet Turnip. A well known and popular variety. Small top of quick growth, mild and crisp.

Pkt., .05; oz., .10; $\frac{1}{4}$ lb., .25; lb., .75.

Non Plus Ultra. One of the earliest forcing radishes, being ready for the table in three weeks from planting. Roots round and bright scarlet, crisp and delicate.

Pkt., .05; oz., .10; $\frac{1}{4}$ lb., .25; lb., .75.

China Rose. Bright rose-colored skin; flesh white and quality excellent; one of the best for fall and winter use.

Pkt., .05; oz., .10; $\frac{1}{4}$ lb., .25; lb., .75.

Long White Vienna. Of rapid growth and beautiful shape; skin and flesh snow-white. The finest of long white radishes.

Pkt., .05; oz., .10; $\frac{1}{4}$ lb., .25; lb., .75.

Long Black Spanish. Long, black, flesh white and slightly pungent; one of the latest and hardiest.

Pkt., .05; oz., .10; $\frac{1}{4}$ lb., .25; lb., .75.

Round Black Spanish. Skin black; white fleshed and piquant flavor.

Pkt., .05; oz., .10; $\frac{1}{4}$ lb., .25; lb., .75.

SALSIFY OR OYSTER PLANT

German,—Bocksbart. French,—Salsifis.
Spanish,—Ostra vegetal.

One ounce will sow 50 feet of drill.

Culture. Sow the seed in light deep soil, early in the spring, in drills twelve inches apart and one inch deep, thinning out the

young plants to four or five inches. The roots will be ready for use in October, when a supply should be taken up and stored, like carrots. Those remaining will suffer no injury by being left in the ground till spring but should be dug up before commencing their growth.

Mammoth Sandwich Island. We consider this the largest and most profitable salsify in cultivation; roots are two to three times the size of the ordinary salsify and of more agreeable flavor. It is pure white in color and invaluable to market gardeners.

Pkt., .05; oz., .20; $\frac{1}{4}$ lb., .50.

SPINACH

German,—Spinat. French,—Espinard.
Spanish,—Espinaca.

One ounce for 100 feet of drill; 10 to 12 pounds in drills for an acre.

This is a very important crop in our market gardens, and is one of the most easily managed of all vegetables requiring but little culture, and may be had fit for use the entire season. The main crop is sown in September. It is sometimes covered up in exposed places with straw or salt hay during winter, which prevents it from being cut with frost; but in sheltered fields there is no necessity for covering. For summer use it may be sown at intervals of two or three weeks from April to August. Spinach is best developed and most tender when grown in rich soil.

Prices on all varieties as follows:

Pkt., .05; oz., .10; $\frac{1}{4}$ lb., .15; lb., .35.

Giant Thick Leaf. This variety gives the best results. The leaves are large, thick and somewhat crumpled, and it is equally good for spring or autumn sowing.

SIMPLEX SEPARATOR

Cannot be beaten. The easiest running, cleanest skimming, simplest in construction and less work to clean of any machine on the market.

Send for Special Catalogue if interested in the best machine to be had.

SPINACH—Continued

Bloodsdales Savoy-Leaved. A heavy cropper of fine quality and very hardy; succulent leaves, curled and wrinkled like a Savoy cabbage; hardiest and most productive sort.

Victoria. A variety with heavy, broad, dark green leaves. Valuable for spring sowing.

New Zealand. A valuable variety for the garden as it produces the thick, tender leaves throughout the summer. Grows very large and luxuriantly in warm, rich soil.

Long Standing Thick Leaved. Stands longest before running to seed; dark green.

SQUASH

German,—Kurbiss. French,—Courge.
Spanish,—Calabaza.

One ounce Early will plant 50 hills; one ounce Marrow, 25 hills.

Culture. The plants are very tender and sensitive to cold, and planting must be delayed until settled warm weather. The general principles of culture are the same as those given for cucumbers and melons, but the plants are less particular as to soil. The summer varieties should be planted four feet apart each way, and the winter sorts eight feet. Three plants are sufficient for a hill. Care should be taken not to break the stems from the squashes intended for winter use, as the slightest injury will increase the liability to decay.

Delicious. We have found this squash all that the originator claims for it. It is the driest, sweetest and finest flavored squash we have ever tasted; a fall and winter squash and is a good keeper.

Pkg., .05; oz., .10; ¼ lb., .30; lb., \$1.00.

Bay State. Has a hard green shell; good for fall and winter use.

Pkg., .05; oz., .10; ¼ lb., .25; lb., .75.

Boston Marrow. Fine fall variety; oval, bright orange; flesh yellow and firm; best for pies, and also for canning.

Pkg., .05; oz., .10; ¼ lb., .25; lb., .75.

Improved Marblehead. Resembles the Hubbard but is earlier; has a gray, hard shell; a very popular winter sort.

Pkt., .05; oz., .10; ¼ lb., .25; lb., .75.

Early White Bush Scalloped. A standard summer variety; good either for home or market garden.

Pkg., .05; oz., .10; ¼ lb., .25; lb., .75.

Essex Hybrid, or Hard-Shelled Turban. A standard winter sort; flesh a trifle darker than the Hubbard; an excellent keeper.

Pkg., .05; oz., .10; ¼ lb., .30; lb., \$1.00.

Giant Summer Crookneck. Double the size of the ordinary Crookneck and very warty but similar in other respects. Their handsome appearance commands an extra price in the market.

Pkg., .05; oz., .10; ¼ lb., .30; lb., \$1.00.

Winter Crookneck. An excellent-keeping Crookneck variety, lasting several months. Yellow skin and a well-known squash.

Pkg., .05; oz., .10; ¼ lb., .30; lb., \$1.00.

Improved Hubbard. The well-known and standard late variety; our strain is excellent.

Pkg., .05; oz., .10; ¼ lb., .30; lb., \$1.00.

Golden Hubbard. A genuine Hubbard Squash except in color, which is a bright red; quality excellent.

Oz., .10; ¼ lb., .30; lb., \$1.00.

Warted Hubbard. A superior strain of mammoth size, and entirely covered with warty excrescences. Rich dark-green color, and of very best quality.

Pkg., .05; oz., .10; ¼ lb., .30; lb., \$1.00.

Call and examine our new Columbia Seeder with Fertilizer attachment. If unable to call send for special circular.

GASOLINE ENGINES, WINDMILLS AND PUMPS

Will surely interest you. By the use of a windmill, or gasoline engine, at a very small expense, every Farmer can have running water in his buildings. Write us in regard to same or better still, call and examine our line.

Special catalogues on water systems can be had for the asking.

SUNFLOWER

Mammoth Russian. The standard large-growing variety, which is used largely for feeding poultry.

Pkt., .05; $\frac{1}{4}$ lb., .10; lb., .20.

TOMATO

German,—Liebsapfel. French,—Tomate. Spanish,—Tomate.

In this latitude to produce extra early tomatoes the seed should be planted in the hotbed about the middle of February, in drills five inches apart, and not over one-half inch deep. When the plants are two inches high they should be transplanted three to four inches apart, and when about four inches high should again be transplanted; this time about

Dwarf Champion

Stone Tomato

five inches apart. Again they should be transplanted about the middle of April into moderately warm beds or frames, and should not be nearer than eight inches. The final transplanting to the open ground may be made the last of May, when the plants should be fine, large and stocky, and if sufficient soil is taken up with each plant they will keep right on growing with no setback.

For ordinary plants, sow the seed early in March, and transplant, once in the hotbed and from hotbed into cold frames about four inches apart. The last of May they will be ready for the open ground where the Dwarf varieties should be planted $3\frac{1}{2}$ feet apart and the spreading varieties 4 to $4\frac{1}{2}$ feet apart.

Dwarf Champion. Dwarf and strong habit of growth; very solid and of extra quality.

Pkt., .05; oz., .25; $\frac{1}{4}$ lb., .5.

Earliana. It is remarkable for its earliness, very large size, handsome shape and bright red color. Its solidity and fine qualities are equal to the best medium and late sorts.

Pkt., .05; oz., .30; $\frac{1}{4}$ lb., \$1.00.

Livingston's Favorite. Smoother than the Paragon is a darker red than the Perfection; ripens evenly, and is as early as any good variety.

Pkt., .05; oz., .25; $\frac{1}{4}$ lb., .75.

Livingston's Beauty. Very glossy, crimson in color, slight tinge of purple; early, free from rot; skin tough, bears handling remarkably well.

Pkt., .05; oz., .25; $\frac{1}{4}$ lb., .75.

Ponderosa. Very large, solid and of a good flavor. Specimens have been grown to weigh four pounds. Bright red. Very few seeds.

Pkt., .05; oz., .25; $\frac{1}{4}$ lb., .75.

Stone. Fruit very large and deep; bright scarlet, smooth, ripening evenly to the stem, without a crack; exceedingly solid and firm-fleshed, of the finest quality; one of the best for family use and for canneries. Late.

Pkt., .05; oz., .25; $\frac{1}{4}$ lb., .75.

TOMATO—Continued

Acme. (Early). Well-known and generally cultivated. Smooth, and ripens evenly; color purplish red.

Pkt., .05; oz., .25; $\frac{1}{4}$ lb., .75.

Matchless. Very large smooth, solid and fine flavor. Cardinal red.

Pkt., .05; oz., .25; $\frac{1}{4}$ lb., .75.

Essex Hybrid. A very early sort, color bright pink; large size, solid, rich flavored; very productive; fine market variety.

Pkt., .05; oz., .25; $\frac{1}{4}$ lb., .75.

June Pink. An early variety, similar in habit to the famous Earliana, differing only in its color, which is pink instead of red. Early, blight resisting, long and heavy yielding. An excellent shipper on account of its reasonably tough skin.

Pkt., .05; oz., .25; $\frac{1}{4}$ lb., .75.

Chalk's Early Jewel. This is a very productive variety, ripens nearly as early as Spark's Earliana, but is more desirable for home use as the fruits are thicker through and more solid; borne in large clusters. Color bright scarlet and quality good.

Pkt., .05; oz., .25; $\frac{1}{4}$ lb., .75.

TOBACCO

Connecticut Seed-Leaf. Best adapted for the climate of the Northern and Middle States.

Pkt., .05; oz., .30.

TURNIP

German,—Steckrube. French,—Navet.
Spanish,—Nabo Comun.

Turnips may be sown at all seasons from April to August in our climate, although those will be the best which are sown very early in spring for summer crops, and early in August for a fall and winter crop. A light soil, well manured the previous year, is the best, a few hundred pounds per acre of quick-acting fertilizer will have a tendency to make the roots smooth, and to make the rapid growth so essential in producing sweet and palatable Turnips.

Ruta Bagas, or Swedes should be planted from the last of June to about July 10, as they require more time in which to mature than the Early or Strap Leaf varieties. Newly-turned sod will produce the sweetest and smoothest turnips.

Extra Early Purple Top Milan. (Flat.) The earliest turnip in cultivation and a splendid variety; favorite with gardeners who want first turnips in market. Bulb white, flat, of medium size, with a bright purple top; one of the sweetest and finest flavored of summer sorts.

Pkt., .05; oz., .10; $\frac{1}{4}$ lb., .20; lb., .65.

Extra Early White Milan. This is one of our most popular turnips for spring sowing; it is a splendid extra early turnip in which the extreme earliness, small top and taproot

of the Purple Top Milan is united with clear white skin and flesh.

Pkt., .05; oz., .10; $\frac{1}{4}$ lb., .25; lb., .75.

Purple Top Strap Leaf. Rapid grower and mild flavor. The most popular variety for early use, either for the table or stock.

Pkt., .05; oz., .10; $\frac{1}{4}$ lb., .20; lb., .50.

Yellow Stone. A very popular yellow-fleshed variety; fine for table use. Flesh very firm, tender, sweet and fine flavored; an excellent keeper.

Pkt., .05; oz., .10; $\frac{1}{4}$ lb., .20; lb., .50.

White Egg. Belongs to the class of quick-growing fall turnips, and for this purpose should be sown in this latitude between August 10 and 25. Its shape is nearly oval or egg, as its name would indicate.

Pkt., .05; oz., .10; $\frac{1}{4}$ lb., .20; lb., .50.

RUTA BAGA OR SWEDISH TURNIP

Rutabaga Bangholm. Oblong, globular shaped, with very small neck, yellow flesh, very dark purple top, superior to all other Swedes. One of the very heaviest croppers.

Oz., .05; $\frac{1}{4}$ lb., .15; lb., .45.

Long Island Purple (Skirving's). Undoubtedly the finest variety of purple-top Ruta Baga. Leaves few and small; bulbs fine shaped with very short, small necks; purple crown, skin and flesh bright yellow, solid, sweet and mild flavor.

Oz., .05; $\frac{1}{4}$ lb., .15; lb., .40.

White Sweet German. Sweet, and fine flavor. Good keeper.

Oz., .05; $\frac{1}{4}$ lb., .15; lb., .40.

Imperial Hardy Swede. Claimed by many to be the best Swede turnip grown. Bulb of large size with purple crown; flesh yellow; very smooth and a heavy cropper.

Oz., .05; $\frac{1}{4}$ lb., .15; lb., .40.

SWEET, POT AND MEDICINAL HERBS

These are of easy cultivation. As a rule it is best to cut herbs when in flower, wilt in the sun and thoroughly dry in the shade.

Anise. Hardy annual	Pkt. .05; oz. .10
Balm. Hardy, herbaceous, perennial	Pkt. .05; oz. .25
Caraway. Hardy bi-annual	Pkt. .05; oz. .10
Coriander. Hardy annual	Pkt. .05; oz. .10
Catnip. Perennial	Pkt. .05; oz. .25
Dill. Biennial	Pkt. .05; oz. .10
Horehound. Perennial	Pkt. .05; oz. .20
Marjoram. Sweet, annual	Pkt. .05; oz. .15
Rosemary. Perennial	Pkt. .05; oz. .25
Rue. Perennial	Pkt. .05; oz. .15
Sage. Hardy perennial	Pkt. .05; oz. .15
Saffron. Annual	Pkt. .05; oz. .15
Summer Savory. Hardy annual	Pkt. .05; oz. .15
Winter Savory. Perennial	Pkt. .05; oz. .15
Thyme. Hardy Perennial	Pkt. .05; oz. .25
Wormwood. Perennial	Pkt. .05; oz. .25

VEGETABLE AND FLOWER PLANTS

We have in their season a choice assortment of both vegetable and flower plants.

TOMATO PLANTS. Essex Hybrid, Dwarf Champion, Chalk's Jewel, Earliana, etc.

CABBAGE PLANTS. All Seasons, Stone Mason, Drumhead, Danish, Ball Head, Early Summer, etc.

CAULIFLOWER. Snowball.

CELERY. Giant Pascal, Boston Market, White Plume.

FLOWER PLANTS. Pansies, Geraniums, Verbenas, Stocks, Salvia, Asters.

Our Plants are all grown for us locally and are hardy and vigorous. Prices as low as can be made and furnish good strong, healthy plants.

BIRD SEED

Add. 8c per lb. for postage. Prices subject to variations of the Market.

Canary. Sicily. Selected.	Lb., .10.
Hemp. Russian. First quality.	Lb., .10.
Rape. German.	Lb., .08.
Sunflower. Russian.	Lb., .08.
Millet.	Lb., .04.
Cuttlefish.	Lb., .40.
Unhulled Rice.	Lb., .08.

TABLE

Showing Weight per Bushel, also Quantities sown per acre of Grass, Grain and Vegetable Seeds

	Weight per Bushel	Quantity Usually Sown per acre
Timothy,	45 lbs.	½ bu.
Clover, Red,	60 lbs.	10 to 20 lbs.
Clover, Alsike,	60 lbs.	10 to 15 lbs.
Clover, White,	60 lbs.	10 to 15 lbs.
Clover, Crimson,	60 lbs.	10 to 15 lbs.
Clover, Alfalfa,	60 lbs.	15 to 20 lbs.

Beans, Fancy,	60 lbs.	1½ bu.
Peas, Smooth,	60 lbs.	1½ to 3 bu.
Peas, Wrinkled, measured bushel	1¼	to 2 bu.

We are general agents for the OHIO CUTTER for Ensilage and Dry Fodder, and shall carry in stock a line equipped with elevators, enclosed steel carriers and blowers. Send for Special Catalog.

GRASSES and GRAINS

NOTE—Owing to the frequent changes in price of Grains and Grasses, we have refrained from inserting prices of them in this catalogue. The lowest market price will be quoted on application.

Northern Grown Grass Seeds

SPECIAL ATTENTION

Though we trust you will give your careful attention to the vegetable section of our seed catalog, we do not want to overlook that part treating on Northern Grown Grass Seeds.

While we carry several grades of the different varieties of seeds, we recommend our Purity Brand as the very best the market affords. These seeds are strictly Northern grown, and are selected by us because they possess the two essential qualities of purity and vitality. It is well known that there have been large quantities of Grass and Clover Seed sold as pure, which official analysis have shown to contain large percentages of adulteration. This not only defrauds the planter by selling him a worse than useless article, but inflicts injury also by filling his land with noxious weeds. We list Grass and Clover Seeds according to their quality, grading down from our Purity Brand, which is always the best.

Again we call your attention to the following pages, hoping that our grass-seed business may be of mutual advantage to us both.

TIMOTHY, CLOVERS, MILLETS, RED TOP

in several grades

LAWN SEEDS

Our own mixture, from the purest seeds obtainable

We make a specialty of GRASS SEEDS, and while we carry several grades from PURITY BRAND down we always recommend the best, our

PURITY BRAND

We can surely please you on this brand

HINTS ON MAKING HAY

About Cutting, Curing and Storing

Value of Hay Crop

The value of the hay crop to the farmer and especially to the stock feeder is not expressed by what it will bring on the market.

Aside from the market value there is the feeding value and the manureal value both of which cannot be computed in dollars and cents.

Growing grasses supply humus to the land and some supply nitrogen, a valuable fertilizing element.

The feeding value is the one most influenced by the method of harvesting. Too early or too late cutting, too much exposure to sun and rain, destroys more or less of the value as a feed.

To save this loss is the object of careful methods of making hay.

When to Cut

The first thing is to know when to cut the different varieties of hay. If cut too early, there is a loss of weight and nutrients. If cut too late, there is a loss in digestible nutrients and palatability.

In the case of clover and alfalfa, any delay in cutting produces a shrinkage in the succeeding crop. Alfalfa produces from two to four crops each season and when each crop is

ready it should be harvested without delay.

It is best to cut alfalfa when the blossoms are about one-third out. At this time the plant possesses the greatest amount of digestible nutrients and if properly cured has no equal as a forage.

Clover should be cut when coming into full bloom, at which time a few of the heads are beginning to turn brown.

If cut before this time, the clover will be hard to cure. If cut later, many of the leaves will fall off and much of the feeding value be lost.

The whole crop of either clover or alfalfa should be handled within a few days. Where large quantities are grown, it is advisable to use machines of large capacity in order to rush the work.

Timothy makes the best hay if cut when going out of bloom. If cut in full bloom, the blossoms will tend to make the hay dusty.

Cow peas make good hay when cut about the time the pods begin to appear.

Grains like wheat and oats should be cut for hay when the stalks first begin to turn yellow near the ground.

The time for cutting mixed crops like timothy and clover should be determined by the condition of the one which predominates.

CHOICE GRASS SEEDS FOR LAWN AND FARM

MISCELLANEOUS GRASSES

Orchard Grass. Grown in shady places for hay, and in wooded upland pastures. Sow thirty to thirty-eight pounds to the acre.

Kentucky Blue Grass. For lawns and pastures. Sow thirty to forty pounds per acre.

English Blue Grass, Meadow Fescue. For wet or shaded. Sow thirty to forty pounds per acre.

English Rye Grass. For pastures and lawns, wet or shaded. Sow thirty to forty pounds per acre.

Wood Meadow. For pastures and lawns, wet lawns, wet or shaded. Sow thirty to forty pounds per acre.

Rhode Island Bent. For pastures and lawns of light, loamy soil. Sow thirty to forty pounds per acre.

Meadow Oat Grass. For hay or upland pastures. Sow forty to fifty pounds per acre.

Sheep's Fescue. For sheep pastures. Sow thirty to forty pounds per acre.

Crested Dog's Tail. A strong, heady grass for dry upland playgrounds, lawns or golf links. Sow thirty to forty pounds per acre.

Sweet Vernal. Annual. Used in lawn mixtures.

LAWN SEEDS

We can confidently recommend our Lawn Grass Seed as being unexcelled for the purpose of making a new and permanent lawn, which will retain its rich green color and velvety appearance throughout the entire summer and fall.

In making a new lawn, primary expense

should be deemed secondary to ultimate effect. We offer strictly high-grade mixture of the purest seed obtainable, entirely free from weeds and foreign seeds, at reasonable prices.

To obtain satisfactory results we recommend sowing at the rate of eighty pounds per acre.

Purity Brand. Lb., 35c.

Prime Brand. A very good mixture for lawns composed of high-grade seeds.

Lb., .25; 100 lbs., \$20.00.

TIMOTHY

Purity Brand. The average farmer when he seeds down his grassland buys the Timothy his country dealer has to sell, which is usually anything from a third to a tenth grade, and may be very good or very poor. Our Purity Brand of Timothy, like our Purity Brand of Red Top, is the very best obtainable, and was found to be 99.8 per cent. pure by the last official analysis.

Fancy. A very fine grade but does not analyze quite as pure as our Purity Brand.

Best Prime. Much better than Prime commonly sold.

RED TOP

Purity Brand. This is the very best grade of Red Top to be found at any price. A recent State analysis of same pronounces it 98 per cent. pure.

Choice. This is a very close second to our Purity Brand.

Prime. This is a clean and handsome seed showing a high percentage of purity.

CLOVERS

RED CLOVER

Our **Purity Brand** of Red Clover is a Northern-grown seed, very large, well colored, and the purest obtainable. Frequent analysis of this brand pronounce it about 100 per cent. pure. Lower grades at lower prices.

Mammoth Pea-Vine Clover. Similar to Red Clover, but makes a larger growth with heavier stock. Sow eight to ten pounds per acre.

WHITE CLOVER

Purity Brand. Selected especially for Lawns.

Prime. For lawns and pastures.

ALSIKE

It is usually sown with other seeds for hay; a valuable fertilizer if plowed under when in full bloom. Productive and sweet. An excellent honey plant for bees. Sow eight to ten pounds per acre.

Purity Brand. This is in the same class with our **Purity Brand** Red Clover, and analyzes nearly as high.

Prime. High grade but not as pure as **Purity Brand**.

ALFALFA CLOVER

Alfalfa or Lucerne Clover yields a very heavy crop; it is grown successfully in the West and Middle West, and by liming properly drained soil is yielding most satisfactory results in New England, and when well started will endure most severe droughts.

Purity Brand. This is a pure Alfalfa seed which has been developed in Montana, and without doubt is the most hardy of any yet offered in the United States.

CRIMSON CLOVER

Crimson. (Scarlet or Italian.) Grown in pastures and for turning under. Very deep rooting. Sow ten to fifteen pounds per acre.

MILLETS

Hungarian. Used for hay and forage. Sow forty to fifty pounds per acre between the first and middle of June. Yields heavily and when well cured is excellent hay for cattle, increasing the flow of milk.

Japanese. This grows very tall, yielding heavily, and the demand for it is increasing rapidly. Sow thirty-five to fifty pounds per acre. Excellent for silo.

Siberian. Very similar to the Hungarian, maturing about the same time, but leaves are

unusually wide and tender, starting close to the ground, continuing nearly to the top of the stem, yielding more heavily, making it in many respects preferable to other millets. Sow twenty to twenty-five pounds per acre.

German or Golden. (Southern Grown.) It has become an established fact that seed of German Millet grown in the Southern States will produce a much larger yield of forage or hay than will seed grown in the North or Northwest, and we advise our customers to buy the Southern-grown seed, although the cost is, as a rule, a little higher.

GRAINS

Prices subject to Market Changes

Barley, Fancy No. 1, Montana Two-Rowed.
Barley, Beardless.

Seed Oats, No. 1, Montana choice.

Spring Rye. Best Northern grown.

Winter Rye. New England grown.

Spring Wheat. Northern grown.

Winter Wheat. Northern grown.

Buckwheat.

MISCELLANEOUS SEEDS

Prices subject to Market Changes

For growing Fodder and Fertilizing Crops.

Canada Field Peas. The old standard variety for sowing with Oats for green fodder. Very valuable also as pigeon feed.

Dwarf Essex Rape. Excellent for pasturing for sheep or hogs, also for soiling.

Vetches or Tares. Sand, Hairy or Winter. A very hardy plant, growing well on the poorest of sandy soil. When mature it reaches a height of about 3 feet and if cut for forage as soon as full grown and before setting seed, it will start up again and grow a second crop as large as the first.

Sunflower, Mammoth Russian. Used to some extent for ensilage. Plant with ensilage corn 3 or 4 pounds to the acre.

MONTANA OATS

OUR PURITY BRAND of Montana White Oats is the heaviest cropper we have ever known and yields from 10 to 20 per cent. more oat and straw than any other seed oat we have seen.

MONTANA BARLEY

THE PURITY BRAND of Montana Barley which we carry produces large nearly white berries and is a very heavy yielder. This Barley has been growing rapidly in popularity the past few years and we have the highest quality of seed to be found. Samples and prices will be sent on application.

HUBBARD'S

Bone and Blood Fertilizers. The Great Crop Producers

There are so many goods being manufactured today in the cheapest possible way, that we can demonstrate to your satisfaction the superiority of this brand. They cost more to make than others because the ammonia is derived from blood, fish, sulphate of ammonia, nitrate of soda and tankage, and not from ground leather, scrap, hoof meal, hair and similar insoluble forms of ammonia. The Phosphoric Acid used in Hubbard's Fertilizer is derived from dissolved bone instead of dissolved rock, and in consequence is more valuable. The Potash is derived from High Grade Muriate and Sulphate.

HUBBARD'S ESTABLISHED BRANDS

We enumerate herewith a list of the brands carried by us, showing their guaranteed analysis. The actual analysis has exceeded these figures.

HUBBARD'S SPECIAL POTATO

For Irish and Sweet Potatoes, Cabbage, Onions, etc.

GUARANTEED ANALYSIS

Nitrogen 3.28 per cent.
Equivalent to Ammonia 4.00 per cent.
Available Phosphoric Acid ... 6.00 per cent.
Potash (Soluble in Water) ... 10.00 per cent.
Ammonia derived from fish, bone tankage, blood, nitrate of soda and sulphate of ammonia.

Phosphoric Acid from dissolved bone.
Potash from high grade muriate and sulphate.

B. B. AND P. BLOOD, BONE and POTASH

Manufactured especially for the growing of potatoes in New England, and which has given the best of satisfaction. Equally good for cabbage, peas, beans, onions, melons and other vegetables. Also used as a top dressing for grass land.

ANALYSIS

Nitrogen 3.28 per cent.
Ammonia 4.00 per cent.
Available Phosphoric Acid ... 8.00 per cent.
Potash (Soluble in Water) ... 7.00 per cent.
Ammonia derived from bone tankage, blood, nitrate of soda and fish.

Phosphoric acid from dissolved bone.
Potash from muriate of potash and high-grade sulphate.

HUBBARD'S 10 PER CENT. POTASH GUANO

An especially good seller for potatoes in this section of the State.

Nitrogen Analysis 2.45 per cent.
Ammonia 3.00 per cent.
Available Phosphoric Acid ... 6.00 per cent.
Potash (Soluble in Water) ... 10.00 per cent.
Ammonia derived from fish, bone tankage, blood, nitrate of soda and sulphate of ammonia.

Phosphoric acid from dissolved bone.
Potash from high grade muriate and sulphate.

ROYAL ENSIGN

A high-grade fertilizer especially for the growing of sweet corn. Also excellent for cabbage, peas, beans, tomatoes, tobacco, wheat, oats, barley and grass.

ANALYSIS

Nitrogen 2.46 per cent.
Ammonia 3.00 per cent.
Available Phosphoric Acid ... 8.00 per cent.
Potash (Soluble in Water) 4.00 per cent.

Ammonia derived from bone tankage, blood, fish and nitrate of soda.

Phosphoric acid from dissolved bone.
Potash from high grade muriate and sulphate.

FARMER'S I. X. L.

For tomatoes, cabbage, corn, potatoes and other vegetables. One of the best for seeding down.

ANALYSIS

Nitrogen 1.64 per cent.
Ammonia 2.00 per cent.
Available Phosphoric Acid ... 8.00 per cent.
Potash (Soluble in Water) 2.00 per cent.

Ammonia derived from bone tankage, blood, fish and nitrate of soda.

Phosphoric acid from dissolved bone.
Potash from high-grade sulphate.

SOLUBLE BONE AND POTASH

For corn, wheat, rye, oats, barley and grass

ANALYSIS

Available Phosphoric Acid ... 10.00 per cent.
Potash (Soluble in Water) 2.00 per cent.

Phosphoric acid derived from high grade Tennessee and Florida pebble rock.

Potash from high grade muriate and sulphate.

Fertilizers and Chemicals

(Continued)

AGRICULTURAL LIME

Is your land sour? Does it yield poorly? Is it worn out? Then apply **R-E Agricultural Lime**, manufactured by Rockland-Rockport Lime Co., Rockland, Me.

Prepared especially for farmer's use, put up in jute sacks. It is ready for immediate use, no slacking being required. It will keep indefinitely in a dry place, and is fine and uniform, so that it can be applied with a spreader if desired. Lime neutralizes the acid, causes clay soils to become more pliable, and sandy soil to become more compact. Lime by itself will not sustain fertility, but increases the efficiency of fertilizers which may be applied. Price: Per ton \$8.50. Per 100 lbs., .50.

PREPARED BORDEAU LIME

It is exactly right for the purpose, and is ready for immediate use, and there is no waste. Requires no slacking or preparation of any sort, hence a great saving of time and labor. Will keep any length of time without deterioration.

Per ton \$14.00. Per bg. 40 lbs., .35.

BEST OF GROUND PLASTER

Price 100 lb. Bgs., .65 hd., \$10.50 Ton.

Price 200 lb. Bgs., .62½ hd., \$10.00 Ton.

BOWKER'S AMMONIATED FOOD FOR FLOWERS

A dressing made especially for plants grown in the home, garden or conservatory. Clean, odorless and producing early and abundant blossoms of rich and brilliant color, and healthy, luxuriant plants, free from vermin.

No. 1 package, sufficient for thirty ordinary-sized plants for three months, 15c. No. 2 package, sufficient for thirty ordinary-sized plants for one year 25c.

HIGH GRADE CHEMICALS

Chloride of Lime
Sulphate of Copper
Sulphur
Pine Tar
Lye or Potash
Sulphate of Iron
Coal Tar
Tobacco Stems

Nitrate of Soda
Muriate of Potash
Sulphate of Ammonia
Kainit
Dissolved Bone Black
Plain Superphosphate
Tankage
Fine-Grained Bone
Sulphate of Potash

To persons desirous of mixing their own fertilizers we are able to quote very favorable prices in either bag, ton or car lots. We also guarantee our chemicals to be true to analysis and to be none better on the market.

STERLINGWORTH LAWN COMPOUND

Kills the Weeds but not the Grass, and Makes the Lawn Green and Velvety

It is a dry powder to be sprinkled over the lawn and weeds when they are dry. It adheres to the rough, broad surfaces of such weeds as plantain, dandelions, chickweed, and all other weeds having a broad, hairy surface and soon destroys them. It does not stick or lodge on the grass owing to its upright position and smooth surface.

One pound will dress 100 to 200 square feet, depending on the condition of the lawns. Each package gives full particulars for use.

Price. 5-lb. cans, 60c; 10-lb. cans, \$1.00; 50-lb. kegs, \$4.00; 100-lb. kegs, \$7.50.

STERLINGWORTH PLANT TABLETS

A NEW INVIGORATOR FOR HOUSE PLANTS AND VEGETABLES

STERLINGWORTH PLANT TABLETS are a clean, odorless, concentrated, plant stimulant and invigorator. Their use promotes healthy, vigorous leaves and branches, and insures beautiful, luxuriant flowers. They build up the soil scientifically, and make frequent renewal of soil less important. The large amounts of waste matter in what is commonly known as "liquid manure," and "bone plant foods," which pollute the soil, and are many times accompanied by disagreeable odors, are absent in these excellent stimulating tablets. If you want luxuriant, healthy plants, ferns and beautiful flowers, these tablets are just what you are looking for.

PRICES: Large box (250 tablets) sufficient for 35 plants 8 months, 50c postpaid medium, (100 tablets) sufficient for 35 plants 3 months, 25c postpaid; trial size, 10c.

INSECTICIDES and FUNGICIDES

SPRAY CALENDAR

APPLE—Scab—Use Formula No. 8 before the flower buds open, repeat just after the flowers fall. If the orchard is badly infected, repeat at intervals of three weeks with two more sprayings.

Bitter Rot—Use Formula No. 5 about the middle of June, or if it has not previously been serious, spray when the disease appears. Give two or three other sprayings at intervals of about three weeks.

Canker Worm, Codling Moth, Curculic, and other Biting Insect—Use Formula No. 2.

Leaf Curl—Use Formula No. 5 or No. 8 when the trees are dormant.

San Jose Scale—Use Formula No. 8 when the trees are dormant.

PEARS—Scab and Leaf Spot—See under Apple.

RASPBERRY, BLACKBERRY and DEWBERRY—Anthracnose—Cut out all infected canes in the Spring and use Formula No. 5 before the buds open. Spray again at intervals using the same formula. As the fruit ripens use Formula No. 9.

STRAWBERRY—Mildew—Use Formula No. 5 at first sign of disease.

Rust—Use Formula No. 5 before the buds open. Formula No. 9 before the fruit ripens. After fruiting apply with Formula No. 5 again as may be needed.

POTATO—Blight, Rot and Beetle—Use Formula No. 2 or No. 4 when either appears and again at intervals of ten days as long as either is prevalent. The Bordeaux Mixture is for the Blight and Rot, and the Arsenate of Lead or Paris Green is for the Beetles, but either may be used in combination with the Bordeaux Mixture.

TOMATOES—Blight and Rot—Use Formula No. 5 when first fruit is half grown. Spray again in ten or fifteen days. Formula No. 9 should be used when the fruit is ripening if any spraying is necessary at that time.

DANDELIONS—Use Formula No. 10. Do not spray for two days before or after cutting the lawn. Most effective if it does not rain for 20 hours after spraying. Water the lawn and allow the grass to dry before spraying. Young plants should only require one spraying. Old plants are resistive, so repeat when they grow up again. When dandelions are dead, seed in with grass at once. Sulphate of Iron is not poisonous but will discolor clothing.

WILD MUSTARD—See under Dandelions.

CANADA THISTLES—See under Dandelions.

SPRAY FORMULAS

1. **ARSENATE OF LEAD**—Use from 3 to 5 lbs. Arsenate of Lead to 50 gallons of water.
2. **ARSENATE OF LEAD AND BORDEAUX COMBINED**—Use from 3 to 5 lbs. Arsenate of Lead to 50 gallons of Bordeaux Mixture. The Arsenate of Lead is used as an insecticide, and the Bordeaux Mixture as a fungicide especially recommended for preventing blight.
3. **PARIS GREEN**—Use 1 to 2 lbs. Paris Green to 50 gal. water. Paris Green should not be used on peach, cherries or Japan plums, and only with extreme caution on other stone fruits. In mixing Paris Green solutions add Milk of Lime, which will prevent the burning of foliage.
4. **PARIS GREEN AND BORDEAUX COMBINED**—Use 1 to 2 lbs. Paris Green to 50 gals. Bordeaux Mixture.
5. **BORDEAUX MIXTURE**—Copper sulphate 5 lbs.; Lime 5 lbs.; Water 50 gals.
In preparing use two one-half barrel tubs. One for Copper Sulphate and the other for the Milk of Lime. The two solutions are now poured into a barrel at the same time. The Lime solution should be kept well stirred. Two men are required to make Bordeaux Mixture, so as to get the two liquids poured into the barrel evenly.
6. **KEROSENE EMULSION**—Kerosene, 2 gallons; Whale Oil Soap, $\frac{1}{2}$ pound; Soft Water, 1 gallon.
7. **TOBACCO DECOCTION**—Tobacco Stems and other refuse tobacco, 1 pound; Water, 2 gallons. Boil tobacco stems and other refuse tobacco thoroughly in the water. This solution is sufficiently strong for aphides and other very delicate insects.
8. **LIME SULPHUR SOLUTION**—We find from experience that the Commercial Lime Sulphur Solution is much preferable to the home made solutions as, generally speaking, the mixture is better, being less liable to foliage injury and causing no trouble by clogging of spray nozzles, etc.
9. **AMMONIACAL COPPER CARBONATE**—Copper Carbonate 6 ounces; Strong Ammonia (just enough to dissolve the Carbonate) about 3 pints; Water 50 gallons. This is for use only when the fruit is ripe, or nearly so, and we do not wish to discolor it with Bordeaux Mixture.
10. **SULPHATE OF IRON**—Dissolve 4 pounds Sulphate of Iron in 2 gallons of water. Strain the liquid carefully through a fine screen of cheesecloth.
We have everything in Spraying Machinery including Hand, Traction and Gasoline Power Outfits. Send for descriptive matter or else call at our store and examine them.

INSECTICIDES & FUNGICIDES—Cont'd
PURE PARIS GREEN
ANSBACHER'S

After having tried several of the other kinds of Paris Green we are convinced that Ansbacher's has no superior, consequently are handling this kind exclusively.

The price of paris green not being established at the time of going to press, we will be pleased to quote prices on application.

GRASSELLI ARSENATE OF LEAD

Grasselli Arsenate of Lead Paste contains 15 per cent. Arsenic Oxide, combined with the maximum amount of lead consistent with good mixing qualities.

It contains less than one-half per cent. Soluble Arsenic.

Kills all leaf-eating insects. Mixes readily with water. Sticks to the foliage.

Grasselli Arsenate of Lead is used to destroy all leaf-eating insects attacking fruit trees, shade trees, vegetables, flowers and shrubbery, such as Codling Moth, Curculio, Canker Worm, Tussock Moth, Elm Leaf Beetle, Gypsy and Brown Tail Moths, Potato Beetle and all similar insects that feed upon the fruit and foliage.

Mix with the required amount of paste as received, enough water to make a thin paste that will pour readily before putting into the spray tank.

Apply thoroughly in a fine mist under good pressure as soon as the insects put in their appearance, or where past experience has shown that certain insects are to be expected at a certain time, it is well to apply Arsenate of Lead in advance of their appearance.

It should always be borne in mind that all insect pests can be more readily killed when young and before they have attained their growth.

Grasselli Arsenate of Lead Paste may be used with either Lime Sulphur Solution or Bordeaux Mixture, combining in one application treatment for both insects and fungi.

GRASSELLI ARSENATE OF LEAD
POWDERED

Grasselli Arsenate of Lead Powdered is usually used in the dust form. Apply as received, by finely dusting on the foliage. If mixed with water use 1 pound to 1½ pounds to 50 gallons of water except for Potato Beetles. Use two to three pounds to 50 gallons of water on potatoes, applying 50 gallons or more per acre.

GRASSELLI LIME SULPHUR SOLUTION

Grasselli Lime Sulphur Solution contains 33 per cent. combined lime and sulphur in solution at 32 to 33 degrees Beaume, the maximum that will stay in solution under the various climatic conditions to which it is liable to be exposed.

It is a clear, cherry color liquid, free from sediment and works through the nozzles easily.

Grasselli Lime Sulphur Solution is used as an insecticide to control San Jose Scale, Oyster Shell Scale and all sucking or scale insects. For this purpose it is used at a dilution of 1 gallon to 9 to 11 gallons of water and applied during the dormant season, either after the leaves drop in the Fall or before the buds open in the Spring. The Spring application, just before the buds open, will control Leaf Blister Mite, Plant Lice and Peach Leaf Curl, in addition to the scale insects, and is usually considered advisable in well cared for orchards where the scale is already under control and where the entire orchard can be gone over in the Spring.

Grasselli Lime Sulphur Solution is also used as a Summer spray to control Scab, Leaf Spot and similar fungous diseases on apples and pears.

On apple and pear foliage, it should not be used stronger than 1½ gallons to 50 gallons of water. Some prefer 1¼ gallons to 50 gallons of water.

Lime Sulphur Solution as a Summer spray replaces Bordeaux Mixture. The use of Lime Sulphur Solution and Bordeaux Mixture in same application is unnecessary.

"CORONA DRY" ARSENATE OF LEAD

Corona Dry Arsenate of Lead is distinctive for quick poisoning, even application and great adhesiveness.

Its purity and unusual chemical activeness give it highest poisoning power.

One pound of "Corona Dry" will do the work of three pounds of paste and do it better.

"Corona Dry" is absolutely safe and will not "burn."

"Corona Dry" can be kept indefinitely—will not freeze, dry out, cake or lose its strength.

"Corona Dry" contains no water, therefore, there is no shrinkage, seepage or evaporation.

"Corona Dry" is

GUARANTEED

Pure containing nothing but Lead Oxide and Arsenic Oxide. Every package contains full net weight.

"Corona Dry" can be weighed or measured easily and correctly. "Corona Dry" is a perfect dry, fine, white powder which mixes easily and readily in water. No working up needed. Merely shake proportional amount into spray tank as needed. No waste. No straining is needed—no sediment—no lumps. Never clogs spray nozzle.

INSECTICIDES & FUNGICIDES—Cont'd
STERLINGWORTH LIQUID BORDEAUX
 A Concentrated Mixture for Use with Water

By far the most important fungicide is **Bordeaux Mixture**, a chemical compound prepared by the action of Milk of Lime on a solution of Copper Sulphate.

"**Sterlingworth**" **Bordeaux Mixture** prevents or controls Scab, Leaf Spot and Sooty Mold of the Apple, Anthracnose of the Bean, Blackberry, Raspberry and Grape, Leaf Spot of the Beets, and checks the ravages of the flea beetle, the various Rusts, Leaf Blights of Currant and Gooseberry, Celery and Pear Blight, Downy Mildew of the Cucumber, Melon and Squash, Potato Blight, Black Knot of the Plum, Peach-Leaf-Curl, Shot-hole Fungus, also Fungus Diseases, Blights and Leaf Spots of Shade Trees.

One gallon makes from 20 to 50 gallons of **Bordeaux** ready to use by simply adding water.

Prices: 1-qt. cans, \$35 each; 1-gallon cans, \$.85 each. Prices on large quantities on request.

STERLINGWORTH DRY BORDEAUX

We have this with poison (Insecticide and Fungicide) and without poison (Fungicide).

Insecticide and Fungicide kills insects as well as controls Fungi.

Fungicide controls Fungi only.

Prices: Insecticide and Fungicide, 1-lb. box, 25c; Fungicide, 1-lb. box, 20c.

STERLINGWORTH SAN JOSE SCALE KILLER

A Soluble Oil Concentrated Petroleum Emulsion

Sterlingworth Scale Killer, properly applied, not only kills the scale, but protects the tree from reinfestation. The formula from which this Killer is compounded is recommended by the Connecticut Agricultural Experiment Station, a Station which has had a very extensive experience in fighting San Jose Scale.

We claim that **STERLINGWORTH SCALE KILLER** will kill every scale covered by it when sprayed according to directions. The work should be done in the fall or winter, or at least before the buds break in the spring. Full directions on every can.

Prices: 1-gallon cans, \$1.00. Prices on large quantities on request.

STERLINGWORTH
KEROSENE EMULSION

A valuable remedy against Scale and all Soft-bodied and Sucking Insects, such as Plant Lice, Leaf Aphis, Woolly Aphis, Thrip, Celery Aphis, Squash Bug, Leaf Hopper, Mealy Bug, Cabbage Worm, etc., etc.

Price: 1-pint cans, 25c each; 1-qt. can, 40c each.

STERLINGWORTH HELLEBORE

Is an absolutely pure article ground from prime fresh roots. It is stronger than the ordinary Hellebore offered by seedsmen, and is put up in a patent sprinkler-top box, making it easy to use. This patent box is so constructed and the perforations forming the sifter top can be closed after using so that the strength of the contents remaining unused may be conserved.

No preparation is so satisfactory and generally effective against Rose Slugs, Currant Worms and similar pests as pure Hellebore, but it must be pure and strong, to give good results. You will see a great difference in the strength of this Hellebore and that you have used.

Prices: ½ lb. pkg., 15c; 1-lb. pkg., 25c.

STERLINGWORTH FISH OIL SOAP

Effective, reliable, simple and cheap for destroying San Jose Scale, Plant Lice and all sucking insects on trees, shrubs, plants, vines, rose bushes, etc. The efficiency of this soap is further increased by the addition of tobacco extractive matter and potash. The preparation thus compounded possesses all the virtues of Whale Oil Soap, and in addition the valuable insecticide properties of tobacco and potash, making it doubly valuable. Full directions for use on each package.

Prices: 1-lb. box, 20c.

SCALECIDE

This reliable, simple and economical remedy for all soft-bodied and sucking insects, such as San Jose Scale, Pear Psylla, Cottony Maple Scale, Aphis, White Fly, Caterpillars, Lice, etc. Mixes instantly in cold water and stays mixed. **Not an emulsion**, but may be used with great saving of cost wherever petroleum or kerosene or soap emulsion are advised. Better and cheaper than lime, sulphur and salt.

Price: 1-qt. can, 40c.

STERLINGWORTH WEED KILLER

The most satisfactory and powerful, compounded especially for use on walks, drives, tennis courts, golf links, etc. It is a dry powder to be dissolved in water. When applied to vegetation it completely destroys all kinds of weeds, grass (including milkweed and witchgrass), briars, burdock, dandelions, daisies, thistles, poison ivy and other objectionable vegetable growths. One application, kills roots as well as foliage preventing further growth. It may be applied with an ordinary watering can. One pound makes 10 to 15 gallons and one gallon covers three or four square yards. Full directions on each package.

Prices: 1-lb. pkg., .50c.

BUG DEATH

This non-poisonous Insecticide and Plant Food is now too well known to need any detailed description.

Prices: 1-lb. pkg., .15; 12-lb. boxes, \$1.00; 100 lb. kegs, \$6.50; Dickey Bug Death Duster, .25.

Acre an Hour Sifter, .75.

TREE TANGLEFOOT

For protecting trees against climbing insect pests in a simple, economical and effective way, use Tree Tanglefoot—a sticky substance applied directly to the bark of trees. One application remains sticky on the trees three months fully exposed to the weather. Easily applied with a small wooden paddle. One pound will make a band 7 to 8 feet long.

Price. 1-lb. can, .30; 5-lb. can, .85.

FORMALDEHYDE

For the prevention of Smuts in wheat, oats, barley, all cereal grains, and potato scab. It is also specific for the prevention and cure of hog cholera, and makes a most excellent disinfectant.

Price: .50 per pound.

STERLINGWORTH SHEEP DIP

One gallon makes 50 to 60 gallons of strong dip.

Prices: ½ gallon cans, .70.

Larger quantity prices on application.

COOPER'S SHEEP DIP

25-gal. pkt., each .50.

DR. HESS SHEEP DIP

1-qt. can, .50.

CREOLUSOL

An Ideal Disinfectant Germicide and Deodorizer

Creolusol is a most powerful antiseptic and purifier, and one of the best disinfectants for private or public sanitation, it being especially adapted for domestic use. It possesses an agreeable, wholesome and refreshing odor. It is harmless to animals. It is non-poisonous and easily used by mixing with fresh water as wanted.

Full directions for use on every package. Put up in 1 quart cans, sufficient for making 50 quarts of disinfectant. Price: .50.

STERLINGWORTH CUTWORM KILLER

Sure death to Cutworms. Something that the Gardener has been looking for for years. We have it. Satisfaction guaranteed.

Price: 1 lb., .25.

Special prices on large quantities.

CREONOID

Barrett's Creonoid is an up-to-date preparation from coal tar, of invaluable service to the poultrymen, stock raisers and farmers. It eliminates flies and mosquitoes and insures sanitary conditions in stables, stock sheds, around barnyards, etc.

Prices as follows: Gallon cans, \$1.00. Prices on large quantities are quoted on application.

CARBONOL

Barrett's Carbonol combines all the good properties of carbolic acid, yet has none of its bad features. It is a preparation of coal tar of wonderful healing, cleansing and antiseptic properties, adapted to a wide range of uses. Carbonol is non-poisonous, non-corrosive, and mixes with water in any proportion, and in its full strength can be used with perfect safety. Send for special booklet.

Prices: 4 oz. bottles, .25 each; pint bottles, .50 each; quart bottles, .75 each; 1 gal. cans, \$1.75 each.

WILL-KILL-FLIES

Formerly Known as Rough-on-Flies

Kills flies, vermin, and lice. Increases the yield of milk. Insures more eggs and better poultry. Cures chicken gapes, scaly legs, etc. Kills lice on cattle and sheep ticks. Heals scab and hoof rot. It is an excellent disinfectant. Is an antiseptic and very healing. Used for cuts, burns or sores on man and beast. Thoroughly high grade. Every gallon guaranteed.

One-gallon cans, price per. gal., \$1.50.

COW'S FAVORITE FLY OIL

Protects the stock, drives the flies away, means money in the farmer's pocket. Just the preparation for the dairyman or farmer. Cow's Favorite Fly Oil, in bbls., per gal., .50
Cow's Favorite Fly Oil gal. cans, per gal., .60

CROW TAR

A thoroughly reliable tar made especially for using on corn as prevention against crows. Gives the corn a thin coating which quickly dries so that there is no trouble in putting through planter as is the case with tar preparation not made especially for that use. Write us for prices on whatever quantity you might desire. Price, qt. can, .25

HASKELL'S HOMEOPATHIC POULTRY REMEDIES

Haskell's Homeopathic Poultry Remedies are put up 10 tablets to a vial, each vial being labeled with complete directions and showing dosage and the disease which the remedy will prevent or cure. The vials are encased in strong, wooden screw-capped mailing tubes, to prevent breakage. They are administered in the fowl's drinking water.

- No. 1, for Indigestion and Constipation.
- No. 2, for Rheumatism and Cramps.
- No. 3, for Colds.
- No. 4, for Bronchitis and Croup.
- No. 5, for Cholera.
- No. 6, for Vent, Gleet and Canker.
- No. 7, for Chronic Catarrhal Colds.
- No. 8, for Disorder of Egg Organs.
- No. 9 for Eye Diseases.
- No. 10, for Worms.

When ordering specify number required.

Price: Per vial, postpaid, .40 each.

STERLINGWORTH DIARRHOEA REMEDY

Millions of chickens die yearly from diarrhoea which could be saved if Sterlingworth Diarrhoea Remedy was used. Whenever bowel trouble appears, use this remedy and you will have practically no loss. It is not a cure-all, but a reliable remedy only for Diarrhoea, Dysentary and other kindred bowel troubles in young chickens, full-grown fowls and pigeons. It is a powder for use in the drinking water.

Price: Per box, sufficient for several flocks, .50, postpaid.

STERLINGWORTH SULPHUR FUMIGATING CANDLES

Easy to Light. Safe to Use. Sure in Effect.

Sterlingworth Sulphur Fumigating Candles produce more vapor than any other candle sold at the same price. The candle has a circular wick, which is easy to light and when once lighted stays lighted.

Board of Health officials recommend sulphur fumes for destroying typhoid, diphtheria, smallpox, and other disease germs.

Price. Each, .10; postpaid, .15. One dozen, postpaid, \$1.10.

WATER GLASS (Silicate of Soda)

When your hens are laying well and eggs are plenty then is the time to put some away where you can have them when they are scarce and high. The simplest and best preservative known is Water Glass. 1 gal. of this with 15 gal. water will keep your eggs perfectly fresh almost indefinitely. It is clean, easy to prepare, gives universal satisfaction and price is reasonable.

Price: Qt., .25; gal., .65.

STERLINGWORTH'S LICE POWDER

The Strongest and Cheapest Lice Remedy Known.

The 5 and 15 ounce sizes of Sterlingworth's Lice Powder are put up in patent sifter-top box, the perforations of which can be closed after the box has once been opened. Few other Lice Powder boxes possess this advantage. After the boxes used for other Lice Powders are once opened there is no way of closing them, and the strength of the powder is lost by evaporation.

Prices: 5 oz. pkg., .10, postpaid, .15; 15 oz. pkg., .25, postpaid, .30, 48 oz. pkg., .50, postpaid, .58.

DR HESS INSTANT LOUSE KILLER

Destroys lice on poultry, stock of all kinds, and ticks on sheep. It is a powder put up in round cans with perforated top, and sold on a written guarantee. Price per pkg., .25.

NAPHTHOLINE NEST EGGS

These are the standard combined nest egg and lice killer. Are used in the nest in the same manner as the ordinary nest egg. Rids laying hens of lice and mites, keeping the nest sweet and clean.

Prices: Each, .05; per doz., .50.

If you desire a most clean and wholesome food for your chicks try our Sure Chick Starter and Crescent Chick Food.

If you desire more eggs from your hens use our Globe Egg Mash and Globe Scratch Food.

STERLINGWORTH LIQUID LICE PAINT

Every can Guaranteed to Do as Represented

Sterlingworth Liquid Lice Paint is a whole-sale lice and vermin destroyer. It saves time, labor and expense; no dipping; no dusting; no greasing and no handling being necessary.

Sterlingworth Liquid Lice Paint is never sold in bulk. It is put up in 1, 2 and 4 quart cans, all bearing our copy-righted label.

Prices: 1 qt. cans, .35 each; ½ gal. cans, .60 each; 1 gal. cans, \$1.00 each.

NUTRINE CHICK SALTS

ESSEX-MODEL NUTRINE CHICK SALTS fulfill the need of the chick for animal and mineral food which is often lacking in foods fed to chicks when in confinement. It aids digestion and prevents diarrhoea. These salts are not a purgative, but a tissue builder, and a wonderfully effective food-salt. Costs five cents a week for fifty chicks.

Prices: 2 lb. package, .50; 5 lb. package, \$1.00.

Trade—HASKELL'S—Name
ROUP CURE.

Guaranteed to Relieve or Money Refunded.

Haskell's Roup Cure is put up in one size package only. This package contains sufficient remedy for making 25 full strength gallons of the remedy.

We guarantee Haskell's Roup Cure, when used in accordance with directions on each package, to relieve roup, and will refund the purchase price if it fails to cure, except in cases where the fowls have reached the last and incurable stages of the disease.

Price: .50.

Keep your poultry houses clean and sweet by constant spraying. Call and see our line of Sprayers, Spray Pumps, etc.

THIS PAGE FOR POULTRY RAISERS

Don't
Worry!
Conkey
Will Cure
Me

WE WANT TO HEAR FROM POULTRYMEN EVERYWHERE who dread loss from Colds and Roup.

We will pay you 50 cents for the empty box if you buy a 50-cent package of Conkey's Roup Remedy and it does NOT do the work for you. We mean exactly this.

Don't be too quick to use the hatchet—and don't stand by idle. Treat the first symptoms of sneezing, wheezing or moping. Don't take any chances, for ROUP is contagious, it spreads quickly through the whole flock. Don't be too late. Get Conkey's Roup Remedy. Wise poultrymen keep Conkey's Roup Remedy always on hand, to use at the first symptom, or better still to put in the drinking water occasionally as a preventive. 25c and 50c sizes, and remember this: YOUR MONEY BACK if any CONKEY Remedy EVER fails you!

WE LIKE TO GET BACK OF A LINE that we can offer

our customers on this fair basis. We want to SATISFY our customers. Look over the list below and order NOW what you will need. Remember the guarantee holds good on everything in the Conkey line, and there's no time limit on it.

Conkey's Cholera Remedy—For all forms of indigestion and so-called cholera. 25c and 50c.

Conkey's White Diarrhoea Remedy—Very successful, both as remedy and preventive. We advise using this with all incubator chicks as an extra precaution. Easily given as it is put right in the drinking water. CAN BE USED ALSO AS A CHOLERA REMEDY, in place of treatment listed above. 25c and 50c.

Conkey's Poultry Tonic—For moulting fowls or birds in any rundown condition. 25c

Conkey's Lice Powder—For dusting fowls and in nests nothing so effective. Rids your fowls of these pests and they can use their energies for your profit. 15 oz., 25c; 5 oz., 10c.

Conkey's Lice Liquid—For mites in poultry houses spraying with Lice Liquid is the common-sense treatment, as it gets in the cracks where the mites hide away. No use trying to treat mites with a powder—the mite is a special kind of chicken-louse, that hides in cracks during the day, and attacks the fowls only at night. Conkey's Lice Liquid mixes with water, 25 to 50 parts as desired. This makes it very reasonable as well as effective. Price: 1 qt., 35c.

Conkey's Head Lice Ointment—A real chick saver—just a touch on the head of each little chick, also under the wings, will kill those murderous head lice that cause fully three-fourths of all chick losses, stunting, poor development, etc. Enough in 1 tube to save 100 chicks. Price 10c and 25c.

NOTE—We wish to emphasize the fact that there are THREE distinct kinds of chicken lice. They must be treated in three different ways, as no one thing will cover the life habits of all three kinds. Read this over again.

NOX-I-CIDE—The secret of a healthy flock is sanitation and disinfection. Nox-i-cide is Conkey's strictly high-grade disinfectant, dip, spray and lice liquid. It is a general purpose article

TOO
LATE

and can always be relied upon to prove effective. High in phenols. Not dangerous, and reasonably cheap, quality considered. It mixes readily with water, so that a gallon represents 50 to 100 gallons of spray liquid. Pint can 35c.

What about EGGS? Conkey's Laying Tonic regulates and conditions fowls so they can make the most possible profit. A little in the mash feed once a day improves the ration, and brings better results from the same feed. It improves digestion and increases the vigor of the flock. Try it and you will soon see your fowls look better, act better, do better in every way. It does not break down the fowl. Its use with breeding stock improves fertility as well as increases the number of eggs. Conkey's Laying Tonic simply improves the condition of the fowl, so it can do its best for you. Fine for growing stock. Unrivalled for bringing molting fowls into condition. Stirs up the sluggish layers. Try it on guarantee, and remember the eggs will soon pay for it! Costs only 2 cents a month for each hen, so you can estimate it's a money maker. Try it—that's all we ask of you. YOUR MONEY BACK if not satisfied. 3¼ lbs., 50c; 1½ lbs., 25c.

NOTE—Send for complete list of Conkey's Poultry Remedies. Enclose 4 cts. with request and we will mail big 80 page Conkey Poultry Book FREE. Don't overlook this if you are interested in the management of poultry.

Poultry Dept. Lewiston, Maine.

"PURITY BRAND" POULTRY FEEDS

Always Ready No Waste No Dirt

Our trade-mark brands of Poultry and Chick Feeds represent strictly high-grade mixtures,—manufactured from Sweet, Sound, Cracked Grains and Seeds—scientifically proportioned and in sizes best adapted for feeding, carefully sifted and recleaned. No pains are spared to produce Feeds of the greatest value—best quality and uniform grade—the standard of which is maintained at all times.

It is a recognized fact that sound and sweet grain contains a larger percentage of nutriment, strengthening and fattening properties, naturally producing better and quicker results than unsound, damaged and musty material.

"SUN" CHICK STARTER.

A Primary Grain Feed for Chicks during the first 20 days.

CLEAN SWEET SOUND

Specially selected for size, and composed of ingredients necessary in promoting healthy and rapid growth.

This is the critical period of chick life, and the "Sun Brand" is prepared especially to meet the emergency. In addition to the

regular assortment of Grains and Seeds, this mixture contains Steel Cut Oat Meal, fine Granulated Bone and fine Charcoal, which are of utmost importance for proper development and healthy condition.

QUEEN POULTRY MASH

Contains Alfalfa Meal During Winter.

Proportions changed to meet requirements of different season.

CLEAN SWEET SOUND

A selected mixture of ground feeds manufactured from the choicest sound, sweet and wholesome grains. It is carefully prepared and contains ingredients in proper proportions essential to the health and growth of the fowl.

Splendid bone builder and especially helpful during the molt. Also contains Beef Scraps and Charcoal, recognized necessities for health and egg production.

GLOBE EGG MASH

Invaluable as a Supplementary Feed for Winter Laying. 15% Meat Scraps and Oil Meal—16-18% Protein. Can be fed dry or moistened as preferred. The regular grain ration should be supplemented once a day by some mixture of ground

feed containing high protein. An Ideal Feed for Growing Fowls and Laying Hens.

"CRESCENT" CHICK FEED

A Complete Grain Feed for Chicks from 3 to 8 Weeks.

CLEAN SOUND SWEET

A standard mixture of recleaned Cracked Grains and Seeds, Hulled Oats, fine Granulated Bone and fine Charcoal. The proportions are similar to the "Sun Brand," but a trifle coarser, especially to meet the requirements of the older chicks, although used by many from the beginning.

It produces healthy and rapid growth, and is intended for feeding until the chickens are large enough to be fed the coarser Developing Feed.

"COLONIAL" DEVELOPING FEED

An Intermediate Feed for Growing Chicks.

A Coarse Grain Chick Feed to meet the requirements of growing chicks from the time they have outgrown the "Crescent Brand," until large enough for Globe Scratch Feed.

Screened and graded to adaptable size. Mixed and recleaned by the most approved methods. This feed like all other "Dickinson's Brands" is composed of the choicest materials obtainable.

"GLOBE" SCRATCH FEED

A Balanced Grain Ration Poultry Feed for Grown Fowls. Suitable at All Seasons.

CLEAN SWEET SOUND

Under this brand we offer our standard mixture of Poultry Feed manufactured from selected Cracked and Whole Grains and Seeds, scientifically mixed to furnish a complete balanced ration, with an assortment of material best adapted for rapid growth and egg production. The protein, fat and carbohydrates are so maintained as to form the greatest feeding value and produce best results.

Note what two of our prominent Poultry raisers say in regard to our Purity Brand Chick foods

January 6, 1914

Haskell Implement & Seed Co.,
194-200 Main St.,
Lewiston, Maine.

Gentlemen:

Replying to your inquiry of the 3d inst. regarding how we like the "Sun" Chick Starter and "Crescent" Chick Feed, will say that we have used both for several years in the rearing of from three to four thousand chicks yearly and like them very much.

We find them pure and wholesome and perfectly free from impurities, foreign seeds, etc., which chicks do not like.

We feel safe to recommend the "Sun" Chick Starter and "Crescent" Chick Feed to the public, as first class chick feeds.

Very truly yours,

(Signed) GEO. A. WISEMAN & SON,
Lewiston, Maine.

January 6, 1914

Haskell Implement & Seed Co.,
Lewiston, Maine.

Gentlemen:

For the past five years we have raised about one thousand chicks each year by giving them a good start with your Crescent Chick Feed.

Our method has been to use the "SUN" Chick Starter for the first week. As this is so fine, and properly balanced, we commence with that the very first thing when taking them from the incubators.

The next four weeks we use the "CRES-CENT" Chick Feed.

In 1913 we hatched 1250 chicks in the month of March and had no bowel trouble whatever by feeding with this method, and adding green food and charcoal.

Yours truly,

(Signed) MRS. V. P. DeCOSTER.
Buckfield, Maine.

POULTRY SUPPLIES

2-PIECE DRINK FOUNTS

Black iron, galvanized after mount has been completed. This assures a smoother, better-looking fountain and keeps the edge at the top from rusting. When the galvanizing is done first, turning the edge cracks it and makes it liable to rust.

Small, .20; Medium, .25; Large, .35.

WALL FOUNTS

All these wall founts have hoods over the troughs, which prevent dirt from settling in the water. Can be hung up on wall, and for this reason are preferred by many to the 2-piece fount, which must be placed on the floor.

1 Gal., .55; 2 Gal., .75.

DROP-BOTTOM FOUNTS

28-gauge galvanized steel. Easiest thing in the world to open and clean. Clasp by which the bottom is fastened fits over the small hole under the hood, preventing slopping of water when the fount is handled. Solid brass hinge rod—no rust.

2 Quart, .45; 1 Gal., .60; 2 Gal., .80.

CHICK FEED TROUGHS

The only rounded chick feed troughs on the market. No trouble to clean them. The grate slides easily on and off—a feature not found in any other chick troughs. The grate also serves as a handle, and is so slanted that the chicks cannot roost on it. Two sizes—10-inch and 20-inch.

10-inch, .30; 20-inch, .50.

THE NATICK DRY MASH FEEDER

The most economical and sanitary feeder for Dry Mash that has yet been offered. Positively no waste and no clogging of the food in the feeder.

Made in one size only.
Price, \$1.25

POULTRY SUPPLIES

(Continued)

"THE BOSTON" POULTRY DRY FEED HOPPER

"THE BOSTON" POULTRY DRY FEED HOPPER

The Dry Feed Hopper System of feeding is endorsed and recommended by practically all the experimental stations and is in use in most of the large practical plants.

Manufactured in Four Sizes

Chicken Hopper, small size, \$1.00. For use in small brooders.

Chicken Hopper, large size, \$1.90. For use in brooder houses.

Small Hopper, holds 8 quarts, .90. For beef scraps, shells, grit or charcoal.

Large Hopper, holds 16 quarts, \$1.00. For dry feed for hens.

PEERLESS DRINKING FOUNT

Very easy to clean by simply removing the bottom. Can either be hung on the wall or by the bail. A very desirable fount

Price, 5 qt., .60

PEERLESS BROODER FOUNT

Just the fount for your brooder. Can be set on the floor or hung on the wall within reach of the chickens. Can be cleaned same as large founts.

Price, .30

NESCO DRINKING FOUNTAIN

An extra good quality drinking fountain, which has an especial advantage of the top coming to a point. This prevents chickens or fowls from tipping over the fountain as easily as other styles.

Prices, 1 qt., .20; 2 qt., .25; 4 qt., .35; 8 qt., .50

ROUND-BOTTOM DRY-FOOD HOPPER

The hopper you will eventually buy. Sure to replace all other makes of dry-food hopper. Owing to the rounded bottom, dry mash and beef scrap feed readily and never clog. An "H-I" specialty that we're proud of. With or without lid.

With lid, .75.

POULTRY KILLING KNIVES

These knives made of the best steel and of special design.

Price, .50 each

GRENIER CAPONIZING SET

Designed to simplify the operation of caponizing, so that the beginner can easily master it. This set consists of a lancet shaped knife, spring spreader, forceps, hook, ring probe and canula. Price in velvet lined case, \$3.00

Try our Sun Chick Starter and Crescent Chick Food it will pay you.

POULTRY SUPPLIES

HIGH GRADE TESTED THERMOMETERS.

Cyphers Incubator Thermometers, for use in Cyphers Incubators, each, postpaid, .60c.
Watertown Incubator Thermometer, .50c.

BROODER THERMOMETERS.

Cyphers unmounted, .50c.
Cyphers Brooder Thermometers mounted on wooden holder, each, 50c.
Watertown Brooder Thermometers, .40c.

LAMP WICKS.

For incubator lamps, .25c per dozen, postpaid. These wicks come in two sizes; state sizes wanted.

Wicks for Brooder Stoves, .20c per doz., postpaid.

WIRE NESTS

These nests are strongly made from heavy japanned steel wire and will last a lifetime. They are easy to clean and far superior to the ordinary wood boxes.

Prices, each, .15c; per doz., \$1.40.
No. 2 Pedigree Trap Nests, each, \$1.50.

INCUBATOR LAMPS.

No. 0, each \$0.75
No. 1, 2 or 3, each90

CYPHERS PERFECT POULTRY MARKER.

Cyphers Perfect Marker is made especially for the work of marking chicks, makes a good, clear, clean cut, and does not mutilate the web. Price, each, .50c.

HALLOCK'S FOOD AND WATER HOLDERS.

Just the thing to prevent chicks or fowls from getting into the pan and soiling food or water; remove all danger of drowning the chicks, save food and prevent disease. These food and water holders are made of heavy galvanized iron, rust-proof pans, protected with heavy wire guards. Made in two sizes; small size, one gallon, each, .75c; medium size, two gallons, each, \$1.00.

CYPHERS INSULATED BROODER STOVE.

For those desiring to buy brooder lamps, or stoves, we offer the Cyphers Improved Insulated Brooder Stove. This new stove does away with the water jacket or reservoir required on brooder stoves usually sold for the purpose. The Insulating plate of heavy galvanized iron is so placed between the burner and the oil bowl that all heat of the flame is deflected away from the oil reservoir, so that the oil remains cool at all times. The stove has a seamless bottom, hence will not leak. Price, each, \$1.75.

LEADER ADJUSTABLE LEG BANDS.

The Best Yet.

Latest and best adjustable leg band out. Has neat, compact, and smooth fastening with no catching points; easily attached and are absolutely secure. Are made from heavy aluminum and are strong and substantial, and will hold their shape much better than bands made from thin, flimsy stock.

Made in two sizes: No. 1 for Bantams or Mediterraneans; No. 2 for Americans to Asiatics and turkeys. Not made in Pigeon sizes.

Prices, postpaid: 12, .15c; 25, .25c; 50, 40c; 100, .65c; 250, \$1.50; 500, \$2.75; 1,000, \$5.25.

Initials on bands, .05c for 50 or less; .10c per 100 extra.

GALVANIZED IRON DRINKING FOUNTAIN.

They are light, non-breakable, easily cleaned and keep the water clean. Small size fountain is just the right size for brooder use.

Prices, small size, each, .18c; medium size, each, .25c; large size, each, .35c.

POULTRY SUPPLIES

POULTRY FEEDER

Our popular, 1-2-3 Poultry Feeder can be used as a one, two or three apartment feeder, by simply changing the dividing walls. Perfectly sanitary and clean.

Price, small, .60
Large, .75

PORCELAIN NEST EGGS

These Eggs are made of first-class Flint Glass. They do not break easily and will last indefinitely. Price, each, .03; per doz., .25

DRY FOOD HOPPERS

Cyphers Dry Food Hoppers have two compartments, a large one for grain mixtures, holding about six quarts, and a small one for beef scraps, holding about three quarts.

Price, each, .75

CYPHERS X-RAY EGG TESTER

The Cyphers X-Ray Egg Tester is made of the best block tin and consists of a central cylinder or lamp flue, 5 1/4 inches high, with an outside diameter of 2 5/8 inches at the base and 2 3/8 inches at the top. It is designed for use in an ordinary hand lamp, fits over any style of burner with a diameter approximating that of the tester. In a dark room the light will be found strong enough to penetrate the shell and illuminate the interior of the egg.

Price: .25 each; postpaid, .35

SANITARY GRIT AND SHELL BOX

Is manufactured of the best galvanized iron and contains three apartments for food, shells or grit. It can be hung up against the wall at any height desired and is a thoroughly first-class article.

By the use of this self-feeding box every particle of grit, shells or food will be properly used and waste prevented, thus increasing the profits.

Price, each, .50

NO-SLOP CHICKEN FOUNT

Can use any size Mason jar thus making a clean, sanitary low price Fount.

Price: .15 each; 2 for .25

POULTRY SUPPLIES

(Continued)

STERLINGWORTH CHARCOAL

Is especially prepared for poultry, carefully screened and is different than other charcoals. Goods are put up in 50-pound burlap bags and in 2-pound paper cartons, in four sizes as follows:

Fine Powdered for Mash Food and Ducks, also Cattle and Hogs.

Fine Granulated for Brooder Chicks and Dry Chick Food Mixtures.

Medium Granulated for Half Grown Fowls, Pigeons, etc.

Coarse Granulated for Full Grown Fowls, Geese, Turkeys, etc.

Prices: 50-pound bags, .80 each; 2-pound cartons, .10 each. Larger quantities a matter for correspondence.

MICO SPAR CUBICAL GRIT

Does not become smooth, but retains its cubical form until entirely worn out.

No. 1. For Turkeys.

No. 2. For Fowls.

No. 3. For growing Chicks, Pigeons and Ducks.

No. 4. Extra Fine, for Chicken Food.

Price per 100-pound bag, .70

OYSTER SHELLS

Crushed and ground to the size which expert poultrymen agree to be the best. Every pound of shell we sell is all shell and no waste. Price in quantities quoted on application. 100-lb. bag, .70

High Grade Beef Scraps.

Fine Cracked Bone for Chicks.

Coarse Cracked Bone for fowls.

Feed Grains of all kinds.

PURITY MEDIUM CUT ALFALFA

As an accompaniment to the mash fed by some, and the dry food by others, a vegetable food is indispensable, in fact no mash is complete without it. Among green feeds, Alfalfa stands at the top, and when used with the mash, Medium Cut Alfalfa is mixed dry with other foods, and scalded or boiled with them, as the poultryman desires. When fed in connection with dry grains it should be scalded in a trough or other vessel and left for the fowls to eat at will.

DR. HESS' POULTRY PAN-A-CE-A

Contains tonics that aid the digestion; it also contains iron for the blood and nitrates to expel poisonous material through the skin; it is the only reasonable way to produce eggs without stimulants that are injurious.

1½-lb. pkg., .25; 5-lb. pkg., .60; 12-lb. pkg., \$1.25; 25-lb. pail, \$2.50.

Samples and Quantity Prices gladly sent on request on all Poultry Foods.

PARCEL POST EGG SHIPPING BOXES

A corrugated pasteboard box of sufficient strength to withstand the hard usage of the Parcel Post and carry your eggs safely to market. We have them in one, two, three and five dozen sizes. Prices on application.

INTERNATIONAL SANITARY HOVERS

Advantages possessed by the International Sanitary Hover and not to be found in any other brooding device.

1. It is warmer at the curtain than near the center. This causes the chicks to distribute themselves just back of the edge of the curtain, where they have a constant supply of fresh air and plenty of room.

2. It is entirely circular and has no corners for the chicks to crowd into.

3. The lamp holder can be lifted out through the top of the hover by a person standing up. This makes it unnecessary for the operator to kneel in dust or mud to tend his lamp.

THE ECONOMY OATS SPROUTER

The best device for producing clean sprouted oats. Has five perforated pans each 16x17 in. and one drip pan at bottom. No Lamp, no Danger, very durable, compact. Green food all winter if you use the Economy Oats Sprouter which means bigger egg yields consequently more profit.

Price, \$5.00

Prices

No. 1, 8 qt. \$2.50

No. 2, 14 qt. \$3.25

No. 3, 20 qt. \$4.10

No. 4, 32 qt. \$5.00

Positively guaranteed or money refunded.

The Norwich Automatic Feeder and Exerciser.

Will actually pay for itself in 30 months' time in saving of grain. One of the secrets of successful poultry is giving them exercise. This will do it. Send for complete descriptive circular.

4. It is metal throughout (except the curtain, of course) and is therefore vermin proof as well as fireproof. Unlike the wooden hover, it will not absorb dirt and hold it.

5. Although portable—easy to carry around and usable anywhere—it provides nearly two hundred square inches more hovering space than do other hovers.

6. It gives ample heat under the hover without so heating the surrounding floor space as to cause leg weakness among the chicks.

Send for Full Descriptive Catalog.

GENUINE

Standard Cyphers Incubators

PATENTED

(Look for Trade Mark—Demand the Label)

**STANDARD
CYPHERS INCUBATOR**

Fire Proofed—Insurable.

For 1914

We offer our customers the Cyphers Company's complete line of incubators and brooders—the best on the market. For years the Cyphers Incubator has been consistently improved, always maintaining its leadership, until today it represents all that is most efficient, convenient and reliable in incubator construction.

TO OWN A CYPHERS is to have an incubator that stands first, not only because it has affixed to it the fire insurance label granted by the National Board of Fire Underwriters and bears a world-wide reputation, but because of the well established fact that it is the best hatcher of large, vigorous, livable chicks. It is positively guaranteed to outhatch any other make of incubator under widely-varying conditions, season after season, and to last ten years without repairs.

DEMAND THIS LABEL

YOUR SAFETY

Form of Brass Label to be Found [in serial numbers] on Every Standard Cyphers Incubator. All sizes.

THE PRINCIPLES OF CONSTRUCTION that have made Cyphers Incubators "the world's standard hatchers" for the last twelve to fifteen years remain unchanged in the 1914 pattern. Their patented features, their entire freedom from the bothers, disappointments and losses common to the "cheap" or "bargain" incubator, make these high-class machines the best for you to own first, last and all the time. They are used with unequalled success in all parts of the civilized world, under every practical condition by men and women in all walks of life. They are money savers and money makers for poultry raisers who "mean business"—for men and women who want a real incubator with which to get out of poultry keeping all the profit and all the pleasure there is in it.

CYPHERS INCUBATORS have been on the market fifteen years and today are used by more Government Experiment Stations, on more large, practical poultry plants, on more successful duck and egg farms and by a larger number of foremost poultry breeders than all other makes combined. For proof of these statements send to us for a copy of Cyphers Incubator Company's latest complete catalogue—1914 edition—now ready for mailing, free on request. Book contains 212 pages 7½x10 inches.

EVERY STANDARD CYPHERS INCUBATOR IS GUARANTEED by the manufacturers to do first-class work in the hands of every purchaser who will give it a fair trial and we hereby place our guarantee back of theirs. In buying a Cyphers you take no chances. Persons who earnestly desire to succeed in the poultry business should have the right tools with which to work. Write us today for free illustrated catalogue telling all about these superior hatching machines.

BROODERS

We are
Authorized Agents for

Standard Cyphers Combination Brooders AND COLONY ROOSTING COOPS

FOR 1914 Cyphers Unequalled Apartment Brooders and combination roosting coops have the same important advantages over all other makes that are possessed by Cyphers Company's 1914 incubators, in that they are fire-proofed and insurable, having the first fire insurance inspection label ever granted on a Brooder.

CYPHERS 1914 BROODERS, every size and style, self-regulating, self-ventilating and varmint proof. The outdoor styles are useable also as colony coops for the growing chicks. They are easily and quickly converted into colony roosting coops by simply taking out the hover, which is made removable for that purpose.

**DEMAND THIS LABEL
YOUR SAFETY**

Form of Brass Label to be found (in serial number) on every Cyphers Brooder. All sizes.

SIZE AND PRICES CYPHERS BROODERS

Style A, 2 apartment outdoor Brooder, cap. 75 chicks,	\$13.50
Style B, 3 apartment outdoor Brooder, cap. 100 chicks,	17.50

Fire-Proofed, Insurable, Self-Regulating

STYLE B OUTDOOR BROODER

(Three apartments. Safest and most popular "Foster Mother" ever designed.)

THIS DOUBLE USE of the Cyphers Brooder means a considerable saving of money. It makes a safe and comfortable enclosure for the young chicks at night and saves the buying of a coop for them. These outdoor brooders, on account of their fire-proof construction, can be used indoors, although we supply a special brooder, Style D, for indoor purposes. All Cyphers 1914 Brooders, both outdoor and indoor, contain either two or three apartments. The popular Style B (shown in illustration herewith), contains three apartments—first, roomy space under the hover; second, hover chamber; third, well-lighted exercising apartment.

Style C, 3 apartment outdoor Brooder, cap. 100 chicks,	19.00
Style D, 3 apartment indoor Brooder, cap. 75 chicks,	13.00

ALL METAL ADAPTABLE HOVER

This all-metal, guaranteed fire-proof heating and brooding device is suitable to be used

anywhere that heat is required for brooding chicks or ducklings. It can be used in a roosting coop, colony house, shed, hen house, barn or other building with or without any additional enclosure for the chicks, or in a large goods case or organ or piano box.

Is pronounced by thousands of users to be the best device thus far invented for heating home-made brooders. Recommended especially for use in long brooding houses, one hover for each pen. Adaptable hover is complete in itself, bears insurance label as a separate device, and is safe to use anywhere. Weight, boxed for shipment, only 40 pounds.

Capacity 75 chicks. **Price, \$8.50**

CYPHERS NEW PORTABLE HOVER

Self Regulating—For Indoor Use

This Hover is self-regulating as far as a brooding device can be made so. The same dependable, toggle-joint, zinc and steel thermostat that is used in the full line Cyphers Brooders. Also, positively automatic in ventilation, giving a continuous supply of fresh air to the chicks.

Price Cyphers Portable Hover.....\$8.50

BUCKEYE INCUBATORS

GUARANTEED TO HATCH EVERY HATCHABLE EGG

During the 23 years that Buckeye Incubators have been on the market they have earned the reputation of being "The most satisfactory hatching device that has ever been produced."

These incubators will not only hatch more chicks and stronger chicks than any other incubator, but in addition to that, they are so simple that a beginner can operate them just as successfully as an experienced poultryman.

Each and every Buckeye is sold under an absolute guarantee to hatch every hatchable egg and we have no hesitation in recommending to our trade under that guarantee, because we have sold hundreds of them during the past four years that have given our customers the most remarkable hatching results.

Let us show you a Buckeye in operation and prove to you that they will hatch more chicks and better chicks than any old hen or incubator you ever owned.

WE HAVE THEM IN FIVE SIZES—60 EGGS TO 350 EGGS.

BUCKEYE INCUBATOR—STYLE A AND E

The greatest hatching device ever produced at any price.

Not a toy—not an experiment.

Guaranteed to hatch every hatchable egg.

On the market 23 years.

Over 100,000 in successful operation.
Capacity 60 eggs. Complete ready to use, \$10.00

BUCKEYE STANDARD INCUBATORS

Equipped with every desirable device to be found on any incubator.

Guaranteed to hatch every hatchable egg and remain in perfect working order for 5 years.

No. 1.	Capacity 110 Eggs,	. . .	\$18.00
No. 2.	Capacity 175 Eggs,	. . .	23.00
No. 3.	Capacity 250 Eggs,	. . .	30.00
No. 4.	Capacity 350 Eggs,	. . .	35.00

These incubators bear the Underwriters fireproof Label.

BUCKEYE BROODERS

It is a matter of record that poorly constructed brooders are responsible for the death of more chicks than all other causes combined, so we consider it most advisable to call particular attention to the importance of using a type of brooder which we know will properly care for the chicks after they are hatched.

INDOOR BROODERS

Top heat—circulating hot water. Self regulating.

No. 1. Capacity 50 chicks,	\$ 8.00
No. 3. Capacity 100 chicks,	10.00

No. 2. Capacity 50 chicks,	\$12.00
No. 4. Capacity 100 chicks,	18.00

LAMPLESS BROODERS

No artificial heat required.

No. 5. Capacity 25 chicks,	\$2.00
No. 6. Capacity 50 chicks,	3.00

Do you wish good, vigorous, healthy chicks?

One of the surest ways to insure this is to use pure foods properly mixed. Our **"Purity Brand" Sun Chick Starter and Crescent Chick Feed** we guarantee to have both the above virtues, and they are the most successful feeds for chicks of which we have knowledge.

Would it not pay you to investigate and give these feeds a trial?

For **Egg Production—Globe Egg Mash** beats them all. 18% Protein, 15% Beef Scraps and Oil Meal.

THE WORLD-FAMOUS "ESSEX-MODEL" INCUBATORS

Five Styles—Twelve Sizes

ESSEX-MODEL "STANDARD," This Company manufactures the **Largest Line of Incubators in America**, and our **"STANDARDS"** Lead the World.

They are the result of many years' work and hard-earned experience by experts, and represent the latest, down-to-date knowledge of artificial incubation. Year after year they have proven themselves "The World's Best Hatchers"—the richest appearing Incubators made.

These Essex-Model "Standards" are the only Incubators made of Hardwood. At first sight, with their rich furniture finish, you will pronounce them **SUPERIOR**. We built them of high-grade Chestnut because it is the best wood to withstand variations of outside temperature, dry atmosphere, and damp cellars. Chestnut is of course much more costly than pine or other soft woods which are generally used in the manufacture of incubators, but as it does not swell and shrink like soft cheap woods we prefer to go to this extra expense in making these Superior machines. By being content with a small profit on the large number of machines we make, we are enabled to sell this Superior machine at no greater cost than other machines that are made of ordinary soft wood, and possess less efficient equipment.

The Essex-Model "Standards" are built with double walls with space between filled with a superior quality of costly insulating material. They possess double glass doors and heavily insulated and packed tops; Heavy Galvanized Iron Asbestos Jacketed Heater; our Latest and Best Self-adjusting Lamp Support and a Seamless, One-piece, Reinforced Safety Lamp Bowl.

They are **Self-Regulating**, being equipped with our (Patented) Corrugated Leaf Thermostat, which is the most sensitive and accurate regulator ever placed in an incubator. It cannot be used in any other make.

The Essex-Model "Standards" have for years been the only **Self-Ventilating** machines made. There are no slides to open and shut. The ventilation is wholly automatic, being controlled by the slatted-bottom principle of construction, the porous diaphragms, and our fresh-air, single-draft heated. By this advanced principle the "Essex-Models" preserve the natural moisture of the air and in the eggs to a greater extent than any other machine, and to the same extent avoid the danger of dead chicks in the shell. They combine, in the highest degree, **STRENGTH, DURABILITY, FINISH and HATCHABILITY**, being the Highest-Grade Incubators manufactured anywhere, at any price—**America's Most Superior Machines.**

All these advantages—this Scientific Construction, the use of Superior Material, the use of our Patented Thermostat, etc., etc., all go to build up a machine that is acknowledged to be the Best Hatcher that has ever been built. State Experiment Stations say so! Expert poultrymen say so, and the many unasked-for letters we have from those who have used them prove that as a Hatcher, the "Essex-Model" stands unequalled. The evidence is given in our Big Catalogue.

The Essex-Models are endorsed and used by **State-Experiment Stations** and **Agricultural Schools** in their Poultry Classes.

They hold more eggs than any other High-Grade machine at the price.

Ask your Hardware or Seed Merchant for the Famous "Essex-Models." Don't be satisfied till you've seen them. If your storekeeper does not keep them, write for our Big Free Illustrated Catalogue "S," and please send us his address.

The Famous "Standard" Essex-Model Incubator

Complete with Lamp, Thermometer, and Egg Tester—No Extras for you to buy. Case made wholly of Chestnut (the only Hardwood Incubator made); Latest Self-adjusting Lamp Support and Essex-Corrugated Thermostat (Patented).

No. 0	125 Egg	\$18.00
No. 1	175 Egg	23.00
No. 2	275 Egg	32.00
No. 3	410 Egg	37.00

REASONS WHY YOU SHOULD PURCHASE

SELF REGULATING	NON-MOISTURE
SELF VENTILATING	FULLY GUARANTEED
SUPERIOR WORKMANSHIP AND FINISH GIVES BETTER AND MORE CHICKS	
SUPERIOR CORRUGATED LEAF THERMOSTAT	

ESSEX-MODEL SUPERIOR BROODERS

A Line of Brooders Unequalled for their Combination of Light, Heat, Ventilation and Floor Space. The Brooders that Raise Most Strong, Healthy Chicks

Essex-Model Brooders are known wherever poultry is raised by reason of their splendid combination of Light, Heat, Ventilation and Floor Space, so designed as to afford young chicks natural conditions without natural dangers; ventilation without draughts; heat without oil fumes; light sufficient for their needs; but not so much as to allow a great variation in temperature between night and day; *and an amount of floor space that is not equalled at the prices in any other High-Grade Brooder.* They Mother the Chicks Better Than a Hen, because they possess the advantages without the dangers and discomforts of natural brooding.

These Brooders are all built on the Essex-Model principle of: *"You should see every chick every day. Know their condition, and be successful."* In the Essex-Model Brooders (as in no others) the chicks can be readily seen by simply lifting the Hover without having to unscrew or remove any of the parts. Take a look under the Hover every day. That's the way to raise chicks—and the only way.

The Famous and Original Essex-Model C Outdoor Colony Brooder and Roost Coop

(Size 72x34½ inches.) The Best Brooder made, regardless of price, showing our original double window in exercise compartment and hover full length of nursery compartment.

Capacity 150 chicks. Price \$18.50

The Essex-Model C Brooder has three apartments—the hover and nursery, separated by the hover curtain; and the exercise room separated by a removable partition having a door and curtain full width of Brooder, so that the chicks never lose their way back to the hover, nor crowd and get chilled in the exercise-room, as they may where the exit is only a small doorway. The nursery apartment is *double walled and insulated, making a triple-walled Brooder with five thicknesses of roof.* The hover is 15 inches wide by 32½ inches long, giving more hover space than any other; and the chicks cannot crowd. They hover the full length of the apartment. To be successful you should be able to see your chicks readily under the hover. This Brooder makes it easy. No other make, at any price, combines these advantages.

ESSEX-MODEL SINGLE NEW HOMESTEAD BROODER

The Essex-Model New Homestead Brooder is a low-priced Brooder, substantially constructed, and is considerably in advance of the kind usually sold at the price we ask for it. It can be used either indoors or outdoors. It is built of ¾-inch dressed, tongued and grooved lumber throughout, including the roof. It is divided into two apartments by the hover cloth. It has ample floor space and light. Its heating equipment is such that it gives satisfaction in all weathers. Its size is 32¼x21 inches, having chick capacity nearly equal to that of some machines that are sold for double the money.

Capacity 100 chicks. Price \$6.50

NEW 1914 CHICK-COMFORT HOVER

The most satisfactory and practical Portable Brooding Device on the Market.

It gives the most heat on the floor underneath where the chicks are. Don't be fooled by thermometers that are placed near the source of heat. Test the floor heat.

The lamp is out to one side where it can be easily reached and removed without allowing the heat to escape from the top as it does in hovers that have center heat. This style of hover keeps the lamp cooler than any other, so avoiding the danger that attends some center heat hovers.

It can be used in a low-roofed Colony House or Brooder. Center lamp Hovers cannot be so used, as the lamp could not be taken out. Can be used in any Outdoor Brooder, Colony House, Piano Box or Similar outfit, or indoors in Brooder House or any partially warmed room, where it would be comfortable for the chicks to exercise.

Price \$8.50

AMERICAN FIELD AND POULTRY FENCE

AMERICAN FIELD FENCE

Best values ever offered in Fencing are offered in American and Ellwood Wire Fencing. Special designs for Line Fence or for Horse, Cattle and Hog pastures. Also for Poultry, Rabbits, Foxes, etc., and low designs for running on stone walls.

Headquarters for

AMERICAN FIELD AND HOG FENCE.

Made of large, strong, high-grade steel wires, heavily galvanized. Amply provides for expansion and contraction. Is practically everlasting. Never goes wrong, no matter how great a strain is put on it. Does not mutilate but does, efficiently turn cattle, horses, hogs and pigs.

Every rod of American Fence Guaranteed by the manufacturers. Call and see it. Can show you how it will save you money and fence your fields so they will stay fenced.

THE KINERSON COMBINATION BUTTER PRINTS

The Kinson Prints are too well known to require elaborate advertising or testimonials. For over a quarter of a century they have stood upon their own merits, and are today giving satisfactory service in nearly every State in the Union. Our patrons are numbered by the hundreds, from Florida to Quebec and from Maine to California. There are various devices on the market for printing butter, but the Kinson Print has no real competitors. Its first cost is a trifle in advance of the cost of inferior goods, but no more so than is necessary to insure each customer of honorable business dealing, first-class workmanship, skilled engraving executed to order, and a thoroughly practical, simple and convenient Print which is the fruit of years of careful study, experiment and improvement—a Print that will save many times its original cost, in valuable time, and will outwear any other Print on the market. The above statements are made in thorough good faith, and the Prints themselves will demonstrate their truthfulness.

These Prints will be carved with any Initial, Monogram, or design wanted. Price including Cutters and Paddles, postage paid anywhere in New England,

CHAMPION MILK COOLER AERATOR

A perfect Aerator, removing all flavors arising from excessive cabbage, turnip or silo rations.

A complete deodorizer, removing the animal heat or cowy taste, and all odors arising from the absorption by the milk of stable or other unpleasant gases.

A thorough cooler, reducing the temperature of the milk in one minute nearly to the temperature of the cooling medium.

It is equally well adapted to the use of any cooling medium, either running water, ice water, or, if a very low temperature is not required, ordinary well or spring water.

Is automatic, requiring no attention, while in operation.

COMMON SENSE CALF FEEDER

WHAT IT IS. The Common Sense Calf Feeder is a simple practical device for weaning and feeding calves, so simple and so practical that every calf owner will see the value of it at a glance.

WHAT IT DOES. It enables you to feed the calf out of a bucket in nature's old way. If you could afford to let your calf run with the cow until nature compelled it to seek food elsewhere, there would be no scouring, unhealthy calves.

Follow nature; this feeder not only saves trouble and milk, but it prevents the calf from taking its food in the great gulps that play havoc with the digestive organs.

Price \$2.50

LAWN MOWERS

TOWNSEND'S VICTORY

We cannot offer a better mower at any price. It has Ball Bearings of the very highest grade exact to $\frac{1}{4}$ of 1-1000 of an inch, which greatly reduces friction. Double Steel Ratchet, very swift and smooth in action, as well as exceedingly hard for durability. Triple Gear. Entirely enclosed, allowing no dirt or cut grass to find its way into the pinions or cogs.

16-in., \$8.50; 18-in., \$9.00; 20-in., \$9.75

TOWNSEND'S DERBY

A first-class, high-grade Mower with closed wheel and frame—two gear principle Ball bearings of the very highest grade. Micrometer adjustment for cones and Ball Cups. One large threaded cone takes up all wear in the reel journals. Double Steel Ratchet. Lower Blade of crucible steel hardened and tempered.

14-in., \$5.75; 16-in., \$6.25; 18-in., \$6.75

COLDWELL GRAND HIGH WHEEL BALL BEARING

Look at the only patent reversible blade ever put into a lawn mower.

Made in one piece of channelled crucible steel, this blade is far stiffer and more serviceable than the ordinary old-fashioned flat knife.

The blade will last for years. If it's injured, it takes just twenty seconds to reverse it, by loosening the adjusting screws, and you have a practically new machine—two lawn mowers in one.

Every one of

COLDWELL'S "GRAND" LAWN MOWERS

is equipped with this great feature.

The first cost of an ordinary lawn mower may be less, but because a "GRAND" stays out of the repair shop and is always ready for grass-cutting, it's the cheapest in the end.

The name "COLDWELL GRAND" signifies perfection in lawn mower building.

16-in., \$9.25; 18-in., \$10.00; 20-in., \$11.00

TOWNSEND'S FLYER

A splendid High-Grade Mower at a little lower price than the "victory." Ball bearings entirely enclosed. Adjustments very simple. Knives very hard and of the best steel.

14-in., \$5.00; 16-in., \$5.50; 18-in., \$6.00

THE LAKEWOOD

Ball Bearing—(9-inch Wheels)

The best medium priced Ball Bearing Mower on the market.

The strongest feature of this machine is the simple but positive and reliable adjustment of the bearings.

16-in., \$5.75; 18-inch, \$6.25

THE NEWPORT

Similar to the Lakewood, but has Brass Bearings in place of ball bearings. The Revolving Cutter and Bottom Knives of the Newport and Lakewood Mowers are of the same quality and weight as used on many High Grade Mowers of other manufacture.

16-in., \$5.50; 18-in., \$6.00

THE CADET—(8-inch Wheels)

A thoroughly good Mower at a low price. It has large Driving Wheels, Brass Bearings, Patent Flexible Bottom Knife and Ratchets, and Adjustments equal to those used in many makes of High Grade Mowers.

14 and 16-in., \$2.50; 18-in., \$2.75

LAWN MOWERS

(Continued)

**COLDWELL'S STYLE D
LAWN MOWER**

This is the best low priced Ball Bearing Lawn Mower on the market. It is made by the Coldwell Lawn Mower Co., of Newburg, N. Y., who have the reputation of turning out nothing but the best in the Lawn Mower line. This machine has four revolving blades 10 in. drive wheels and Ball Bearings. Handsomely finished in black and gold.

Price 14 in., \$4.60; 16 in., \$4.75; 18 in., \$5.00

COLDWELL'S STYLE F LAWN MOWER

Same as the Style D except it has 9 in. wheels and 3 revolving blades.

Price 14 in., \$3.75; 16 in., \$4.00; 18 in., \$4.25

REINDEER BALL BEARING

10-inch Wheels. Five Revolving Blades.
Self-sharpening.

Highest grade ball bearing parts made of solid cone steel thoroughly hardened and ground. Dust proof.

Cutter Bar has patent screw adjustments. Parts machined and fitted. Noiseless in operation. Fully warranted.

Handsomely finished in flat black and gold.
Sizes: 16 and 18 inches.

16 in., \$7.00; 18 in., \$7.25

GREYHOUND

Plain Bearings. 10-inch Wheels, 4 Blades.
Self-sharpening.

Built with adjustable brass bushings for taking up wear.

Cutter Bar has screw adjustments.

Noiseless in operation; fully warranted.

Finished in light green and gold. Beautifully decorated.

Sizes: 16 and 18 inches.

16 in., \$5.50; 18 in., \$5.75

Townsend's Horse Roller Mower

The points of advantage are as follows:

Triple Rolls, which keep the blades in motion while turning sharp corners.

Instant change of height of cut, operated by lever close to driver's seat.

Large Rolls, insuring great power and ease of movement.

Instantaneous control of blades, for throwing mower in or out of gear.

Self-aligning journal boxes and a spacious foot rest.

Write for prices and circulars.

MISCELLANEOUS

DUSTBANE

The very best of all sweeping compounds on the market. No sand to increase its weight. It is a perfect Dust Killer. Every Storekeeper as well as every Housewife should have a supply on hand and use it at every sweeping. A handful in a line when you sweep absorbs the dust, brightens the floor and cleans your carpet.

Prices: Small can, .10; large can, .25; $\frac{1}{4}$ bbl., 37 $\frac{1}{2}$ lbs., \$1.75; $\frac{1}{2}$ bbl., 75 lbs., \$3.00; bbl., 150 lbs., \$5.25; large bbl., 250 lbs., \$8.75.

O-CEDAR MOPS

A Better and Easier Way to Clean

No more back-breaking to clean and polish the floors; no more crawling under the bed, or moving of heavy furniture; no more climbing up on chairs to dust the mouldings or tall furniture. The O-Cedar Polish Mop gathers all the dust from everywhere and holds it. Does not stir up the dust but collects it.

Cleans and polishes at the same time, putting a high, hard, lasting lustre on all varnished surfaces. There is nothing to equal the O-Cedar Polish Mop for polished floors, linoleums, etc. Gets down into the corners, gets the dust under beds, heavy furniture, radiators, etc. The mop is padded and cannot scratch or mar the furniture.

The only polish mop that can be successfully washed and cleaned and renewed.

It makes easy and pleasant what was hard work. No more getting down on hands and knees to polish hardwood floors.

Price, small, \$1.00; large, \$1.50

BISSELL'S CARPET SWEEPERS

Universal, Jap. Trim., Cyco Bear . . \$2.50

Grand Rapids, Jap. Trim., Cyco BB . . 2.75

These Sweepers have been the standard for years and we guarantee their satisfaction.

O-CEDAR POLISH

A Wonderful Varnish Food

for cleaning and polishing floors, furniture, automobiles, etc. O-Cedar is by far the most economical furniture polish as it is used with water. Puts on a high, hard, lasting lustre, and does not leave a bluish cast and gummy surface. It contains no grease, mineral by-product or benzines.

Every ingredient of O-Cedar Polish is a pure vegetable substance. Positively will not ignite. It is easy to use. Very little rubbing is required.

O-Cedar Polish is well and favorably known and is widely advertised in connection with the O-Cedar Polish Mop.

BURROWES PRIMUS FOLDING CARD TABLE

The Best Folding Table at a popular price on the market. Always ready for use, never in the way when not wanted, and at so low a price that it is within the reach of all.

This trim, neat table, remarkably strong and well braced, is being used in thousands of homes, club-rooms, sewing rooms, etc., for a great variety of purposes. It has all the convenience of a folding table, with none of the projections or garish trimmings that used to be the rule with this class of furniture.

The illustration shows only the proportions, and does not convey any idea of the real quality of this table. It is beautifully finished in dark mahogany or golden oak color, with green felt or green leatherette top. The legs are strongly braced and are self-locking either open or closed. They are rubber tipped to prevent noise and injury to hardwood floors. Size 30x30 inches, height 27 inches, weight 9 pounds.

Price \$2.25

NOTICE—In ordering repairs always give name of machine and number on old part. When the number or letter cannot be found, it is always best to send, by express prepaid, the old or broken part, thus avoiding mistakes or delays.

BARN DOOR HANGERS AND HAY CARRIERS

The Myers Adjustable Tandem Stayon Flexible Door Hanger with Steel Roller Bearings

This is the only hanger on the market that can be adjusted perpendicularly so as to locate the door at any point above the ground desired, or laterally so as to adjust the door to or from the building, and will also adjust itself to any thickness of door. The perpendicular and lateral adjustments are made with an ordinary wrench, and at the will of the user.

Price \$1.00 per pair

The Myers New-Way Adjustable Tandem Door Hanger For Tubular Girder Track Adjustable to and from Building and to Raise and Lower the Door

The track is made of high carbon stiff steel with two flanges turning downward at the lower edge, making the truss or girders which stiffen the track, enabling it to carry a much heavier load than any other style tubular track. In addition to this, there is no possible chance for dirt to lodge on the inner side of the track.

The adjustable features of this hanger are very important, as they enable the user to adjust the door to and from the building to prevent snow or rain from blowing in. The perpendicular adjustment permits of the door being raised or lowered, as is necessary, especially in cold weather, as in such cases the ground when frozen will heave up, thus locking the door. Can be used on doors varying in thickness from 1½ in. to 3 in. or more.

Price \$1.25 per pair

The Myers "O. K. Adjustable Stayon" Flexible Covered Door Hanger Patented

With Hard Steel Roller Bearings. Pushes and pulls easily. It is impossible to throw it off the track or have the door warp sufficient to prevent its operation. The "O. K. Stayon" is constructed with a malleable frame extending over and covering the wheel. The frame is reinforced by two heavy ribs extending from a point above the axle to the hasp.

Price \$0.75 per pair

McKenney Door Hanger

No. 10 \$0.75

Eagle Door Hanger

No. 1 \$0.50

Myers Clover Leaf Unloader

No. 116. For Steel Track.

No. 121. For Wood Track.

Represents the new Clover Leaf Unloader made of malleable iron throughout. Is heavy and substantially made. It is fitted with wide open mouth to receive the fork pulley when approaching in any direction. Also has swinging fork pulley, which relieves the carrier from all strain when drawing hay over a high beam or into a well filled mow. The track wheels revolve on ¾ inch turned steel axles. The rope sheaves have longer hub than any other make of carrier. Are 7 inches in diameter with hard Steel Roller Bearings.

Price \$5.00

HAY CARRIERS

Swivel and Reversible for Double Steel Track

Fig. 1031

Figure 1031 represents the new Clover Leaf Unloader made of malleable iron throughout. Is heavy and substantially made. Is fitted with wide, open mouth to receive the fork pulley when approaching in any direction. Also has swinging fork pulley which relieves the carrier from all strain when drawing hay over a high beam or into a well-filled mow. The track wheels revolve on $\frac{7}{8}$ -inch turned steel axles. The rope sheaves have longer hub than any other make of carrier. The lock is composed of three parts, and has no springs. The locking device grasps the fork pulley on either side, and permits it to swing free.

Price \$3.75 each

Fig. 1032

Has Swinging Fork Pulley—a Great Advantage in Drawing Hay into a Mow When Filled Near the Roof

The above illustration represents the Clover Leaf Unloader as made for wood track. This carrier is fitted with a wide, open mouth to receive the fork pulley. The rope sheaves and track wheels are all fitted with large turned bearings. The machine is both swivel and reversible—combined in one machine. By this device the machine can be reversed by reversing the swivel or by drawing the rope through from end to end.

Price \$3.75 each

HAY CARRIER OUTFITS SPECIAL NOTICE

When requesting quotations do not fail to give exact length of barn, whether ridge or full rafter, and distance between rafters. Also state whether you expect to hoist from end or center of barn.

ESTIMATES FOR HAY CARRIER OUTFITS

Estimate of material required for a Steel Track Outfit for different length barns:

For a 40-foot barn, One Carrier, 36 ft. Track, 12 Hanger Hooks, 12 Rafter Brackets, 1 Harpoon, or Grapple Fork, 3 Pulleys, 3 Floor Hooks, 120 feet, $\frac{3}{4}$ in. Manila Rope, 50 feet, $\frac{3}{8}$ in. Check Rope, 1 Rope Hitch. Estimated Net Price, \$17.75

For a 50-foot barn, One Carrier, 48 ft. track, 15 Hanger Hooks, 15 Rafter Brackets, 1 Harpoon or Grapple Fork, 3 Pulleys, 3 Floor Hooks, 160 feet $\frac{3}{4}$ -in. Manila Rope, 55 feet $\frac{3}{8}$ in. Check Rope, 1 Rope Hitch. Estimated Net Price, \$20.50

For a 60-foot barn, One Carrier, 54 ft. Track, 20 Hanger Hooks, 20 Rafter Brackets, 1 Harpoon or Grapple Fork, 3 Pulleys, 3 Floor Hooks, 185 feet $\frac{3}{4}$ -in. Manila Rope, 65 feet $\frac{3}{8}$ in. Check Rope, 1 Rope Hitch. Estimated Net Price \$23.25

Above estimates of Rope are for an End Hoist. In hoisting from center of barn less Rope will be necessary.

JAP-A-LAC

Made in 21 Colors
and JAP-A-LAC Floor
and Interior Varnish (Natural)

JAP-A-LAC comprises a complete line of interior finishes providing for every requirement of the housewife who wishes to keep her furniture, floors and interior woodwork in spic-and-span condition. It is made in transparent colors, solid enamel colors and Gold and Aluminum, as well as in the natural varnish.

JAP-A-LAC can be used for general re-finishing of all kinds of woodwork, floors, front doors, window-screens, radiators, registers, water-pipes, linoleum and for touching up automobiles, wagons and carriages.

JAP-A-LAC is the most durable floor finish on the market and the best possible finish for all kinds of interior woodwork where extreme durability is required.

It is put up in all sizes from 10 cents to \$3.00. Complete color card sent on request.

The Glidden logo features the word "Glidden" in a large, elegant, cursive script. A thick, dark diagonal line runs from the bottom left of the 'G' towards the middle of the word, creating a sense of motion or a swoosh.

ENDURANCE WOOD STAINS

Intensify the natural beauty of all woods. They are penetrating and owing to the special process used in their manufacture, do not raise the grain of the wood. Their beauty and practicability lie in the fact that an even stain is produced, thus insuring a beautiful, even and lasting finish.

Put up in all size packages from 22 cents to \$2.50

THE COLONIAL PAINT

THE COLONIAL PAINT is a Pure Linseed Oil Paint that has been on the market for many years, and is considered one of the leading brands.

The materials composing this product, carefully treated as they are, make a paint of great toughness and elasticity that has excellent covering capacity and durability.

As the choicest coloring ingredients are used in making this product the richest coloring tone and finest finish is developed, and the building to which it is applied presents a beauty of appearance, which distinguishes it from others in the locality.

THE COLONIAL PAINT is manufactured in forty different shades from which beautiful color combinations can be made, that will not only harmonize with the architectural design of any building, but also with the surroundings, thereby making the property much more attractive, and also increasing its value.

THE COLONIAL PAINT can be sold with perfect assurance that it will meet the demand of every user.

BRONZITE

The Permanent Green Paint

Made from an ore base, Kolonite, which gives it stability of color.

BRONZITE is recommended for the painting of store fronts, doors, blinds, structural and ornamental work, fences, and in fact all outside surfaces generally where a green paint is desired.

BRONZITE is impervious to chemical action, atmospheric conditions, resists heat and is non-corrosive.

BRONZITE is a specialty green, the green that is different—it lasts, wears and holds its color, and covers more surface than other greens.

BRONZITE is put up in six shades, in paste form in 12½ and 25 lb. pails, also liquid form.

VEL-VE-TA

The Sanitary Washable Wall Finish

VEL-VE-TA is manufactured under a patented formula—contains no lead or other poisonous pigments, and although applied to the surface like an oil paint, when dry it is non-absorbent, can be washed with soap and water, and is therefore sanitary.

It dries with a beautiful, soft and velvety finish, which is pleasing and restful to the eye.

It will not turn yellow, crack, craze or peel. It will not show laps, streaks or brush marks.

VEL-VE-TA is recommended for the interior decoration in homes and public buildings, and in factories. It is especially adapted for this use because it effuses light.

A beautifully designed booklet showing combinations, and giving specifications for the application of **VEL-VE-TA** will be furnished upon request.

COLONIAL WAGON AND IMPLEMENT PAINT

For farm wagons, machinery and implements.
Dries with a high durable gloss.
It is money well spent to protect implements from rust and decay.

INTERIOR FLOOR PAINT

"Made to Walk-On"

Excels in lustre, toughness and elasticity. Dries hard over night.
Manufactured in nine colors—Brown, Dust, Yellow, Gray, Red, Drab, Spruce and Green.

COLONIAL VARNISHES

Every varnish offered is especially made and adapted for its particular class of work, and for that work cannot be excelled.

Outside Door Varnish

For outside doors, store fronts, settees, spars and general exterior work.

Bathroom Varnish

For bathrooms, window sills, kitchens, etc.

Interior Finish Varnish

For mantels, balustrades, inside doors, and in fact adapted for the finest grade of interior work of all kinds.

Floor Varnish

For floors, stairs, vestibules, etc.

Cabinet Varnish

For tables, desks, and other articles of furniture.

Forcite (Liquid or Japan)

A very strong dryer, to be used in ratio of 1 part dryer to 15 parts linseed oil.

No. 78 Hard Oil Finish

A light hard oil finish for interior work; flows freely leaving a lustre finish.

No. 1 Furniture Varnish

A heavy bodied varnish for use on ordinary furniture.

N. Liquid Dryer

A strong dryer that will mix readily with oil.

No. 1 Coach Varnish

Light in color, works freely under the brush; suitable for interior work where a moderate drying varnish is required.

Adhesium—Modern Wallpaper Size. For use in preparing almost any kind of surface for the reception of wallpaper, burlap, linerusta and other heavy wall coverings.

Amalgam Paint—A preservative coating for wood, metal and other exterior surfaces.

Automobile Carriage Paint—For painting and varnishing all kinds of vehicles in one operation.

Colonial Bath Enamel—For use on tile, metal, wood or other surfaces in the bathroom or about the bath tub.

Colonial House Paint—A standard brand of ready mixed house paint manufactured in forty shades.

Colonial Interior Floor Paint—For coating of interior floors, where high gloss is desired. Dries hard over night.

Colonial Quality Colors in Oil—Manufactured from purest and strongest pigments that can be obtained.

Colonial Screen Paint—For coating wire screens. Will not clog.

Colonial Wagon Paint—For farm wagons, machinery, etc. Dries with a high gloss, and protects surface to which it is applied.

Colonial Wax Floor Paint—For outside use only. Very durable.

Chalco Paint and Varnish Remover—For removing paint or varnish.

Dry Colors—High grade in every respect.

Eagle Varnish Stains—A high grade stain and varnish combined.

Eagle White Enamel—For interior decoration of woodwork, etc.

Graining Colors—Guaranteed to be satisfactory to master grainer.

Velveta Concrete Floor Paint—For coating concrete surfaces.

Whitney & Griffin Barn Red—For painting barns, fences, etc.

Putty—Evenly ground and of good working value.

Varnishes—Highest grade products in the field.

White Lead—Short fine and of exceptional whiteness.

WOOD AND IRON PUMPS

PUMP DEPARTMENT

The growth in this part of our business has been extremely large and has necessitated a large development in this line.

We are now prepared to give all orders and inquiries of this nature the attention of experienced men and will gladly quote prices and give detailed information on any outfit desired.

REMEMBER we carry the largest stock of Pumps and fittings in the State, and can handle your orders promptly and satisfactorily. We also wish to call your attention to our suburban water systems following our Pumps.

CUCUMBER WOOD PUMPS

The very best of material is used in our wood pumps. They are superior to any made of Cottonwood and will not taint the water.

Fig. 406

The Myers Imperial Working Head

Fig. 1584—No. 389—Illustrates the Myers Imperial Working Head, which is built on the general plan of the Imperial Underground Three Way Pump, with 1½ inch air chamber and 1¼ inch discharge. The Three Way is fitted for 1½ inch pipe; the crosshead carries a 3 inch pipe through which a 3 inch plunger can be removed. It is especially adapted to tubular wells. The jack forms a part of the pump head; is mounted directly on the base of the pump, to which it is securely bolted. The gears are machine cut, back geared 5 to 1. Has 6 inch and 9 inch stroke. Belt pulley 14 inches in diameter.

NOTE—One special feature of this outfit is that the part forming the jack can be removed from the base of the pump, thus making it easy to handle in placing in the well. In fact, it is just as easy to install this working head as it is to set an ordinary Underground Three Way Pump. With 14-in. Pulley, Price, \$20.00

Myers Vertical Power Hydro-Pneumatic Pump

Figure 1440—FOR PRESSURE TANK WORK. Double Acting and Back Geared 5 to 1.

The special advantage of this style pump over an independent Air Compressor is that it admits just enough air at all times to keep Pressure Tank in proper working condition, whereas—when separate Air Compressor is used—it is often overlooked until Tank becomes water-logged.

The air can be admitted or cut out by tightening or loosening the air cap.

Capacity 360 gallons per hour.

HAND SPRAYERS

LOWELL COMPRESSED AIR SPRAYER

Lowell Compressed Air Sprayer

Does not require constant pumping.
Has an automatic thumb lever valve.
Most practical for Orchard, Field and Garden Work.

One pumping will expel entire contents of tank and is sufficient to spray 2,000 plants. Spraying nozzle may be reversed to spray under side of bushes and plants. The Automatic Thumb Lever Valve is at all times under complete control of operator—hence none of the solution is wasted. It saves its cost in making a given amount of compound do so much more work. An Adjustable Shoulder Strap and Tree Attachment with suitable couplings for orchard and tree spraying, furnished with each machine. Aluminum finish. Capacity 3 gallons.

No. 110 Galvanized Steel \$5.00
No. 111 Brass 6.50

"Kant Klog" Sprayer

"Kant Klog"—Style G

The tank of this sprayer is made of heavy polished brass or galvanized steel as ordered. Top and bottom are seamed very strongly to sides under heavy pressure making very strong construction.

Price of Style G, with galvanized steel body, brass air pump, hose, escape-valve, "Kant-Klog" nozzle, spring shut-off and carrier strap \$4.00
Polished Brass Body, with same attachments \$6.00

No. 330. Galvanized Tank Price \$6.00
No. 331. Copper Tank Price 9.50

Fig. 1358

Fig. 547

MYERS POTATO SPRAYER

The most practical potato sprayer ever put on the market; it can be attached to any wagon, is very simple in construction and durable, nothing about it to get out of order.

This sprayer was gotten up to meet the demand for a practical and efficient sprayer at a low price. The power sprayers that have been put on the market during the last few seasons have proved very unsatisfactory and at a price that is much more than the average farmer is willing to pay.

This sprayer can be readily adjusted to rows any width apart, the liquid is conducted from the pump by two lines of rubber hose, making the pressure on the nozzles uniform, thereby insuring a perfect spray from all the nozzles at once.

This sprayer is fitted throughout with brass connections and high pressure rubber hose, the liquid not coming in contact with the iron pipe in any way.

Every sprayer guaranteed to give perfect satisfaction. We do not furnish barrel with sprayer, as they can be obtained nearer home at quite a saving in freight charges.

Price, 4 row attachment complete less Pump and Barrel,

\$7.50

Fig. 1570. O. K. Cog Gear Spray Pump, mounted complete with 50 Gallon Barrel, has Mechanical Agitator, solid brass Ram Plunger, Ground Bevel Valve and Seat.

We carry a very complete line of repairs for all Myers House and Outdoor Pumps.

Fig. 1570

SPRAY PUMPS

The cog gear increases the leverage 25% over the ordinary plain handle. The special features are the cog gear, the malleable iron base, which is adjustable and is made for end or side of barrel; base for end of barrel is furnished regularly. If pump is wanted for side of barrel, must be stated on order. The plunger is a solid brass tube with closed end, is outside packed, with hemp packing. The packing gland is adjusted by two bolts. The valve and seat are hard brass. The air chamber is 2½ inch. This in connection with the cog gear enables the operator to carry a pressure of 200 or more pounds, if necessary.

PRICE LIST Represented by Fig. 1542

Price \$27.00

Fig. 1518

MYERS POWER SPRAY OUTFITS

Figs. 1591 represent the Myers Power Spray Outfit. It is furnished complete, including hose, nozzles, bamboo extensions, pump, tank, agitator, etc. The entire frame work is made of channel and angle iron, making a very stiff frame with the least possible weight. It is fitted with a wrought steel bed plate on which the engine and pump are mounted, thus making a solid foundation which will not vibrate when under the most extreme pressure. The tank is made of selected cypress, holds 200 gallons, has four hoops, is fitted with a rotary agitator with wooden blades. The Agitator is driven by a link chain, which makes a flexible joint and relieves the tank from all strain. The inside measurements of the cab are: Width 40½ in., height 36 in., length 48 in. The distance from the edge of cog gear on pump to the rear end of cab is 26 in.; thus affording room for any size engine up to 2½ H. P. The cab has sliding doors for protection of the engine and pump. The sills are placed 26 in. apart which permits a short turn of the wagon. The guard rails on the top are to protect the operator from falling off. Fig. 1591 shows the cab open.

Equipment as Follows

- 1 50-foot lead of ¾ in. discharge hose.
- 1 10-foot lead of ¾ in. discharge hose.
- 10 feet wire bound suction hose.
- 2 10-foot Bamboo Rods with shut-off.
- 4 Fembro Nozzles.
- 2 Fig. 1560 Ys.
- Rotary Agitator.
- Cut-offs for discharge lines.
- Relief Valve.
- Pressure Gauge and Strainer.

SUBURBAN ELECTRIC LIGHTING AND POWER SYSTEMS

TESTIMONIALS

Winterport, Me., Jan. 24, 1914

Gentlemen:

The lighting plant has been all that you agreed and given entire satisfaction. It is simple to operate and requires very little care. Doing chores with a lantern is like doing them in the dark after having used your plant.

E. O. SHAW.

Alfred, Me., Jan. 24, 1914

Sirs:

It gives us great pleasure to add our testimonial about the Electric Light Plant which you have just installed for us. It works perfectly and gives us great satisfaction and with very little expense. Would recommend it to any one. We also thank Mr. Lewis for the able manner in which he installed the plant.

FRANK RUSSELL & SON.

Norway, Me., Jan. 24, 1914

Gentlemen:

The Dean Lighting Plant that we bought of you is giving the best of satisfaction. We get all the light we want and where we want it. We run the Generator twenty minutes every night before we separate and stop as soon as we finish. The lights are perfectly steady, and we do not see any flickering which we think is very fine.

B. TUCKER & SON.

SUBURBAN ELECTRIC LIGHTING AND POWER SYSTEMS

TESTIMONIALS

Wales, Me., Jan. 26, 1914

Gentlemen:

We are very glad to inform you that the Dean Homelite Electric Lighting System you installed for us about a year ago has proven very satisfactory in every respect. We find it economical and simple to operate and would not do without it and go back to the old lamps and lanterns for a great deal more than it cost. By charging battery twice a week, it gives us all the light we want in house, shed, stable, barn and two cellars.

A. C. FROST & SON.

Turner, Me., Jan. 24, 1914

Dear Sirs:

In regard to the Dean Electric Plant that I bought of you and installed last April, 1912, will say that I am more than pleased with it. The cost of running is very small. I never bought anything that gives me the satisfaction the Lights do.

S. W. CARY.

Auburn, Me., Jan. 24, 1914

Gentlemen:

Replying to your recent communication relative to the electric lighting plant you installed on my farm at West Auburn, would say: It has done everything you claimed for it, is dependable, economical, safe and solves the problem of isolated lighting in a very satisfactory manner. This with the water system which you installed brings the comforts and conveniences of the city to the rural districts, no matter how isolated they may be.

W. J. RENWICK, M.D.

Turner Center, Me., Jan. 24, 1914

Gentlemen:

I installed one of your lighting plants in March, 1913. Will say that it is all you claim it, and has not been found wanting in any respect whatever. Would not have the plant taken out for double the cost, unless I could have another installed.

E. W. ANDREWS.

Electric Lighting and Power Systems

The object of the Dean Homelite Plant is to provide for the isolated home, conveniences that are found in the city home today. Thus, the farmer is now enabled to do his chores by light that is practically as clear as day light and eliminates danger of fire caused by using lanterns and lamps. The housewife is made happy by the advent of electric lights in her home. No more kerosene lamps to fill and wicks to trim, no more offensive odors and filthy labor to perform, and fire dangers are eliminated and insurance cost reduced.

RATING

Dean Homelite Plants are rated on the basis of using 30 volt, 20 watt, 16 candle power Tungsten lamps. We have selected the 30 volt system as the safest one for the average home—you being protected from electric shocks.

The Dean Homelite Plants consist of a storage battery, generator and switch board. The generator is mounted on skid with engine and everything is assembled in the most compact form.

If you are interested in a lighting outfit of the above nature we would be pleased to send you a complete catalog or send our representative to call on you, or by giving us the necessary information by answering questions below, we can estimate the cost to you.

Total number of 16 C P lamps to be used during the day.

Total number of 16 C P lamps to be used during the evening.

Total number of 16 C P lamps to be used during remainder of night.

Give number and kind of electric devices and hours of service which will be used, such as fans, motors, washing machines, flat irons, vacuum house cleaners, coffee percolators, power motors for pumping, cream separators, etc.

Number of rooms in house which are to be wired.

Number of out buildings to be wired.

Approximate distance in feet from house to each out building.

WARRANTY

We guarantee our "Homelite" to develop their actual rating and to work satisfactorily when installed and operated according to our instructions. We will replace or repair, free of charge, at our factory, any part showing inherent defects, for a period of two (2) years from date of purchase, providing that such part or parts showing defects are delivered to our factory prepaid.

PNEUMATIC WATER SYSTEMS

Fig. 105

HASKELL

Double Riveted Air-Tight Pneumatic Water Tanks will give you all the benefits of a city water works with no water rent bills to pay.

Have running water in your kitchen, bathroom, barn and other buildings and secure at the same time, fire protection for your property. It solves the problem for the suburban home, the club-house, the summer cottage, and incidentally other problems.

Pressure Tanks can be operated by pumps using wind mills, gasoline engines or hand power.

Fig. 106 represents a system operated by a hand pump. You can get some idea how cheaply these systems can be installed when you realize that we can furnish you one 30x6 tank, 220 gal. capacity including one Double Acting Air and Water Pump, one Air Pressure Gauge, one Brass Gate Valve, one Water Gauge, one Faucet, one Stop and Waste, one Swing Check Valve, all for around, \$70.00.

FITTINGS

We carry a full line of engines, pumps, galvanized pipe, malleable fittings, brass fittings such as faucets, check valves, etc.

We will be pleased to figure on your requirements. Send for catalog and further information.

Quality in a Tool is Remembered Long After the First Cost is Forgotten

NEW JOHN DEERE TWO-WAY SULKY PLOW

With the Auto Foot Landing Device

ADVANTAGES OF THE TWO-WAY PLOW

First—The ground can all be turned one way, leaving no ridges and no dead-furrows in the field. This is true no matter whether working on level ground or on a side-hill.

Second—No time is lost working out irregular “centers” and small patches where the nature of the ground is such that neither square nor rectangular “lands” can be laid out for plowing.

Third—In plowing side-hills the ground can all be worked one-way. Every furrow can be thrown down hill if that method of plowing is desirable.

Fourth—It enables you to plant close up to the plowing, following the plow immediately with harrow and seeder before the ground dries out.

Construction

The John Deere Sulky Plow represents the highest type of material and workmanship that is possible to procure. The entire frame and beams are constructed entirely of high carbon steel, hence are very strong and durable.

The new style foot landing device is the most satisfactory ever used and by its use and the horselift operated by foot power the plow can be operated very easily.

Extra wide and long steel frame. Track wider than the ordinary plow, making it run steadier and less liable to overturn.

Sizes

	Cuts
1342S-1442S Medium size	3 to 8 in. deep 12 to 16 in. wide
1341S-1441S Large size	4 to 9 in. deep 14 to 18 in. wide

Fitted with either Jointers, Hanging Cutters or Fin Cutters. Two or Three-Horse Eveners.

If Interested Send for Special Circulars and Prices

THE SYRACUSE REVERSIBLE SULKY PLOW

For Hillside or Level Land

For a great many years the Syracuse plows have been among the most popular in New England and their work easily gains them that distinction.

These plows are equipped with Hardened Steel Mouldboard, Steel Landside and Chilled Frog and Share. Furnished with either two or three-horse equipment.

Price and Special Circulars mailed on application.

SYRACUSE COMBINATION WALKING PLOWS

This particular pattern is one of the best suited for conditions in this territory. Fitted with Hardened Steel Mouldboard, Steel Landside and Chilled Share. No. 32—Medium Two-Horse. No. 31—Large Two-Horse.

This type has also been very popular in Maine. It has the well-known Syracuse straight style of Beam, which gives ample clearance room. No. 443. Small Two-Horse. No. 442. Large Two-Horse.

SYRACUSE CONTRACTORS' PLOW

Hard iron wearing parts. Extra heavy Beam, Share and Strip Steel Wheel Frame. Loop Handle wear Irons. An excellent Plow for general grading purposes.

Special Catalog on Syracuse Plows mailed on Request

JOHN DEERE
MOLINE ILL.

JOHN DEERE WALKING PLOW

GENERAL PURPOSE SERIES

The Share is hardened Soft Centre Steel, which may be drawn out and resharpened when dull. The Moldboard is Soft Centre Steel and Double Shinned by welding a piece of solid steel to the edge where the hardest wear comes. The Landside is thicker by far than is to be found on any other Plow and is fitted with a runner, or slip heel, which takes all wear from the bottom and reduces friction.

The Plows of this series are built to work in old ground, stubble or tame sod.

Having a low, wide throat it leaves a clean furrow for the furrow horse and plowman to walk in. They have a wide, easy turn of the moldboard, which gives them lightness of draft, and are general favorites in all the New England States.

Sizes	Wgt.
MP 11—Small Two-Horse	132 Lbs.
MP 13—Medium Two-Horse	138 Lbs.
MP 15—Large Two-Horse	144 Lbs.

We also furnish this same style Plow with a Combination bottom having Chilled Share and Landside at less price than the All Steel Plow.

SYRACUSE DIAMOND PLOWS

Cast or Steel Moldboards. Chilled Shares. The Syracuse Diamond Series of Hillside or Swivel Wood Beam Plows are much used in the New England States, for which section they are splendidly adapted because of their exceeding light weight, strength and good capacity. Their turning qualities are excellent both in sidehill or level land.

Provided with a reliable and quickly adjusted side-shifting Clevis which will be found a great convenience. The two-horse sizes are fitted with an automatic shifting Colter.

The Diamond C2 Plow is furnished with Cast Moldboard only.

No.	Furrow	Weight, Plain
Dia. C2 Light One-Horse	3 to 5 in. deep, 7 to 8 in. wide	85 lbs.
Dia. B2 Light Two-Horse	4 to 6 in. deep, 8 to 10 in. wide	126 lbs.
Dia. A2 Medium Two-Horse	5 to 7 in. deep, 11 to 14 in. wide	130 lbs.

Complete Syracuse Catalog and Prices on Application

DEERE MODEL B DISC HARROW

A REALLY FLEXIBLE DISC HARROW

Distinctive Feature

Flexibility and perfect control. Exclusive spring pressure. High steel gang frames. High arch frame. Oscillating scrapers with lock-off device.

Gangs Act Independently

The Deere Model B will do satisfactory work in uneven or stony ground. Ordinary disc harrows will not do this because of their rigid construction.

When either gang of a Model B passes over an obstruction it rises while the other remains at work as though nothing had happened.

It cultivates all the ground passed over. •

The gangs may be set at any angle or each at a different angle, to suit conditions. When working on a side hill the tendency of a disc harrow is to crowd toward the bottom or when overlapping, toward the soft ground.

In Model B this is easily overcome by giving the crowded gang a slightly greater angle.

Leaves Little "Middle"

Disc harrows usually leave a considerable strip of ground between the gangs which is not cut because the bumpers, or gauge casings used are large and throw the gangs a considerable distance apart.

All side thrust in the Model B is borne by frame and bearings. Since no gauge casings

are necessary, the gangs are brought close together and leave little or no middle.

Oscillating Scrapers

Deere scrapers may be locked at the edge of the discs, locked off the discs, or operated as swinging scrapers by the foot levers.

Each scraper can be instantly removed, adjusted or replaced.

These are the most satisfactory scrapers found on any disc harrow.

Eveners

Eveners, singletrees, and doubletrees are made of white oak.

This is in harmony with the Deere policy of furnishing the best for the purpose, even at a greater cost.

Model B Cutaway

This harrow is the same as the standard Model B except the discs and scrapers. The discs are of the cutaway style and the scrapers are flanged at the bottom giving them greater width than the regular scrapers and preventing them from sliding off from the edges of the notched discs.

The user of a Deere Disc Harrow is always a satisfied customer.

Send for Illustrated Folder on How to Prepare Better Seed Beds

Model K with Tongue Truck

DEERE MODEL K DISC HARROW

6, 7 AND 8-FOOT WIDTHS

A Two-Lever Harrow

Controlling each gang of a disc harrow independently of the other is a distinct advantage. You can do this with a Deere Model K.

Two angling levers make it easy to adjust the harrow for hill-side work, or for overlapping, by giving the gangs different angles.

Steel Frame

A single piece of heavy steel constitutes the main frame.

Great strength and clearance is obtained by making the frame in the form of an arch.

The gangs are connected directly to the ends of the main frame.

The gang frames are also made of steel and all frame bars, cross ties and braces are securely fastened together.

Disc Blades and Gang Bolts

Disc blades are made of the very best material. They are thoroughly polished and sharpened.

After a disc harrow has been assembled, it is impossible to tell the size of the gang bolts. This should be investigated before buying. Deere gang bolts are of heavy steel with forged heads. The nuts are securely held by lock washers which prevent their coming loose.

Bearings

Hard maple, oil-soaked bearings are used, because experience has proved that they wear longer and are more easily replaced than others.

Extension oil tubes pass through the weight boxes to the bearings. The tops of the tubes are closed by spring screw caps to keep out the dirt and dust.

Scrapers

Every disc harrow user is familiar with the old style troublesome scraper. The improved oscillating scrapers used on Deere harrows are the most simple and satisfactory ever devised. They may be locked off the disc, at the edge of the disc, or operated as swinging scrapers.

When used as swinging scrapers, they are operated by the foot treadle.

Each scraper can be removed, replaced or adjusted independently of all the others.

Further there are no rivets, set screws or other objectionable features.

Stub Poles

All Deere Disc Harrows are built with stub poles. For this reason they are easily stored and the three-horse hitch and set over tongue may be used on either side.

The stub pole construction also permits the operator to use the harrow with a rigid pole or with a tongue truck without extra equipment.

The poles are securely bolted to the stub with four heavy bolts which have large cast washers.

Tongue Truck

The above illustration shows a Deere Model K equipped with a tongue truck. One of these trucks can be furnished with any Deere Disc Harrow at a slight additional cost.

The Deere Disc Harrows operate without neck weight and for that reason a tongue truck is of no advantage in this respect.

It is sometimes useful as a guide to the harrow.

The Deere Tongue Truck is subjected to no draft strain, the harrow being drawn from the stub pole.

DEERE DOUBLE ACTION DISC HARROW

One working of the DEERE DOUBLE-ACTION HARROW accomplishes more thorough pulverization of the soil than two separate operations because with this harrow the second working takes place immediately after the first, and the partially broken-up soil does not have time to dry out and is, therefore more finely pulverized by the action of

the second section of the harrow. We recommend using plain discs on the front section and cutaway discs on the rear section and by their throwing in opposite directions the greatest efficiency in a harrow will be obtained. The front section can be used alone any time desired.

Special Circulars and prices on application.

DEERE MODEL R ORCHARD HARROW

This harrow is constructed to especially meet the requirements of orchard cultivation and it can also be used as an ordinary harrow. The Gangs are reversible for in or out throw and are adjustable in or out on the harrow frame and extension frame.

By use of an extension frame the gangs can be spread to a distance of over ten feet between them. This allows cultivation under overhanging branches. Can be furnished in either 4, 5 or 6 ft. widths. Unexcelled for orchard work.

Send for full descriptive catalog and prices.

DEERE NO. 7 COMBINATION TONGUE TRUCK

The New Deere Combination Tongue Truck and Fore Carriage illustrated herewith will fully meet the requirements of all disc harrow users. It is simple, strong and compact in construction. The hitch is made to the vertical, standard and the truck therefore turns and is controlled in its movements by the direction of pull on the eveners. The axle is pivoted in the center allowing either wheel to pass an obstruction without any strain whatever. The whole are solid steel with wide oval tires and with closed bearing boxes. By simply changing tongue iron can be changed from two to three horse hitch.

Can also furnish No. 5 Truck for wood stub tongue.

Send for special circular giving full description.

DEERE UNIVERSAL SPIKE TOOTH HARROWS

This harrow is made of steel throughout. The tooth bars are made of U-bar steel, which insures strength without useless weight. The teeth are fastened on by our patent tooth fastener, which holds the teeth firmly, yet permits of its being removed to be replaced by new teeth, or to turn the tooth to present a new corner to the work. The side bars are made of I-bar steel, shaped to give even

spacing of the teeth. These bars form a guard, which prevents the tooth bars from catching on shrubbery, trees, or in vineyard and orchard work. The lever allows the teeth to be angled to any desired position. The lever is provided with a spring trip, which allows the teeth to give in stony or rooty ground, and saves a large amount of breakage.

SIZES	
Universal, 1 section one horse.....	
Universal, 2 section two horse.....	

Sizes	Weight, Pounds	Price

15 Tooth	\$15.50
10 Tooth, one horse, top Handles	\$9.50
10 Tooth, one horse, less Handles	\$8.50

ORIGINAL PERRY HARROW

The Wood Frame Perry Harrow is the most durable of the Spring Tooth Harrows. Is simplicity itself. Iron plated on the under side and in front, the entire length. Teeth cannot get loose. No levers or joints to wear and get out of repair. Harrows of this kind have been in constant use for fifteen years.

	Weight Pounds	Price
16-tooth	184	\$9.50
18-tooth	227	\$10.50

SYRACUSE WING POTATO HOE

The Potato Hoe has proved to be one of the most valuable tools obtainable for use in covering or hilling potatoes, celery, beets and similar crops.

There is an adjustment for tilting blades up or down to procure proper angle to meet conditions. Price, \$6.50

HUSSEY WING POTATO HOE

There has always been a large demand for this well known Hoe. They are always constructed of the best materials and are invariably satisfactory to our customers. These are fitted with an adjustable extension on the wings which is a decided advantage.

Price, \$6.50

DISC POTATO HOE

A great many persons prefer the disc type of hoe in preference to the wing. Standards are movable on cross-bar to allow spacing of discs.

Can also furnish this style fitted as a combination with both wings and discs.

Prices

Disc Hoe with 20 inch discs \$7.50

ACME TWO-HORSE RIDING HARROW

The Acme Standard Two-Horse Riding Harrow has two coulter sections and is flexible. The harrow may be made rigid when desired by braces provided for this purpose. Each section has six coulters, making twelve in all. Width of cut is 6 feet 6 inches. Weight, 125 pounds.

Acme harrows are made in various styles and sizes to do the best work in different farming sections of the country.

Send for Full Descriptive Catalog and Prices.

DEERE WALKING CULTIVATORS

No. 6. 5-Tooth Steel Cultivator with Horse Hoes, Sweep and Gauge Wheel.

It is not often necessary to follow a John Deere Steel Cultivator with a hoe. Most cultivated crops can be entirely worked with it without the laborious hoeing often required to complete the work when an ordinary cultivator of its type is used.

John Deere Steel Cultivators are especially adapted for cultivating any crop planted in rows far enough apart to permit the use of a horse-drawn cultivator. They are also favorites with market gardeners.

The illustration above shows the five-tooth cultivator equipped with horse hoes, sweep, and gauge wheel. The horse hoes are reversible and can be set for throwing soil toward or away from the plants.

The seven-tooth cultivator may be equipped in the same way, but is shown with double-pointed steel shovels.

The expanding lever brings the hoes or

shovels close together for narrow rows, or throws them as far apart as is desirable for wide rows.

This lever works easily and saves considerable time usually lost in loosening or tightening set screws, or handling other adjusting devices.

No. 14. 7-Tooth Steel Cultivator.

DEERE WALKING CULTIVATORS

Deere No. 6. 5-Tooth Steel Cultivator with Double Lever Front and rear Gauge Wheel.

When absolutely uniform depth of cultivating is required, two adjustable gauge wheels are necessary.

The John Deere Steel Cultivators can be so equipped when desired.

The front gauge wheel is adjusted by means of a lever within easy reach of the operator. The depth of cultivation can be readily changed by means of the lever without the use of a wrench, or loosening of any nuts. Furnished at a slight additional cost.

The rear wheel adjustment consists of a ratchet and spring device operated by a foot-trip.

The illustration below shows the long hillers used for hilling up celery, tomatoes and other plants which require a large amount of soil to be moved.

The Celery Hillers can be used on the Deere 5 or 7 Tooth Cultivators.

The front gauge wheel lever and rear gauge wheel, with foot lever, may be used on 5 and 7 tooth cultivators, and are priced as attachments on previous page.

The Long Hillers are Especially Adapted for Work where a Large Amount of Soil Must be Moved.

Prices quoted on previous page.

DEERE WALKING CULTIVATORS

John Deere Combination 14-Tooth Steel Cultivator and Harrow

The Deere 14-Tooth Steel Combination Cultivator and Harrow shown above is adapted for close work among very small plants. It stirs the soil thoroughly, but does not throw any dirt on the plants. However, it is more than a cultivator, it is an excellent smoothing harrow also. The steel teeth are reversible, each one having a small cultivator tooth forged at one end, and the other being straight and sharp.

This cultivator is often used to break up the baked surface of a planted field so the plants can get through the ground much easier.

The Combination Cultivator and Harrow is regularly equipped with expanding lever, and can be furnished with or without gauge wheel.

Price, \$5.00

HALLOCK WEEDERS

They need no introduction, having had a large trade throughout the New England States. It does most efficient work for all kinds of crop cultivation, such as corn, potatoes, tobacco, etc., and by removing teeth

over row, after crop has advanced, will cultivate several rows at once. Used as a walking or riding weeder, and with seeder attachment.

Weight, Pounds Price

121 \$10.50

128

Hallock, 7½ feet, flat tooth

EUREKA FLAT TOOTH SULKY SMOOTHING CULTIVATOR WITH GRASS SEEDER ATTACHMENT

Machine complete consists of one grass-seeder box, one grain-seeder box, and the weeder head, etc.

As a Weeder. It is the only flat-tooth weeder ever placed upon the market, and is a wide departure from the round-tooth weeder. Our experience in building weeders has extended over many years, our experiments have been thorough, our conclusion is, every farmer who will try the **Eureka Flat-Tooth Smoothing Cultivator** will say yes to every word we have said in its favor. As a grass-seed sower it is a great success.

The seeder boxes are detachably connected, it is correct as to sowing and covering, and is easily changed to sow the required amount (from 2 to 20 quarts) of grass seed and required amount of grain, convenient to handle,

and to throw in or out of gear. The seeder boxes, being near the ground, distribute the seed evenly; windy days make no difference. We have placed a good many with the farmer within the last year, all giving absolute satisfaction.

Eureka Sulky Cultivator

	WEIGHT

10 feet with Grass Seeder..	247
12 feet with Grass Seeder..	277
Grain Seeder for above	

THE EUREKA SECTIONAL WEEDER

Has a solid center section, 2 feet 9 inches long, made of channel steel $1\frac{1}{2} \times 1\frac{1}{2}$, with thills adjustable to height of any horse and handles adjustable to man or boy, with two hinged wings bolted to center section, 2 feet 3 inches long. This gives Weeder three sections, each section working independently and conforming to the inequalities of the

ground, doing equally good work over dead furrows, cradle knolls, hollows, etc. We claim for the Eureka Weeder that it will do the work of **Three Men, Three Cultivators and Three Horses**, and do it in much better way than it is possible to do it where the Weeder is not used.

Eureka Sectional Weeder

**Send for Full Descriptive Circulars and Prices on Our
Complete Line of Weeders**

JOHN DEERE KA-65 PIVOTAL AXLE CULTIVATOR

Equipped with Spring Trip Rigs

Serviceability

The **John Deere Pivotal Cultivator** is adapted for work in corn, potatoes, beans, in fact, most any crop grown by the general or truck farmer.

Wide or Narrow Tread

The tread of the wheels can be varied as much as thirteen inches. The **Pivotal Cultivator**, therefore, can be adapted to any width of row from 24 to 48 inches.

Frame does not overhang the wheels at any adjustment.

Pivot Wheels

This feature is particularly useful for hill-sides or for work in irregular rows, when the wheels, guided by the feet, may be instantly turned to the right or the left as desired. Foot rests are so arranged that they may be easily adjusted to any position necessary for the convenience of the operator in controlling the wheels.

Wheels may be made rigid for level work by a hook rod attached to the frame bar, engaging with the clamp on the adjusting bar. Wheels are 32 inches in diameter, 2½ inch concave tire, staggered spokes, and are equipped with oil-tight, dust-proof, screw-cap, long-distance boxes.

The Pole

Pole has an up-and-down adjustment at the

rear end for the purpose of regulating depth of the front shovel and leveling the machine to suit any height of team.

Rigs

High carbon channel steel is used in constructing the rigs. The beam of each rig is double and punched with holes at equal distances, enabling the user to have two, three or four shovels on a side at any desired space.

Rigs have a lateral adjustment of nine inches, and can be widened or narrowed while the shovels are in the ground by a small lever within easy reach at the left of the operator. They also extend out beyond the wheel far enough to allow the rear shovel to cut out the rear track.

Close Fitting Couplings

The couplings have an adjustment for taking up the wear, thus always insuring a close fit on the shifting bar.

The Side Levers

These serve to raise and lower the rigs and to regulate their depth in the ground. Each is equipped with a compression spring which exerts an even or yielding pressure on all the shovels. By removing the cotter on top of compression spring, they are readily converted into floating rigs.

Also furnished, if desired, with Spring Teeth in place of Spring Trip Hoes.

Send for Special Circular and Prices

NEW DEERE No. 24 DISC CULTIVATOR

LIGHT, STRONG, CONVENIENT

Made of Malleables and Steel

A disc cultivator must be strong, but undue weight must be avoided.

For this reason malleable instead of gray iron castings are used in the NEW DEERE.

It is light and so strong that it is not liable to break.

Main Frame

If a cultivator is to do good work, its parts must be kept in their proper positions.

This is a part of the work of the frame and if it is weak, it is liable to spring and throw the whole machine out of line.

The NEW DEERE frame has strength and stiffness to withstand any strain liable to be put upon it.

High Arch

A higher and heavier arch is used in the NEW DEERE DISC than in the ordinary cultivator of its type. For this reason it is worth more.

Higher corn can be cultivated, hence more cultivations can be given before being laid away.

The effect of the extra cultivations will show up at harvest time. The crop will be cleaner and freer from weeds, hence easier gathering.

Axle Adjustment

The axles are carried in a tubular cross brace. By loosening a screw, the axles can be adjusted for wide or narrow cultivation without disturbing any other part of the machine.

Gang Adjustments

A lever and rack device is used for angling the gangs. A similar device is used for tipping them.

It is not necessary to take the gangs off to reverse them, merely loosen a nut, swing them around and tighten the nut.

Pressure Springs

Extra long and very flexible pressure springs are used.

Any pressure up to the weight of the cultivator can be placed upon the gangs with these springs.

The Dodge

The NEW DEERE No. 24 has a lever dodge which is operated from the seat.

The cultivator can be made rigid by locking this lever in the center notch of the rack.

For work in a circular row, the lever can be set at the proper angle and locked.

A Boy Can Operate

The lifting levers are provided with lifting springs, not because they are needed but to make the operation that much easier.

Attachments

There are several special attachments for this cultivator by means of which it can do any kind of work successfully.

Special Catalog and Prices on Application

DEERE NO. 9 CORN PLANTER

EDGE DROP

A Good Corn Planter Pays

It pays to secure an accurate stand of corn. Five stalks in one hill and one in another does not pay. In one instance the soil is over-taxed and will not produce good ears—in the other the producing power of the soil is not utilized to its full extent. In both cases there is a loss.

Every farmer knows how many kernels to the hill his land requires and the planter that can be depended upon to drop that number with uniformity, insures the greatest yield.

Why Deere No. 9 is Most Accurate

There is slight variation in the thickness of corn kernels, but they vary greatly in width. In the construction of the seed plates and hopper bottom lies the reason for **Deere No. 9** accuracy.

To begin with, every cell must receive a kernel edgewise, but to insure this it must be slightly larger than the kernel. Sometimes, therefore, a second kernel might enter. To overcome this, the **Deere No. 9** seed plates and hopper bottoms are so constructed that the cells diminish in depth and width as they revolve toward the cut-off. The extra kernel

that may have partly entered at the point of filling, is excluded and only one is delivered to the valves.

All that is necessary then to plant any number of kernels is to revolve the seed plates far enough to collect and deposit that number in the valves.

The **Deere No. 9** will do this more uniformly than any other planter.

Tilting Hoppers

In construction and convenience the **Deere** tip-over hopper is unequalled.

The gear ring is held stationery and is always in proper time.

Seed plates cannot be put in wrong, they will not fit unless put in correctly.

In changing plates the upper valve is not exposed and there is no danger of brushing the hill of corn off and losing it.

A flat spring at the side of the hopper bottom holds the seed plate and bottom plate in position while returning the hopper to the upright position.

The hinge is wide and holds the hopper securely in position.

DEERE NO. 9 CORN PLANTER

(Continued)

Hoppers

One thumb nut instead of two is used to hold the hopper in place.

The cover is a sliding lid, which effectually prevents spilling the corn.

Force Drop

A positive drop discharges the kernels downward and backward into the furrow, insuring perfect checking under all conditions.

There is no stringing or scattering.

Seed tubes are free from shelves or other obstructions that interfere with perfect dropping.

Hilling or Drilling

No extra attachments or tools are required to change from hilling to drilling, or back again. There is no switching of the valves, no parts to add or remove.

To adjust for drilling merely hook the foot drop over the small casting on the rock shaft, using notch nearest end, and then press down on the foot drop lever till it locks automatically.

When turning at the end of the rows, a slight pressure on the foot treadle unlocks the lever and stops the drilling.

Sight Drop

There is a slight opening just above the upper valve which enables the operator to see the kernels as collected.

A glance will show whether the planter is working properly or not.

Open or Concave Tire Wheels

Thirty-inch concave or open wheels are furnished regularly.

Thirty-eight inch wheels are furnished on special order, and are desirable in stumpy ground or in following the lister.

All wheels have removable bearing boxes which can be readily replaced when worn.

Automatic Reel

This is a very practical and convenient reel. It is always ready to take up the wire.

The drum is a perfect cylinder of sheet steel upon which the wire is easily wound without kinking or snarling.

A very simple reel drive is provided. A small sprocket with a friction hub and spring enables the operator to reel up or unreel the wire, always keeping it at a uniform tension.

One of the anchor pins is used as a reel brake when unreeling the wire, and as a distributor when reeling up the wire.

Buttonless Wire

Each planter is equipped with eighty rods of annealed steel, buttonless wire.

Either 3 feet 6-inch, or 3 feet 8-inch wire is furnished regularly, but other sizes may be had on special order.

Double twist joints make this wire very strong, and prevent its slipping through the forks.

Stub Runners

When planting in very trashy ground some prefer the stub runners. These can be furnished with the Deere No. 9 when desired.

Single disc openers can also be furnished.

Planting

The Deere No. 9 Planter plants field ensilage, or sweet corn, peas, beans, etc., with an accuracy that is marvelous. Different style seed plates designed for the different seeds are provided with the planter. For different width rows the planter is adjustable from 28 to 44 inches, the distance between buttons on check wire governed according to distance wanted between hills.

Fertilizer Attachment

The fertilizer attachment on the Deere is perfect. Has large capacity galvanized hopper, wide range of quantity up to 600 pounds per acre. Has an agitator in hopper which keeps fertilizer from bridging, and insures accuracy in the feed. Fertilizer is sown in the hill or continuous in the drill, but does not come in direct contact with the seed, hence will not cause burning of the seed.

Write us for special booklet and prices on this planter. It will certainly pay you to investigate if in need of a planter.

IMPROVED STONE BOAT FRONT

This device enables the farmer to make a good stone boat in one hour's time with ordinary straight plank that he may have on the farm. All tools necessary are saw and bit.

Price, \$2.75

EUREKA No. 2 CORN PLANTER

Eureka Planters plant corn, beans, peas, beets, onions and turnips.

They drop seed and fertilizer automatically at any desired distance.

They will drill continuously both seed and fertilizer.

They have a perfect hand check so that grain may be planted in hills when it is desirable to cultivate the crop both ways.

The seed hopper may be divided so that beans and corn can be carried and planted together.

The seed pockets can be adjusted to drop the desired number of kernels.

By means of a convenient lever the depth of planting is under perfect control of the operator.

EUREKA No. 3 CORN PLANTER

The Eureka No. 3 is a duplicate of the No. 2 Planter, except it has two drive wheels instead of one. This insures steadiness in the field, and planter will not tip over.

	WEIGHT, POUNDS	PRICE
No. 2 Eureka	150	\$20.00
No. 3 Eureka	160	22.00

EUREKA No. 4 TWO-ROW CORN PLANTER

The Eureka Two Row Planter will plant corn, beans, beets, peas, onions and turnips. It plants seed and fertilizer either in the hill or drill. The fertilizer attachment is the best on the market. The fertilizer does not come in direct contact with the seed, but is dropped on both sides, allowing the earth to separate them. The planter is entirely independent of the truck which insures

planting in dead furrows, over knolls, and will conform to the irregularities of the ground.

The Eureka Marker is a special feature; it is raised and lowered by the foot.

The planter is most durably built, steel and malleable iron being used in its construction. It handles easy, is very light draft, and of pleasing design.

No. 4. Complete, weight 430 lbs., Price, \$40.00

ECLIPSE CORN PLANTER

THE ORIGINAL ECLIPSE

This planter has been sold for over twenty years, thousands of them are in use, and there is great demand for this machine. The fact

that the Eclipse is still on the market without being changed is guarantee enough of its efficiency and durability.

Price, \$20.00

KING OF THE CORNFIELD PLANTER

This Corn Planter has been for years one of the leading machines for planting corn, beans, peas, beets and other seeds used throughout this territory. It is equipped with fertilizer distributor, and is perfectly adapted to all requirements of this section. It can be arranged to drop any desired quantity of seed or fertilizer; can also be used for planting corn and beans at the same time, dropping each kind of seed in rotation.

Price

\$20.00

Descriptive Circular Mailed on Application

No. 552 Marseilles Grinder

The above grinder has been one of our most successful machines for small and medium powers. It will grind both small grains and ear corn; it can be used with as small as 4 horse power. The hopper is entirely of metal, making it indestructible. Furnished with two sets of burrs; one fine and one coarse. Capacity for feed purposes under ordinary conditions 15 bushels per hour; meal for table use 10 bushels per hour.

No. 4 Stover Grinder

The above cut represents one of our celebrated Stover line of grinders which has been very popular especially for farm use. This mill will handle both the small grain and ear corn in a very satisfactory manner, and we can recommend it very strongly to our customers as a mill that will give perfect satisfaction. The grinding burrs are white iron, known to some makers as chilled steel, and the machine is shipped complete with two sets. If anyone desires a still larger mill in this same style, we can furnish the No. 40, full descriptive catalog of which we will gladly mail on application.

Send for Descriptive Circular and Prices

ASPINWALL POTATO PLANTER NO. 3

The World's Oldest and Most Widely Used Potato Machinery

Simplicity in construction characterizes the Aspinwall Planter, and its durability is attested by the fact that many of these machines have been in service from twenty to twenty-five years without a cent expended for repairs. The first Aspinwall Planter demonstrated conclusively and emphatically the correctness of Aspinwall Mechanical principles. They were first in the field and still lead.

In the No. 3 Planter the distance of planting is regulated by gears doing away with the old method of adjusting pickers, which means a great saving in time as the Gears can be changed more quickly than a single picker can be removed, and the Aspinwall Planter is absolutely the only machine that will plant potatoes of any size without adjustments. The manufacturers have also adopted the canvas hopper which reduces to a minimum clogging or bridging whether the seed be large or small, cut or whole.

The machine in brief guarantees accuracy, the first and greatest essential; Reduction in Cost and Increase of Production; Ease of Operation; Saving in Labor and Worry;

Rapid, Thorough Work; Protection against the Loss of Fingers, because it does the work, and is not fed by human hands; Lightness of Draft and the consequent planting of more acres per day—no additional man to increase the weight and retard the work, for human fingers cannot possibly keep pace with a rapid machine.

Both the Feed and Coverer Tension are Regulated from the Seat. No removal of bolts—simply turning a thumb screw does the work.

The distance of planting is regulated by gears, which can be changed in exceedingly quick time. The distances of dropping are 9, 10, 11, 13, 15, 17, 20, 24, 26 and 30 inches. For most localities the 13 and 15 inch gears are the distances generally desired, and we ship all planters, unless other instructions are received with 13-inch gears on the machines and 15-inch set extra. Should other gears be wanted, proper advices should accompany order. We will furnish two sets, any distances desired, with each machine. If more than two sets are required, an additional charge will be made.

STEVENS FERTILIZER SOWER

This sower combines strength, simplicity and durability. Will sow all kinds of fertilizers either broadcast or in rows. Equipped with Land Gauge giving approximate amount sowed per acre.

	Size	Capacity	Weight
One horse,	5 ft. 10 in.	6 bu.	400 lbs.
Two horse,	8 ft. 3 in.	9 bu.	510 lbs.
Two horse,	10 ft.	11 bu.	550 lbs.

When using a Sower or Planter try our High Grade Hubbard Fertilizers. A Brand for every purpose and absolutely guaranteed to be above Standard.

Prices on Application

EMPIRE BROADCAST FERTILIZER SOWER

The Empire 8-foot Broadcast Fertilizer Sower is especially designed for sowing a large quantity of lime or fertilizer per acre. The hopper is strong, with large carrying capacity, mounted on low, broad-tired wheels.

It has a positive force feed, which insures accuracy in the quantity sown. The scattering tubes are constructed so as to deliver the fertilizer or lime in an even sheet over the ground. The scattering tubes are low down and the fertilizer is not affected by the wind.

The capacity of the Empire, as regularly equipped, is from 150 to 1,400 quarts of fertilizer; from 375 to 1,500 quarts of lime per acre. We can furnish gears that will sow a greater or lesser quantity if desired.

The Empire is well made, neat in design, compact, light-running machine with large range of quantity.

Furnished regularly with pole, double trees and neckyoke.

Send for Special Circulars and Prices

DEERE WHEELBARROW SEEDER

Grass Seeder sows clover, timothy, alfalfa, etc., also all chaffy seeds, such as red top, orchard grass, clean blue grass, etc.

Grain Seeder sows all small grains, such as oats, wheat, rye, barley, etc.

The quantity of seed is accurately governed by the wheel, which moves correspondingly slow or fast, as the machine moves over the ground. The seeder is operated by a cam device attached to the wheel, over which the lever that works the seed chain runs. The feed is instantly changed by changing the position of the pin in the index plate. This seeder does not injure or bunch the seed, but distributes it evenly over the ground.

	Price
Deere Wheelbarrow Grass Seeder with 14-foot Hopper	\$8.50
Deere Grain Seeder Attachment	4.00

STOWBRIDGE BROADCAST SEED SOWER

It is a simple, effective seeding apparatus complete in itself which may be attached in a few moments' time to any farm wagon or other vehicle.

Price, \$7.00

Deere Wheelbarrow Seeder

THE VAN BRUNT 11-7 FERTILIZER DISC DRILL

THE VAN BRUNT FERTILIZER DRILL is the up-to-date machine. Its valuable and exclusive features appeal at once to operators who desire accurate working qualities with all conditions of Soil, Seed and Fertilizer. Neat in design, strong in construction, but light in weight, living strength has replaced clumsy, heavy frames. The vital parts of a Grain Drill are the Furrow Openers and the Feeds. Van Brunt construction supplies long life in all parts with small Repair Bills.

This Drill is adjustable to respond accurately to the wants of every operator. It handles all standard brands of Fertilizer in 82 different quantities from 65 to 1070 pounds. The flow of the Fertilizer is always steady and continuous and the discharge is positive. The Van Brunt Feed is the "Star" or "Finger" type with exclusive improvements. It is run with two speeds, the exchange of one sprocket wheel only changes from slow to fast drive, very simple and effective. The Gates on the Fertilizer Feeds can be changed instantly to varying quantities by moving the handle at end of Hopper up or down. This can be done while machine is in motion. Thus the amounts of Fertilizer sown can be varied easily as different parts of the field require. Scrapers and Knockers keep the Feeds clean and in constant operation. The seed attachments are all Force Feed with one feed for each Disc and always furnished with Combination tubes for drilling and broad-casting.

THE VAN BRUNT SINGLE DISC with Forward Delivery and Closed Boot is rapidly replacing the old style Open Delivery Disc with Shield. The Closed Boot conducts every kernel of seed down into the very bottom of the Furrow. It beats the dirt. The upward turning Disc cannot deflect it. The Disc Bearings are warranted to outlast the Drill. They are case hardened and run in beds of oil. Oil tight and dust proof. One oiling a season is plenty.

The Adjustable Gate Feed is the latest and most accurate of all seeding devices. It is unlike any other Feed you have known. This Feed with the Gate Adjustment compels accurate seeding of all kinds of Grain from Alfalfa and Flax to Corn and Beans. No cracking, no bunching. Permits wide range of quantities and kinds without change of gear. No complicated speed changing of mechanism, no reducing devices required. The Van Brunt is the right feed.

The Wheel Hubs on Van Brunt Drills are 8 inches long and chilled. They do not wear out. The Frame and Machine are supported directly on and over the Hub and not on the axle. Wheels run on a plumb spoke and never sag in.

Driving Gear. Each wheel is a drive wheel. When the Discs are in the ground the Drill is in gear and raising Discs from the ground automatically throws the machine out of gear. Grain and Fertilizer can be sown separately, if so desired.

Send for Complete Descriptive Circular and Prices .

NEW 1913 ASPINWALL POTATO SPRAYER

FITTED WITH 4 ROW ATTACHMENT EITHER AT FRONT OR IN THE REAR

The Aspinwall Sprayer, as constructed today, is foremost for the purpose intended, and without equal, placing the machine in a class by itself. It is absolutely different from anything of its kind on the market, more positive, with better results obtained.

The Pump—First and most important is the pump, which we term a right angle pump. This distributes the intake or power required in suction and pressure in spraying, on quarter points of the crank, making it absolutely free from any back lash, and equivalent to purely rotary motion. The cylinders are open ends, which eliminates any work of removing the piston, such as unscrewing the head as from the ordinary cylinder. The packing is adjustable by set screw at the end of each piston.

An important feature of our 1913 Sprayer is the arrangement of the barrel directly over the axle of the machine, thereby eliminating the weight which would otherwise bear largely upon the team.

The Nozzles are adjustable in every way, laterally, also as to width and inclination of

spray, as well as height from the potato rows. The sprayer is also equipped with a foot-bar for deflecting the spray to overcome the effect of side winds.

Perfect Agitation—The next point of excellence is the Siphon Suction Hose, having a screen attached to a paddle which operates through the top side of the hopper on the barrel. This screen is provided with a quantity of buck shot, which with the agitation caused by movement of the paddle, prevents any clogging of the screen. There are no stuffing boxes to keep from leaking, or difficult parts to adjust, tighten, or take apart when removing the paddle.

Aspinwall Relief Valve—The pressure will range as desired from 25 to 150 lbs., or more, according to the requirements and mixtures used. The relief valve is located within the barrel, and the pressure is regulated entirely by a spring located above the barrel.

All sprayers are equipped with a combination pole and shafts, so that they may be used with either one or two horses. The barrel is equipped with a special float to show the amount of liquid at all times.

The machine is well balanced and driven from both wheels, thus eliminating all side draft. In construction, the material and workmanship are first class.

Send for Descriptive Folder and Prices

HOOVER POTATO DIGGER

There is probably no implement so well known in potato-growing sections as the Hoover Elevator Potato Digger. In Aroostook County, Maine, where more potatoes are grown than any other section in New England, and where a potato digger gets a severe trial, the Hoover has given perfect satisfaction. Its success can be attributed to the fact that it was built to withstand most trying conditions.

It hardly seems necessary to go into detail regarding its points of merit, for its success

is guarantee enough for its superiority in design, construction and efficiency in the field.

We do wish to call particular attention to the vine separator used on the Hoover, which delivers the vine, weeds and trash to one side of the row, leaving the potatoes exposed to view and readily accessible.

Send for descriptive catalogue which contains convincing testimonials from most enthusiastic purchasers.

THE PURCHASE OF A HOOVER IS NEVER REGRETTED

THE SHAKER POTATO DIGGER

A most excellent working Digger under reasonable conditions. Is equipped with perfectly flat blade so as not to cut the potatoes. The weed fender clears away the weeds and vines.

Regularly furnished with weed fender, fore carriage and side wings. Price, \$16.50

DEERE POTATO DIGGER

The Deere Potato Digger has been in successful use for many years, and is equal to any requirement that may be made on it. It works with very light draft, and throws the potatoes out of the ground without cutting, leaving the ground in good shape.

Price, \$7.50

THE NEW JOHN DEERE SPREADER

No Clutches

No Chains

No Adjustments

THE SPREADER WITH THE BEATER ON THE AXLE

ALL DRIVING PARTS ON THE REAR AXLE

Roller Bearings

Light Draft

Easy to Load

The fact that heretofore it was necessary to mount the beater of a manure spreader on a separate shaft and drive it from the axle, either with chains or sets of gears carried by independent studs or shafts, has been the cause of a great deal of trouble both to the users and manufacturers of manure spreaders. All of these independent studs and shafts on the ordinary spreader necessarily must be mounted on the frame or sides of the spreader, consequently all the strains and stresses of operation are borne by the frame and sides. As the natural tendency is for the strain of operation to pull the gears and shafts out of line, it has always been found difficult to give the gears and shafts a mounting strong enough to take care of their work. In mounting the beater-drive on the main axle, this seemingly necessary evil has been done away with as on the John Deere Spreader all the strains and stresses of spreading manure are borne by the rear axle and are not transmitted to the side of the box or the frame of the spreader.

The John Deere Spreader has no clutches and requires no adjustments. To throw this spreader into gear the driver pulls back the lever at the right of the seat. This moves a dog back until it engages the large stop on the right-hand end of the beater. The operation is simple, easy and effective.

The average point of the load is much nearer the horses than on any other spreader. The front end board slants well upward and forward to permit putting more of the load

on the front end of the spreader, and the weight of the load is evenly distributed between the front and rear axles.

By the use of a very simple locking device on the inside of the ratchet feed, the apron is positively locked against racing when spreading up-hill or over exceedingly rough ground.

Change of feed is accomplished by a double shoe which is moved from the seat, and which determines the number of teeth the ratchets engage at each stroke. While one ratchet is working the other one is returning for a new hold, consequently, the apron travel is automatic, positive and steady.

There is no chance for the beater on the John Deere spreader to warp, split, twist, get out of shape, or give trouble. It is made entirely of steel. There are ten bars made of high carbon channel steel to which the teeth are fastened.

Four sets of roller bearings, together with the simplicity of the entire machine itself, make the John Deere Spreader the lightest draft spreader on the market. The bearing on the rollers is equal along their whole length. Even after years of use they show no appreciable wear.

The John Deere Spreader is low-down. It is only necessary to lift each fork of manure three feet. Thus, the hard work of loading manure spreaders is eliminated.

The John Deere Spreader is built in three sizes, namely: A, two-horse, 40 bushel; B, two-horse, 50 bushel; C, three-horse, 70 bushel.

Send for Special Descriptive Catalog and Prices

SUCCESS MANURE SPREADER

Why Use a Spreader

It doubles the value of manure.
It saves labor.
It spreads manure evenly.
It makes meadow top-dressing practical.

Variety of Uses

Spreaders should be available for a variety of uses. A SUCCESS will spread lime, ashes and commercial fertilizers.

It may also be used as a dump wagon for drawing gravel and many farm products when not used as a spreader.

Capacity to Suit

There are several sizes of SUCCESS SPREADERS ranging from 40 bushels to 100 bushels in capacity.

Must Be a Staunch Machine

Steel Rear Wheel.

Manure Spreaders are subjected to greater strain than any other farm implement. They carry a heavy load and are used extensively in the spring and fall when the ground is wet and uneven. Strength of construction, therefore, is absolutely essential to insure quality of service and long life.

The Success Is Strong

SUCCESS frames are made of thoroughly seasoned second growth white ash and oak. The center sills are continuous, the cross sills are mortised into the side sills and provided with heavy steel truss rods. All parts are securely bolted together making an exceptionally strong and durable machine.

Remember—That, outside of the New John Deere, there is absolutely no spreader on the market that can compare with the success in lightness of draft.

Special Catalog and Prices on Application

Roller Bearings

It requires at least one horse less to pull the SUCCESS than any other spreader. This is because it is fully equipped with seven sets of roller bearings; one at either end of the rear axle, one in each front wheel, one at each end of the cylinder shaft, and one in the combination sprocket and gear that drive the cylinder.

The Business End

The rear axle and spreading mechanism bear the greatest strain.

SUCCESS axles are of cold rolled steel $2\frac{1}{8}$ inches in diameter, the largest used in any spreader.

The cylinders are exceptionally strong and teeth are so arranged that every particle of manure is thoroughly pulverized.

Cylinder Drive

A steel-pinned chain drives the cylinder, taking its power directly from a sprocket on the right end of the rear axle.

A gear keyed to the left end of the axle operates the mechanism that moves the apron.

A chain taking its power from the center of the axle operates a movable sprocket which automatically returns the apron after the load is discharged.

When out of gear, the cylinder is against the load. The same lever which throws the machine into gear slides the cylinder back, freeing and enabling it to get in motion before boring into the load.

This relieves any undue strain on the machine before starting.

Wheels

Either wooden or steel wheels can be furnished as desired.

THE DUNHAM ALL-STEEL LAND ROLLERS

SERIES S.

THE ONLY ROLLER-BEARING LAND ROLLER MANUFACTURED

These Sectional Rollers will turn on their own width without disturbing the top-soil. The sections revolve in opposite directions independent of each other. Each section is a complete drum with a head in each end. This construction prevents the gathering of stones and dirt within the roller when in use or the accumulation of rain water when allowed to stand exposed. The drums are made of high carbon steel and guaranteed not to dent. The seat spring is reinforced and bolted securely to the tongue with two half-inch bolts. The pole is held securely in place by two extra long braces which are bolted to both the front and rear irons of the frame. The end brackets are made of heavy channel iron and built close to the drums to bring the hitch as low down as possible and thus lighten the draft. Hard grease cups are furnished on all Dunham Roller Bearing Machines.

The above cut shows the extra wide end bracket casting which holds the Roller Bearing, but does not show the grease cup or the enclosing cap which fits over this casting covering the end of the axle and preventing the entrance of dirt. The Roller Bearings take up the weight and cut the friction in two.

The one and three-fourths inch round axle is lathe-turned at both ends to give it a slight shoulder and assure it a perfect rolling surface. The first washer is made of heavy Felt and is protected by the steel washer which accompanies it. Next is the improved Dunham Roller Bearing. This bearing is made up of twelve 7-16 inch hardened steel rods that revolve independently. This bearing fits over the lathe turned axle up to the washers and shoulder. The axle revolves in the Roller Bearing.

The flow is regulated by a screwing down the top of this cup so as to force the hard grease into use. The axle protrudes through the end bracket casting and is held in place by a wide slotted washer and cotter pin.

The end bracket is made of two inch high carbon channel steel. The Bearing casting and the heavy top cross pieces are made with lugs which lock into the channel of the side pieces and are held in place by half-inch bolts. This construction assures an indestructible and thoroughly rigid end bracket which positively prevents the frame from working loose.

SEND FOR COMPLETE DESCRIPTIVE CIRCULAR AND PRICES.

DAIN VERTICAL LIFT MOWER

4, 5 and 6 Foot Cut

Points of Superiority

Qualities which characterize the Dain Mower are strength, durability, light draft, ease of management, and superior cutting power.

Substantial Frame

One solid piece of iron constitutes the frame. All parts are held securely in place.

Simple Gears

There are only three pieces in the gear mechanism.

A large internal gear on the main axle meshes with a spur pinion with which the bevel gear is cast in one piece. The bevel pinion transmits the power to the pitman shaft.

The gears are placed close to the left wheel to counterbalance the weight of the cutter bar.

Cuts Clean and Easy

The wheels have ample traction and produce sufficient power to drive the knives easily in any condition of hay.

The knives are made of soft center steel. The wearing plates are wide, insuring long wear and clean cutting.

Wood Pitman

Wood will not crystalize by use like iron or steel.

The Dain pitman is long and made of second growth hickory. With proper usage it will last a lifetime.

A hinge joint at the wrist pin end and a socket joint at knife head, allow the cutter bar to be raised, lowered, tilted up or down without causing friction on the pitman bearings.

Easy to Control

A coil spring working with the lifting mechanism makes the control of the cutter bar either by hand or foot lift very simple.

A small boy can lift the bar for turning corners or passing obstructions and can raise it to a vertical position for transporting, without leaving the seat.

The foot and hand levers are convenient for the operator and may be used independently or together as desired.

Tilting Lever

The guards can be tilted up or down to suit the condition of any meadow surface.

Reversing the position of the lever latch allows the guards to adjust themselves automatically to the unevenness of the ground.

Features that Characterize the Dain Vertical

Lift Mower

Compensating Gears—That remove strain from the bearings and transmit instead of consume power.

Long Pitman Shaft—That has all end thrust removed, hence has no need of thrust bearings.

Alignment of Cutter Bar—Seldom necessary, but easily, quickly and positively made.

Centering the Knives—So that they always register perfectly in the guards, insuring perfect work.

Vertical Lift—A lift so easy to operate, an ordinary boy handles it readily.

An Easy Foot Lift—So easy it's surprising, especially after using other kinds.

Adjustable Draft Hitch—Instantly set to remove side draft in the most severe conditions of work.

Material and Workmanship—Of the known Dain standard proven by service reliable and trustworthy.

Special Catalog and Prices on Application

JOHNSTON MOWERS

Showing Ease of Handling Johnstone No. 10 Lever Fold Mower in Passing Over Obstruction

Features which make up the efficiency, durability, light draft and ease of handling of the Johnstone Mowers.

- Cast frame, high wheels.
- Three pawls in each wheel.
- Roller bearings.
- Long horizontal crank shaft.
- Separate self-aligned crank boxes.
- Gearing that meshes properly.
- Long wood pitman with ratch adjustment.
- Babbitted pitman boxes.
- Cold-rolled cutter bar finished smooth on top.
- Serrated guard plates.
- Section rivets, headed top and bottom.
- Steel wear plates for knife.
- Steel subsole for outer shoe.
- Even and direct draft.
- Special fittings for whiffletrees.
- Non-binding solid steel push bar with wide joint.
- Convenient levers.
- Perfect foot lift.

No. 10 MOWER WITH LEVER FOLD

Made in 5, 6 and 7 foot sizes.

The lever fold is a decided advantage over the so-called vertical and plain lift.

By use of the hand and foot levers the operator has absolute control of the bar at all times, and enables a wide range of clearance of the bar when passing over an obstruction, in turning corners, or cutting on a hillside. The lifting spring carries the weight of the bar in raising. It drops of its own weight when released.

No. 11 ONE-HORSE MOWER

Made in 4-foot cut.

This machine is especially adapted for small farms, orchards, parks, lawns, etc.

It is constructed along the same general lines as the No. 10. Greatest care is taken in its construction, durability and efficiency in the field.

On account of its light running qualities it is especially to be recommended for a one-horse mower.

Send for full descriptive catalog and net prices.

KNIFE AND TOOL GRINDER

Grinder is convenient for use in field as it can be readily attached to mower wheel by thumb-latch which holds grinder in position. This grinder does its work perfectly, lever gives operator perfect control so that nicks can be ground out and shape of stone insures sections being ground with their original bevel. This grinder can also be furnished on special order as a foot power machine.

Price \$4.00

JOHNSTON HAY RAKES

All steel construction. Strong, durable. None better.

Johnston all steel Rakes are the best.

All steel, but the combination pole and shafts. Double hub steel wheels; angle steel frame, steel trussed.

Long flat-pointed teeth.

Teeth interchangeable.

Separate holders for the teeth.

Steel cleaners bolted, not riveted.

One-piece dump rod.

Lever on right-hand side.

Trip ratchet plate, adjustable for fast or slow walking horses.

Steel seat with steel support.

Comfortable, convenient and easy to handle, does clean work; is light draft.

Economical and durable.

The Johnston Rakes can be furnished in the following sizes:

PRICES

8	ft.	24 teeth	\$21.00
9	ft.	28 teeth	22.50
10½	ft.	32 teeth	25.00
12	ft.	38 teeth	29.00

JOHNSTON TEDDERS

Johnston all-steel Tedders are strong and durable, and work most satisfactorily. The frame is steel, the wheels are steel and double hubbed. Three sets of roller bearings on the main shaft insure its light running. Three tined crucible forks are used; the spring

on the fork is located behind it, and does not come in contact with the hay and get tangled in the rod and spring. Another feature is the spring balance tilt. The Johnston is equipped with combination pole or shafts. Made in two sizes, 6 and 8 fork.

PRICES

Johnston.	6 Fork Tedder	\$35.00
Johnston.	8 Fork Tedder	40.00

DAIN SIDE DELIVERY RAKE

The Dain Side Delivery Rake has a frame of strong steel construction giving great durability. Can be furnished with either one or two castor wheels. Can be adjusted to all conditions of hay crop. Has strong steel raker teeth sufficient to rake and deliver the heaviest crop of hay, also having perfect flexibility when striking an obstruction.

No farmer cutting a quantity of hay can afford to be without one, especially if using a hay loader.

Leaves the hay in a long, continuous windrow in the very best condition for curing. Will shake water from grass in as satisfactory way as a tedder. Let us send you booklet giving full description and prices.

THE NEW YORK CHAMPION SELF DUMP RAKE

For years the New York Champion Rake has been the best known and most successful rake in use in this locality.

We would certainly recommend the above to our customers who do not desire a steel rake.

It is carefully and substantially built, and nothing but the best of material is used in its construction.

Price
\$20.00

8 foot, 26 tooth

JOHNSTON CONTINENTAL CORN BINDER

Built for Business

On every important point the Johnstons is superior to any corn binder manufactured. This is especially so in regard to power, draft and manner of elevating and binding the corn.

The Johnstons elevates and binds corn in an inclined position,—the natural way. Binding corn in a horizontal position is very wasteful. Binding corn in a vertical position requires more power and does not allow the weight of the corn to be carried back of the line of draft.

This tends to destroy the balance of the machine.

Why the Johnstons is Superior

Light, compact construction.

Steel frame, wheels and supporting beams.

Light draft. No side draft. No neck weight.

Two horses handle the machine.

An even balance. Cannot tip over on sidehills.

Smoothly running working power.

Roller bearings. Brass bush bearings. Largest main wheel on any corn binder. Gains power.

Natural inclined elevation. Saves power. Handles perfectly down or tangled corn.

No Packers. Saves corn.

Knocks off fewer ears.

Ties every bundle. Ties tight, shapely bundles.

Ties 18 or 32 inches from the butts.

Automatic conveyor fingers.

Only machine with automatic gates.

Saves crowding the tier.

Special chain adjustment. Adjustable stalk passage.

Perfect cutting apparatus. Three knives and one center plate. Takes care of the weeds and vines.

Right-hand levers.

Steel bundle carrier. Bundles discharged farthest from the machine.

The complete machine is 5 feet 11 inches wide, and will pass through any ordinary farm gateway.

Send for Special Catalog and Prices THE JOHN DEERE STEEL RAKE

A FEW ESSENTIAL FEATURES.

The axle stubs are one and one-quarter inch in diameter, also reversible and interchangeable, which adds longer life.

The dump rods are three-quarter inch in diameter, and of high carbon steel. These are reversible and interchangeable, making four times the durability of the ordinary type.

The tooth holders are constructed of steel instead of cast iron saving much breakage, and they are also made to accommodate a minimum or maximum number of teeth.

You will note by the above reproduction that the front frame angle is connected to end of axle stubs.

The wheels are 54 inches in height, with 20 7-16 in. round staggered spokes, inside ratchets cast integral with boxes, which are replaceable, ratchets will not gather hay as will outside ratchets. Channel tire, with channel out.

Price	8 foot	\$21.00
	9 foot	22.50

Send for Special Descriptive Circular

JOHNSTON CONTINENTAL GRAIN BINDER

Strong, Durable, Efficient

Simple construction, ease of operation, light, durable, strong and sure, these are the essentials you want when you purchase a Grain Binder.

You will also desire a binder that will handle a variety of crops with equal satisfaction and dispatch.

You will get all these desirable features in the Johnston "Continental" Binder. You will not have to experiment, as there are twenty-eight years of a successful and an unrivaled record for actual field results behind the Johnston "Continental" Binder, and that counts for something.

Remember you take no chances. Every binder is thoroughly tried out before it leaves the Johnston factory.

Some Construction Features that are the Best Reasons why it Never Fails to do its Work Right

All-steel frames.

Sheet-steel platform, with strong connections to frame.

Perfect draft connections.

Steel wheels; main wheel, 36 inch; drives with great power.

Roller bearing in both wheels; drives with least friction.

Perfect mesh of gears throughout.

Brass bushing in crank-box prevents heating.

Angle-steel cutting-bar with stiffener.

Steel Locke belt drive chain.

Both dividers are steel, and both fold out of the way.

All levers on right-hand side.

Gear-drive reel. No lost motion. Handles all kinds of grain.

Largest elevator roller in use. Increases capacity.

Roller boxes are self-aligning, economical.

Seventh roller saves loss at the top.

Canvases made to wear, and each has eccentric tightener.

Gear-drive binder attachment. Has widest shift.

A trip that never repeats.

A knotter that always ties.

Detachable packer boxes.

Steep-slanted decks.

Steel folding bundle carrier, six fingers.

Best three-horse equipment on the market.

Tongue trucks for 7 and 8 foot binders.

Steel transporting truck, the quick-change kind.

You cannot make a mistake if you get a Johnston, and remember each

Johnston Binder is sold under a guarantee.

NEW DEERE HAY LOADER

FOR SWATH OR WINDROW
WITH
FLOATING GATHERING
CYLINDER

A SUPERIOR LOADER

Send for Special
Circular and
Prices.

An Economy

Where hay is grown in any quantity, the saving in time, labor, and quality of product effected by a hay loader will often wipe out the purchase price the first year used and thereafter become a source of clear profit.

A Desirable Loader

The most desirable hay loader is the one that combines to the greatest degree durability, capacity, and efficiency. This describes the NEW DEERE LOADER in a nut-shell. It is very durably constructed, yet light in weight, will pick up any quality and condition of hay either from the swath or windrow and do it as clean as any rake.

Any Kind of Work

The NEW DEERE LOADER has a wide range of capacity and will do any grade of work without changes in adjustment.

Wagon Coupling

The hitching and unhitching device is very simple and locks and unlocks automatically making it unnecessary for the operator to get under the wagon.

A Light Machine

Although very durable it is a light machine; light in draft and so simple in construction that it cannot easily get out of order.

Handles Hay Gently

The hay is picked up by the gathering cylinder, passed on to the elevator carrier, and elevated to the load in a slow, continuous manner which avoids all threshing or beating and consequently saves all the leaves.

A gathering frame is pivotally attached to the main frame and readily adjusts itself to the irregularities of the surface of the field and passes over obstructions without any damage. The tooth bars of this cylinder are also mounted pivotally and automatically adjust themselves as the cylinder revolves. As each bar reaches the lowest point, the teeth stand straight out from the face and are caught and held in this position until the hay is gently lifted and carried to the elevator, where the teeth are withdrawn from the hay instead of being forced through, consequently carry none after them.

A New Deere Loader at Work.

"NEW MODEL" CLOVER CUTTER

For Poultry

Just the cutter for the poultry raiser. Cuts all kinds of feed, either green or dry. Has removable steel knives, adjustable cutter bar. It runs easy, cuts fine, and is durable.

"OHIO" HAND FEED CUTTERS

The "Ohio" Lever Cutter will cut hay, straw, corn stalks and every kind of feed. It is equipped with one 11-inch oil-tempered knife; also provided with a guard plate, adjustable to vary the lengths of cut.

It is nicely finished, of pleasing design, strong and durable.

"Ohio" Lever Cutter, weight 55 lbs. \$4.25

"Ohio" Lever Cutter

"Ohio" Hand Cutter

The No. 8½ "Ohio," as illustrated below, is built along the same general lines as the power cutters. It has great capacity, is strongly built, and is a high-class cutter in every way.

No. 8½. With two 8½-inch knives.
Cuts ½, ¾, or 1½ inch. Weight 165 lbs. \$15.00

"Ohio" Hand Cutter

Pony Hand Feed Cutter

The Pony Cutter, as illustrated below, is strictly a hand machine.

A bushel of hay can be cut in thirty-five seconds. Cuts all kinds of feed. Only high-grade material is used, and makes it a strong and efficient cutter.

No. 11¼. One 11½-inch knife cuts ½ to 2 inches, weight 165 lbs. \$10.50

Pony Hand Feed Cutter

NO. 11 "OHIO" FEED AND ENSILAGE CUTTER

Equipped with Round Inclosed Steel Carrier for Straightaway Delivery

Fig. 784 No. 11

The No. 11 "Ohio" Feed and Ensilage Cutter has long been our most popular size for general farm use. The strength, durability, beauty and satisfactory operation of this machine are notable features. It is a strong feeder, has large capacity and, supplied with a carrier, is largely used for cutting all kinds of dry feed and for shredding fodder. The knife shaft is steel, $1\frac{3}{8}$ inches in diameter. The safety Fly Wheel, adjustable home-made knives, hard cutter bar and patented feed gears are special features of the machine. The feed lever gives the operator perfect control of the machine at all times.

Being inclosed, the Carrier is independent of wind conditions, and conveys ALL of the cut material into the silo. It is of ample size to deliver up to full capacity of machine without danger of clogging. The galvanized iron body is round, and has rounded cast base with wide high hopper. The overhead return insures a clear delivery at top. The buckets are securely bolted at center, to a strong single chain, the tension of which is automati-

cally controlled by a long heavy coiled spring on each side. The coiled springs act directly on the sliding bearings of the shaft carrying upper chain sprocket, so that the slightest variation in chain tension is immediately absorbed.

Capacity

Dry feed, 2500 to 3000 pounds; ensilage 3 to 4 tons per hour.

Speed and Power

400 to 600 revolutions per minute; 4 to 6 horse power gasoline engine.

Complete Catalog and Special Net Prices on Request

"OHIO" MONARCH SELF-FEED ENSILAGE CUTTER

Showing New Metal Bucket Swivel Carrier

Supplied Also With Straightaway Carrier, as Listed

Fig 794, Nos. 12 and 15.

The illustration above represents our line of "Ohio" Monarch Self-Feed Ensilage Cutters, equipped with swivel chain carrier. The new Monarchs are stronger and heavier in every part than the old style, and their capacities are greater than the length of knives would indicate, owing to the additional raise of the feed rollers.

ABOUT TRAVELING APRON. The traveling apron of the machine travels on single sprockets (one at each end in the center) and on metal tracks at the sides. Guide wheels are at the front and rear ends to carry the slats safely on to the track. The feed table is 8 feet in length and will readily receive the feed corn.

SELF-FEED INCREASES CAPACITY 33 1/3%, SAVES 75% OF LABOR FEEDING. The self-feed means that it is only necessary to bring the feed to the box. It also increases the capacity of the machines about one-third, on account of its being so much easier to keep the feed rolls full. The corn may be fed in armfuls or in bundles from the corn harvester.

There are two styles of metal bucket carriers for this line—the Straightaway and the

Swivel. The Straightaway is the simpler and is recommended wherever a straight delivery carrier can be used. Its usefulness, however, is limited to delivery in but one direction. The Swivel Carrier is shown in the illustration above, also how it connects with and is driven by the machine.

CAPACITY, POWER, SPEED, PULLEY.

Capacities based on 1/2 inch cut.

No. 12—Capacity: 8 to 10 tons per hour; power, 5 to 7 horse, gasoline.

No. 15—Capacity: 12 to 15 tons per hour; power, 6 to 8 horse, gasoline.

Speed—450 to 600 revolutions per minute.

"OHIO" STANDARD FEED AND ENSILAGE CUTTER

Equipped with Self Feed Table and Blower Elevator

Fig. 803, No. 11

THE ABOVE ILLUSTRATION shows our No. 11 Feed and Ensilage Cutter, equipped with Blower Elevator, and which can be furnished with either plain or traveling table.

ADAPTABILITY This Cutter has long been our most popular size for general farm use. It is adapted to cutting all kinds of dry feed as well as ensilage, is strongly and durably built, has large capacity and requires but moderate power to run.

DIRECT BLAST BLOWER. The fan wheel is heavy, and carries four blades or paddles. The paddles are securely riveted to an L-shaped steel flange, and are fitted over the outer edge of the fan wheel and down both sides in grooves provided, where they are securely bolted. This method makes it quite impossible for the blade to work loose in any direction whatever. The fan case is made of heavy steel and is closely riveted.

PIPE AND PIPE CONNECTIONS. The pipe is 7 inches in diameter and is made of galvanized steel with standing seam on the outside, running lengthwise, being very rigid.

The No. 12 or Monarch Cutter is built along the same lines as the No. 11 herewith described, with the exception that it is constructed on a much heavier plan and is intended for heavier work. The capacity is much larger and requires greater power to operate. The No. 12 Cutter is furnished with 10 inch pipe to meet the capacity instead of 7 inch as used with the No. 11.

Capacity

- No. 11. Three to five tons of ensilage per hour.
- No. 12. Eight to ten tons of ensilage per hour.

Power

- No. 11. Six to eight horse, gasoline.
- No. 12. Eight to ten horse, gasoline.

Speed

750 to 800 revolutions per minute.

SIZES AND LIST PRICES

- No. 11. Plain Table, with two 11 in. knives, cuts $\frac{1}{2}$, 1, $1\frac{1}{2}$ and 2 inches **\$95.00**
- No. 11. Self Feed, with two 11 in. knives, cuts $\frac{1}{2}$, 1, $1\frac{1}{2}$ and 2 inches **\$120.00**
- No. 12. Self Feed, with four 12 inch knives, cuts $\frac{1}{4}$, $\frac{1}{2}$, $\frac{3}{4}$ and 1 inch **\$160.00**

The above prices are for machines complete with Blower and Distributor, but no pipe.

For No. 11 Blower 7 in. galvanized pipe in 4, 6 and 10 foot lengths, per foot **\$.50**

For No. 12 Blower 10 in. galvanized pipe in 4, 6 and 10 foot lengths, per foot **\$.75**

CORN SHELLERS

DIAMOND ONE-HOLE SHELLER WITH FAN AND TABLE

The Diamond is a right-hand sheller, well built in every way, easy running and efficient in removing all the corn from the cobs. It is an excellent separator and cleaner, delivering the corn from the sheller in good, marketable condition.

The sheller is of pleasing design, well built, strong and durable.

	WEIGHT, POUNDS	
No. 15½ Diamond Sheller with fan and table	135	\$9.00

The Favorite No. 137, with
Sacking Elevator

FAVORITE TWO-HOLE CORN SHELLERS

For the farm, custom mill and warehouse. For use by hand or power. Speed of the balance wheel shaft should be 350 to 400 revolutions, and straight runner shaft 80 to 100 revolutions per minute.

In the Favorite we offer a high-grade sheller. It is well made, both in material used and workmanship. Has a large balance wheel, is light running, effective in removing the corn from cob, in separating and cleaning. Its cob rake separates cob from the corn, and discharges them from sheller, fan cleans the corn so that it is discharged from sheller in a marketable condition.

Sheller may be furnished with or without feed table, band wheel, or with or without sacking elevator. Capacity, with one horse power, from 25 to 35 bushels shelled corn per hour.

As a hand or light-power machine it is truly a favorite with farmers, custom millers, and the general trade.

No. 17. Favorite Sheller with crank fan and table, weight 245 lbs. \$21.00

No. 102. Favorite with crank fan table and pulley, weight 255 lbs. \$22.00

No. 137. Favorite shell with crank, fan, table, pulley and sacking elevator, weight 325 lbs. \$32.00

The Favorite No. 102 Two-Hole Sheller with
Fan and Table

THE R AND V TRIUMPH GASOLINE ENGINE

Hit-and-Miss Governing—Hopper Cooled

1, 2, 4, 6, 8, 10, 12 Horse Power.

This type of engine has proved exceedingly practical for farm use. As a light dependable and economical source of power, its advantages and accessibility have made it one of the most popular of all the R & V line. Some of the leading features are:

DESIGN. This engine is second to none in strength, symmetry and beauty of outline together with durability and smoothness in operation.

HOPPER COOLED. No tank, pump, piping or fittings required. Polar ice machine or arctic oil may be used in place of water.

ACCESSORIES. These engines are equipped with the highest grade accessories that the market affords. Each engine has a Solid Cast Iron Gasoline Tank Sub-base, and is mounted on skids with battery box attached, containing five number six dry cells, high-grade spark coil with switch, wire, etc., muffler, sight feed cylinder lubricator, wrenches and oil can; also instruction for starting and taking care of engine.

PISTON. The piston on the 1 and 2 hp. is fitted with four, and larger sizes with five accurately-ground compression rings, one of which is placed over the Hardened and Ground Steel Piston Pin, thus avoiding any possibility of scoring the cylinder as a result of the pin becoming loose and working endwise.

CRANK SHAFT AND CONNECTING ROD are of liberal proportions and finished to

standard size, the connecting rod being I-beam in section, which is the strongest form in proportion to weight that can be made.

BEARINGS. Copper-hardened, genuine babbitt bushings die cast (Removable and Adjustable) are used on the crank pin and main bearings and are lubricated by means of hard oil cups. Adjustments to these bearings are made by removing Metal liners of varying thicknesses. An extra long hard bronze bushing is used on the piston end, and works on a Hardened Steel piston pin.

MIXING. The mixing valve or carburetor is of approved suction type and designed to deliver a good mixture under all conditions.

AIR THROTTLE. A damper attached to the mixer assures prompt starting of engine.

IGNITOR. (Make and break.) The same rod that opens and closes exhaust valve also trips the ignitor. This feature is very valuable, not only for its simplicity, but also from the fact that the ignitor is always inoperative when the engine is not taking an explosion, thus saving unnecessary wear on all these parts, and prolonging the life of the battery.

SPEED CONTROL. The speed of the engine can be increased or decreased at will by means of a knurled thumb screw on top of detent casting, permitting a variation of over fifty per cent. in speed while engine is running.

THE "NEW-WAY" AIR COOLED ENGINES

"Goes and Goes Right"

The "New-Way" is the only air cooled engine made in all sizes from 1½ to 12 H. P. Absolutely guaranteed to cool perfectly by air only. No water to freeze or to watch. Crank case is air tight allowing no dirt to get into the working parts. Valves can be removed and replaced in five minutes. No gasoline pump to cause trouble.

6 H P Single Cylinder Horizontal

2½, 3½, 4½, 6 H. P. Vertical Single Cylinder Can equip these Engines with either batteries, friction driven Magneto or Bosch high tension Magneto.

We furnish also the 1½ and 2½ H. P. "New-Way" Jewel Engines for pumping, Spraying or any purpose where a strong, light, dependable power is desired.

These are sold at a very moderate price considering their quality and are absolutely guaranteed.

8 AND 12 H. P. TWIN CYLINDER

Especially designed where a strong steady power is desired without excess weight. One of the most reliable Engines Manufactured.

DAVENPORT ROLLER BEARING STEEL FARM WAGON

NOT AFFECTED BY CLIMATIC CONDITIONS

Roller Bearings

Reduce draft thirty to fifty per cent. This means a farmer can do more work in a given time and keep his horses in better condition than is possible with a wagon that pulls harder.

Steel Gears

Built like a bridge. Made of I-beams, angles and channels. Strongest forms into which steel is rolled. No sheet metal used in this construction. All parts hot riveted, which means rivets completely fill holes, making absolutely solid joints. Nothing to shake loose, rattle, dry out or rot.

Steel Wheels

Stand straight, run with tire flat on the ground. No dish to wheel. No pitch or gather to axle. This means no side strain on wheel or uneven binding on spindle. These wheels are guaranteed to give absolute satisfaction under all the varying conditions a wheel meets with in service.

Enclosed and Protected Bearings

The Roller Bearing is effectively enclosed like the high-grade automobile bearing. Mud, sand and water proof. The only enclosed and protected bearing on the market.

Automatically Closing Oil Cup

You only oil every three or four weeks—using ordinary machine oil in small quantity. Do not have to take wheel off. Makes no difference whether wagon empty or loaded you can oil just the same.

Linch Pin

The DAVENPORT wheel is held on with a linch pin. No nut to run off and let you down.

Life and Durability

The DAVENPORT being almost entirely a steel wagon, solidly riveted together—not bolted—means that it is not affected by hot, cold, dry or wet weather. No trouble from drying out or rotting.

Distinctive Features of Merit

The above are only a few of the important features to be found on the DAVENPORT—many other points of distinction are described in the DAVENPORT catalogue.

Guarantee

The DAVENPORT is strongly guaranteed regarding all the claims made for it.

Capacity and Weights

Narrow Track, with Regular Wheels,
40-inch, 48-inch in Diameter

All Wagons 5,000 Pounds Capacity	Tire 1 3/4" Heavy Channel	Tire 3 x 1/16	Tire 4 x 1/2"

THE CHATHAM CLEANING, GRADING AND SEPARATING MILL, AND BAGGING ATTACHMENT

Capacity—
Power—

60 Bushels Per Hour
Easy to Run by Hand. Boy Can Run It

Attachment to run by power, if you want it. The Bagger is adjustable. Can be attached or detached in an instant. No Screws, Bolts or Nails to contend with, simply throw off the drive chain, place foot upon board which connects Bagger to Mill at the bottom then lift up the Mill and the Bagger is detached.

CROP IMPROVEMENT

To sow large, plump grain, such as results from a sensible system of grading with a good mill, means a direct increase taking it one year with another, of from 10 to 25%.

THE SHARPLES MECHANICAL MILKER

Every man keeping a fair sized dairy should be interested in this milker for the following reasons:

First.—The cost of milking cows can be reduced seventy-five per cent., or you can milk four times as many cows with the same number of men.

Second.—One operator and one boy, to milk and assist, can properly milk one hundred cows in less than two hours, giving independence from hired help in case of necessity.

Third.—The improvement in the cow's condition, resulting from the thorough, quick, gentle and regular work of the milker, will induce an increased milk production.

Fourth.—A far purer product; lower bacterial count and more valuable milk is assured, because all stable air is entirely excluded and the milking parts are so easily and thoroughly cleansed.

These statements are based on close and extended observation of large numbers of these milking machines in actual operation under widely varying conditions for long periods of time.

Sharples Separator Co.,
West Chester, Pa.

Dear Sirs:

We have been using your milker purchased of Haskell Implement & Seed Co., and find it to be perfectly satisfactory in every respect.

Have had the milk tested from every cow and have gotten an average of 800 bacteria; the lowest count was 200.

Will heartily recommend your machine for anyone wishing to produce clean milk or production.

Very truly yours,

(Signed) E. F. BOWNESS,
Mgr. Rox-Holt Farm,
Auburn, Me.

The above count of 800 was average from 10 samples. Counts were made from agar plates after 24 hours incubation at 37°. Samples plated about 18 hours after milking.

Respectfully,

(Signed) HORACE F. RYDER, Phe.

Auburn, Me., Jan. 30, 1914.

PORTER PERFECT BARN EQUIPMENT

We are in position to furnish complete barn Outfits of the most improved type including Stalls, Stanchions, Hay and Litter Carriers, Water Basins, Mangers, etc. Estimates and information gladly given and if building new or rebuilding your old barn will furnish without charge Blue Prints giving most improved construction.

The Porter Litter Carrier shown above is a high-class machine, built for heavy service. The tub is four feet long and two feet wide, with a capacity of $12\frac{1}{2}$ cubic feet, or 800 pounds of wet manure. It is built of heavy, galvanized steel, reinforced with rolled steel angle one inch wide all around the top and along the end seams. Most perfect lifting device found on any Carrier. Furnished with chain hoist if desired.

Closed

Closed

PORTER STEEL STANCHIONS

These Stanchions are made of high carbon U-bar steel and are amply strong. The lock is simple and positive in action. Can furnish with wood lining if desired, also small size for calves and extra heavy for bulls.

Send for Full Descriptive Catalog

THE NEW MODEL SIMPLEX CREAM SEPARATOR

Self-balancing Bowl, Link Blade Device

A DAIRY NECESSITY

The most successful dairyman is the one who produces the greatest amount of dairy products in proportion to the cost. This cannot be done without the use of a good cream separator. Every farmer, who keeps even a few cows should have one, because it will save him money and relieve him of much drudgery.

OLD METHODS WASTEFUL

The old methods of handling milk are wasteful in that much of the butter fat is lost. A separator saves this loss because it skims the milk clean, getting all the butter fat which can be made into butter at home, or delivered to the creamery much more easily than the whole milk.

The Improved Simplex Separator should appeal to every intelligent and discriminating dairyman or farmer for the following reasons:

1. It is the most efficient and gets all of the fat that can be obtained from the milk by any process.
2. It is self-balancing, and will not give trouble as other machines do.
3. It is the lightest running, and can be operated by any member of the family.
4. It is the simplest machine, having the fewest parts.
5. It can skim cold or warm milk, and will not clog up.

The LINK-BLADE Bowl complete. This bowl, 900 lbs. capacity, is only $4\frac{1}{2}$ " diameter, 5" deep, and runs at only 7700 R. P. M.

Note the heavy, compact construction and convenient height of supply-can and discharge spouts. The top of the supply can is only $3\frac{1}{2}$ ft. from the floor.

Some advantages of the Link Blades are as follows:

1. Increased capacity of from 30 to 50 per cent. over the most efficient of previous devices, combined with very clean skimming under a wide range of conditions as to milk, temperature, etc.
2. Great convenience in cleaning and handling, because the blades do not come apart, and do not have to be reassembled in any particular order.
3. The device being expansible and fitting the bowl snugly, it can never become loose, or shift in the bowl, and throw the same out of balance.
4. The pressure being transmitted through a series of brass rivets, there is no strain on the blades themselves, and there is no rusting formed by the points of contact of the rivets.
5. The device being much more efficient is a great deal lighter and smaller in order to do the same amount of work, making it still easier to handle, and requires less power to run than other devices of same capacity.
5. The wear and tear on the bearings, gearing, etc., is, in the long run, much less with the Self-Balancing "Simplex" because most of the wear in the other machines comes from the rough running of the bowl, which multiplies the friction and causes the machines to run harder and bring increased wear on every running part.

NEW IMPROVED SIMPLEX SEPARATOR—(Continued)

A Few of the Special Features on the Simplex.

The most striking feature of the new "Simplex" is its light running. The 1100-lb. size, when at speed and skimming milk, takes no more power than the ordinary 500-lb. Hand Separator of other makes. It opens up a distinctively new field for the large Hand Separator.

To obtain these remarkably light running qualities, a higher grade and type of bearings than has ever been used before in the Cream Separators, as well as a higher and more improved types of gearings had to be adopted. The principal bearings used in the new "Simplex," those carrying the weight of the bowl and gearing, are imported annular ball bearings of exactly the same kind that are used in the highest class of Automobiles—the most accurate, the lightest running and the most durable ball bearings known. In the "Simplex" these bearings carry less than one-tenth of the load they are intended to carry, so that their life, with proper care, is practically unlimited.

The gearing contains as few parts as it is possible to use in a Separator. The bevel driving gears have planed teeth, three times more expensive but far more satisfactory than cut teeth used in cheap-grade machines. The bevel pinion is of steel. The spur pinion at the end of the bowl-spindle is made of Vanadium or Nickel steel, the first time that these wonderful alloy steels have been used in Cream Separator work.

Showing accessibility of gearing. Removing the body-housing, exposes the gearing and lower bearings.

Showing extreme simplicity of driving gears—one pair bevel gears, one pair spur gears. Showing also the inclined intermediate shaft, a new and exclusive "Simplex" feature.

All shafts, even to the crank-shaft, are ground to size, and the crank-shaft runs in bronze bushings. The whole design and construction of the "Simplex" is of a higher and more expensive type than has ever been attempted either here or abroad.

The clutch is the one-piece automatic safety clutch that has been so successfully used on the previous "Simplex" Models.

The vast sum spent in advertising other machines has been put into the construction of the "Simplex," producing a new and higher type of machine and setting an entirely new standard in the Cream Separator construction. The "Simplex" is a machine that the dairyman can buy as his last Separator. It will appeal especially to those who have been users of other makes. It will last for years and, owing to its improved system of bearings, stay in balance and always run at maximum efficiency.

Specifications of "SIMPLEX" LINK-BLADE CREAM SEPARATORS.

THE UNADILLA SILO

Note that the Doors Can Be Placed
in Any Position.

A Few of the Reasons Why This Silo Is Superior to Other Makes

It has an unobstructed continuous door front, which allows you to shove the ensilage out instead of pitching it up three to six feet and over across bars separating doors. When doors are placed at intervals one is not able to slide the door up, but has to push it back into the silo.

The sides of the door opening being adjustable, on account of the short hoops across the front, gives the owner of the UNADILLA SILO the advantage of merely tightening or loosening a few nuts to adjust the front, rather than being obliged to re-fit the doors.

The UNADILLA SILO doors can be shoved up and left in the opening, thereby keeping out the snow, rain, wind and sun, which would be injurious to the ensilage, as well as shrinking and decaying the lumber in the silo.

The doors, as well as the frame, are put over a jointer after being built, thus assuring a tight fitting joint.

Our doors do not warp out of shape for they are made of two thicknesses of matched lumber laid cross-wise and nailed firmly together, with the grain in opposite directions.

To put our doors in place and fasten or remove them engages but one hand, while the other is used to hold onto the ladder formed by the fastener. Our lugs and door fasteners are made of malleable iron, not the ordinary grey iron that is commonly used. The malleable iron will bend instead of break, and when it receives a sudden blow, does not crack and break as the grey iron.

On account of the peculiar construction and combination of our door front with the short bar across the door, combined with the patent lug at the side of the doorway, we are enabled to tighten every hoop on the silo twelve inches while standing on the ladder by our fastener.

Made of Spruce, White Pine, Cypress, and Oregon Fir.

Send for Special Booklet and Prices on the size you are interested in

THE FREEMAN STEEL WINDMILL

Have you ever seen a better windmill? The Freeman, without a doubt, is the strongest and most durable windmill made. Its simplicity of construction commends it to all buyers. Every detail part is made the best the manufacturers know how, making a faultless combination which cannot be equaled. A windmill that will do more work, stand harder service, require less repairs and will give you better satisfaction than any other mill on the market. If it doesn't we will right the wrong. Isn't such a guarantee as this, backed up by **S. Freeman & Sons Manufacturing Company**, strong enough to interest you in our windmill?

The illustration, Fig. 5, shows the engine head of our 8-foot pumping windmill. We call particular attention to the distance from out to out of the main shaft bearings. This serves a double purpose of making the mill run easier, and because properly balanced, it will turn more promptly in shifting winds.

Fig. 5

Fig. 6 illustrates the lower ten feet of our 30-foot, four-post angle steel tower. This illustration shows the thoroughness of the bracing employed in the construction of all our towers.

ESTIMATES

We will be pleased to estimate cost of water supply where windmills, towers, sub-structures, pumps and wood or pneumatic tanks are used.

Write for special catalogues and prices.

Fig. 6

IMPROVED WOOD AND POLE SAW FRAMES

TILTING TABLE WOOD SAW
Weight, 275 Pounds

TILTING TABLE POLE SAW
Weight, 350 Pounds

Illustrations show our various styles of Wood and Pole Saw Frames. These are substantial machines, well made and of good materials throughout. Wood saw frames have the balance wheel on the saw arbor, and are intended for sawing cord wood. Pole saw frames have the balance wheel on a separate frame below the table, so that they can be used for sawing long poles as well as cord wood. We make both styles of these machines with either tilting or sliding table.

The tilting table is pivoted so that it balances perfectly and is easy to handle. The sliding table is fitted with grooved rollers, which run on a "V"-shaped track, and is very easy to operate. The arbors are true and heavy. They run in long, babbitted bearings, and are fitted with a 95-pound balance wheel. On pole saw frames the connection between the two arbors is made by running belt over idler pulley.

NOTE. All our Wood and Pole Saw Frames are made right hand, unless otherwise ordered.

Weights shown above are for machines without saw blades. Saw blades weigh about as follows: 20-inch, 8 pounds; 22-inch, 10 pounds; 24-inch, 14 pounds; 26-inch, 17 pounds; 28-inch, 20 pounds; 30-inch, 24 pounds.

CAMPBELL MOUNTED THRESHERS

FURNISHED EITHER MOUNTED OR UNMOUNTED

Campbell Threshers have been on the market for forty years and are no experiment.

The frames are made of maple and ash, well proportioned, securely bolted and braced.

The cylinder is a bar or open cylinder, with shaft, made of cold rolled steel running in good wide boxes, babbitted top and bottom. These boxes are supplied with compression grease cups which keep out the dirt, in fact all of the principal bearings are supplied with these cups.

The construction of the Tooth Bars is bridge angle steel backed up by wood bars, which make a cushion for the teeth when coming in contact with stones or other hard substances and prevents them from breaking, also keeps the nuts from jarring off.

Furnished with stackers, elevators and baggers at extra cost.

Can furnish these machines with 26, 30 or 36-in. cylinder and guarantee them to equal or exceed capacity of any machine made of the same size cylinder.

Our small Thresher No. 11½ has a cylinder 26 inches long, 14 inches diameter, with cylinder shaft 1½ inches.

Length of Separator, 8½ feet.

Width of Separator, 36 inches.

Length of chaffing sieves, 48 inches.

Length of recleaning sieves, 36 inches.

Width of sieves, 32 inches.

Number of sieves, 8.

Power required, 4 to 6 Horse Power.

Capacity guaranteed one bushel per minute under favorable conditions.

Larger sizes built in proportion.

A Thresher that we Guarantee would Prove very Durable and Satisfactory to You

Write for Catalog and Prices

THE DAIN PERFECTION MOTOR PRESS

In the new motor press illustrated above, we are able to offer to our customers a machine that is of greatly simplified construction, has a large baling capacity, and can be operated by an engine of moderate power. By the use of eccentric gears to drive the plunger there is obtained nearly 75 per cent. gain in leverage, which enables the same amount of work to be done with this press with a greatly reduced power. Much pressure is also saved for the reason that only about one-half the gearing that will be found on other presses is used.

Another valuable feature is that it is driven with a double belt drive from both sides of the engine; this being an advantage to the

working of the engine as well as transmitting the maximum amount of power.

This press is equipped with a positive working self feeder which is so timed that the best results will be obtained.

The frame is made of high grade steel angles liberally braced and trussed, furnishing very strong construction.

We furnish these with 16x18 or 18x22 bale chambers and mounted complete with trucks.

If desired, we will equip the outfit with 4 or 6 horse power engine all ready for operation.

The construction of this machine is certainly very far in advance of any other press on the market at the present time.

Special Circulars and Prices Gladly Mailed on Application

NO. 25 STEEL FARM TRUCK

The above cut represents one style in our low-down farm gear. These are especially desirable where one desires a medium priced truck which is both light and strong, and well fitted for common farm purposes. Un-

excelled for use in mounting spraying rigs, saw outfits, engines, etc. We can furnish these fitted with either wood or steel wheels, and they are commonly equipped with 3¼x10 inch skains and 4 inch tires.

Full Descriptive Catalog and Prices Gladly Mailed on Request

GARDEN CULTIVATORS AND SEEDERS

MATTHEWS NEW UNIVERSAL GARDEN DRILL, NO. 16

This machine is acknowledged by all seedsmen and gardeners to be one of the leading and most reliable seeders made. Will plant accurately all kinds of garden seeds. Has patent Indicator for regulating the dropping of the seed. This Seeder can be used as a drill or can be converted at will into a Hill Seeder dropping distances of 4, 6, 8, 12, 16, 24 and 48 inches apart.

Net Price \$8.25

MATTHEWS NEW UNIVERSAL COMBINATION HILL AND DRILL SEEDER, CULTIVATOR, PLOW, RAKE AND MARKER

No. 22

In this Implement we present a combination of the No. 16 Hill and Drill Seeder illustrated above and No. 26 High Arch Expansion Double Wheel Hoe illustrated on the following page. This combination gives the user a One Wheel Seeder and a Single or Double Wheel Cultivator. Very easily changed from Seeder to Cultivator by removal of two bolts. We furnish with this the following attachments: 1 pair 8-inch Hoes, 1 pair Narrow Cultivator Teeth, 1 pair Wide Cultivator Teeth, 1 Center Cultivator Tooth, 1 pair Plows, 1 pair Rakes and 1 pair Vine Guards. Net Price \$11.00

MATTHEWS NEW UNIVERSAL CONSTELLATION SEEDER, HOE, CULTIVATOR, PLOW, RAKE, MARKER

No. 119

Our High grade garden Seeds should be used with the above seeders.

The illustration shows the complete implement with all attachments furnished. In the Constellation is represented a brilliant assemblage of the New Universal Garden Drill and the New Universal Wheel Hoe, Cultivator, Rake and Plow, for use either as a one-wheel or two-wheel Seeder, Hoe, Rake, Cultivator, Plow, Marker. Six implements in one. Each implement is entirely separate from the other and the only parts used in each, the wheels and handles, are changed from one frame to the other by only two bolts. Cultivating attachments are shown detached. They consist of 1 Cultivator Frame, 1 pair Hoes, 1 pair Plows, 1 pair Rakes, 1 pair Narrow Cultivator Teeth, 1 pair Wide Cultivator Teeth, 1 Center Cultivator Tooth, 1 pair Markers. Net Price \$10.25

GARDEN CULTIVATORS AND SEEDERS

NEW UNIVERSAL DOUBLE WHEEL HOE CULTIVATOR, PLOW AND RAKE

No. 14

The special design of a Double Wheel Hoe is the Working of both sides of the row at one passing, but it may also be used as a between rows cultivator.

The Adjustable Arch not only forms a means of gauging the depth of the work to be performed, but by an ingenious device enables the teeth to be pitched at any angle desired. Attachments furnished with No. 14 are one pair each of Hoes, Plows, Rakes, Narrow Cultivators, Wide Cultivators, Vine Guards.

Net Price, \$6.00

NEW UNIVERSAL HIGH ARCH EXPANSION WHEEL HOE, CULTIVATOR, RAKE AND PLOW

No. 26

The wheels are 12 in. in diameter, and the Arch high enough to cultivate over plants 20 inches or more in height. Our Double Wheel Hoe already meets all requirements but we present here, if possible, a more complete implement of larger size. Attachments with this Hoe as follows: One pair each, Long Bladed Hoes, Short Bladed Hoes, Narrow Cultivators, Wide Cultivators, Plows, Rakes, Vine Guards, one only Center Cultivator and one Center Tooth Holder. Net Price, \$8.75

A Double or Single Wheel Hoe at Will

NEW UNIVERSAL SINGLE WHEEL HOE, CULTIVATOR, PLOW AND RAKE

No 11

This Single Wheel Hoe can be used in straddle cultivation by setting the wheel on one side and bringing the rows of plants under center of frame. Later cultivation to be done between rows. Attachments are: One pair each Narrow Cultivators, Wide Cultivators, Hoes, Plows, Rakes, one Center Cultivator and one Vine Guard. Net Price \$5.25

NEW UNIVERSAL GARDEN PLOW AND ATTACHMENTS

With Rear Wheel

No. 116

The Front Wheel is adjustable and is 15½ in. in diameter. The Handles are also adjustable. A first-class garden plow and one which will give perfect satisfaction. The attachments are: 1 Landside Plow, 1 Sweep or Scuffle, 1 Rake and 1 Double Tongued Cultivator. Net Price \$3.50

GARDEN CULTIVATORS AND SEEDERS

DEERE GARDEN SEEDER

It has a covering wheel in rear, a gauge wheel in front, and between them a furrow opener and seed hopper. A steel pitman driven by a cam wheel on the covering-wheel shaft gives the seed plate a sharp, oscillating motion, which insures a steady, even flow of seed. In the seed plate is a series of holes for different kinds and quantities of seed, and changes in feed can be made without emptying the hopper.

The depth of planting is quickly regulated. The furrow opener makes a clean, regular seed bed, and attached to the opener are wing scrapers, which bring the earth back into the furrow, and the wheel following presses it down, leaving it in the best possible condition for quick and sure germination.

Price \$5.50

McGEE GARDEN SEED CULTIVATOR

It has an arch frame and two wheels, like a tongueless cultivator. Two laterally swinging beams are attached to the arch and operated by two handles. Springs between the beams, or handles, and arch enable the operator to control easily, accurately and instantly the side movement of the knives or cultivators and to keep any kind of a crop well cultivated and thoroughly clean, with little or no hand weeding. The McGee is furnished with a set of weeding knives and a set of cultivators.

Other attachments extra. Price
McGee Garden Cultivator with weeding
knives and wrench \$4.75

THE NEW NO. 10 COLUMBIA GARDEN SEEDER

Price
\$10.50

Illustrated
Catalog

This new Seeder has created a sensation in the garden tool line and proved to be the most successful and accurate planter on the market. With the Columbia you can plant a greater variety of seed and more accurately than any other machine manufactured and also bear in mind that it has positively a force feed. Seed can be drilled or planted in hills at various distances. Comes equipped with eight seed cylinders and can furnish extra ones for any special seed you might have.

Regular equipment will plant all common vegetable seeds from the smallest up to Beans and Peas. Furnished this year with reliable Fertilizer Attachment at small additional cost. We most heartily recommend this Seeder.

DUNHAM'S IMPROVED "GOLD MEDAL" LAWN ROLLERS

ROLLER BEARING VERY LIGHT RUNNING

The secret of preparing and also maintaining a good lawn is in its being properly rolled. In the Improved "Gold Medal" Roller we offer the latest and most improved Roller Construction.

No. 2, medium, 2 curb, illustrated		18.00

CAHOON SEED SOWER

Will sow all kinds of grass and grain seeds from four to eight acres per hour at a common walking gait. Heavy seeds, such as wheat, it will throw 40 feet (20 feet each side of the operator); lighter seeds, of course, will not be thrown so far.

Price, \$3.00

THE CYCLONE SEED SOWER

A Very Popular Seeder and Very Extensively Sold

This Sower is guaranteed to distribute seed perfectly even and will not throw seed in an upward direction or against the operator, but directly and evenly to the land. Sows clover, timothy, red top or herds grass, alfalfa, oats, rye, wheat, millet, buckwheat, turnip and other varieties of farm seeds. It also distributes bone dust, land plaster, and fertilizer to advantage. Clover seed is sown to a width of 18 ft., timothy 15 ft., alfalfa 20 ft., wheat 25 ft., millet 18 ft. and oats 18 ft., etc. (Full directions on each machine.)

Price, \$1.50 each

PARCEL POST INFORMATION

Parcel Post rates do not apply to seeds, bulbs, or plants. These are subject to the former rate, 8 cents per pound, regardless of distance. All merchandise usually sent by mail or express is included under Parcel Post, and is sent as 4th class matter.

THE BEST PAINT FOR THE JOB IN HAND

Colonial
House Paint
will give
you an
attrac-
tive
look-
ing
house.
The color
will not
fade.

For Floors Colonial
Interior Floor Paint
gives a tough, elastic
wear-
resisting
surface.

Colonial Paint

Colonial Paint will not crack, peel or scale.
It is made from Pure Linseed Oil, Pure
White Lead, Pure Oxide of Zinc, ground and amal-
gamated by special machinery. No adulterants of
any kind in Colonial Paint.

For Walls and Woodwork use **Vel-ve-ta** (flat
or enamel). It gives a surface that will not crack or
chip. **Semi-matte washable. Economical.** Much
better than wall paper or kalsomine.

For Blinds, Trim, Store Fronts—or any other
work requiring a green paint—use **Bronzite**,
the permanent green. It outlasts all other greens.

For Barns
and Out-
buildings use
**Amalgam
Barn Paint**.
It is an
economical,
long-lasting
paint.

For Interior
Woodwork
and Furniture
use Colonial
Varnish
Stains. Many
beautiful
colors.
Splendid
results at
small cost.
